

RUDIMENTS OF MUSIC

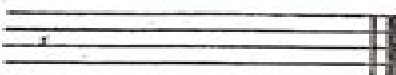

I. CHROMATIC SIGNS

STAFF—The staff is the basis of written music. It is what the notes are presented on. It consists of 5 lines with four equal spaces between them.

BAR—divides the staff into measure.

DOUBLE BAR—usually found at the end of the a piece. Indicates the end of a section.

LEDGER LINES—Ledger lines extend above and below the staff, allowing for higher or lower notes to be shown than would otherwise fit on the staff. These lines follow the same musical alphabet pattern as the staff does. Think of them as just extra lines and spaces on the end of the staff.

REPEAT MARK—repeat the piece.

TIE—two or more notes at the same place with curve lines to be sung or played as one.

SLUR—two or more different notes at different places with curve lines.

G-CLEF or TREBLE CLEF—The treble clef (the large fancy symbol to the far left) shows the musician that the staff is treble. Since it curls around the G line, it is also called a G clef. The treble staff begins with the first line as E.

F-CLEF OR BASS CLEF—The bass clef, also known as the F clef because it locates the line known as F, is on the far left. The bass clef uses the same musical alphabet as treble, but the letters start in different places.

Sound of Music Eun Ji Park, 2025-08-21 This book explains that the essence of music lies in intangible mental realms While vibrations generate sound and sound forms music music represents something far beyond mere phenomena a higher form of expression This book describes how vibrations are transmitted to the human ear stirring emotions and ultimately moving the soul This complex process defies full comprehension Nevertheless humanity has long sought to uncover the secrets of music and sound striving since ancient times to objectively interpret them This book begins by exploring this endeavor as both a way of observing phenomena and attempting to understand the world posing the following questions How have we interpreted music and sound throughout history What origins have we ascribed to music and sound How have we analyzed sound phenomena with different technologies up to the present day Throughout history scholars have observed and analyzed music and sound from different perspectives initially seeking to understand sound through numerical frameworks and later employing scientific experimentation to analyze it more precisely The observations and theories discovered along the way have established a rich body of knowledge enabling us to accurately understand sound phenomena through mathematics and science This book emphasizes that the artistic domain of music and the scientifically analyzed realm of sound are bound in an inseparable symbiotic relationship It argues that those who truly wish to understand music must acquire knowledge of sound The quality of sound *La qualit du Son* as this book demonstrates plays a crucial role in shaping the emotional impact of music with listeners experiences varying significantly based on sound quality In some respects sound itself may play an even more important role than any other aspect in forming music Ultimately this book provides foundational knowledge of music and sound from diverse perspectives while explaining their connections within the historical contexts of music and science
