Lectures and addresses 1919 1924 CW 298 Ultimately isn't it a very holy and religious obligation to cultivate and educate the divine spiritual element that manifests anew in every human being who is born Isn't this educational service a religious service in the highest sense of the word Isn't it so that our holiest stirrings which we dedicate to religious feeling must all come together in our service at the altar when we attempt to cultivate the divine spiritual aspect of the human being whose potentials are revealed in the growing child Science that comes alive Art that comes alive Religion that comes alive In the end that's what education is Rudolf Steiner Sept 7 1919 Sponsored by the industrialist Emil Molt and inspired by the philosopher Rudolf Steiner the first Free Waldorf school opened in Stuttgart Germany on September 7 1919 Since then the Waldorf movement has become international with many hundreds of schools around the world This book contains all of the more or less informal talks given by Steiner in the Stuttgart school from 1919 to 1924 Included are speeches given by him at various school assemblies parents evenings and other meetings Steiner spoke here with spontaneity warmth and enthusiasm Readers will find a unique glimpse of the real Steiner and how he viewed the school and the educational philosophy he brought into being German source Rudolf Steiner in der Waldorfschule Vorträge und Ansprachen Stuttgart 1919 1924 GA 298

Rudolf Steiner Bo Dahlin,2017-06-22 This book covers Rudolf Steiner's biography presented from an educational point of view and also unfolds the different aspects of Steiner's educational thought in Waldorf Education His point of view is unique in that it relates education to a wide horizon of different contexts such as social pedagogical evolutionary and spiritual aspects His ideas are philosophical ethical epistemological ontological However above all they are based on spiritual understanding of the human being and the world In many ways they stand in stark contrast to the views that inform present mainstream educational thought and practice Nevertheless there are points where Steiner's ideas can find a resonance in more recent educational thought Steiner was in many ways ahead of his time and his educational ideas are still relevant to many present day educational issues and problems **What Is Waldorf Education?** Rudolf Steiner,2004-11 The soul's

immortality and its repeated earthly births are not new ideas in Western thought. They are implicit in the Pythagorean and Platonic traditions as well as in some branches of esoteric Judaism and Cabbala. But it was not until the early years of this century that the West was given a detailed modern evolutionary philosophy of human life based on the reality of reincarnation and karma. This turning point occurred when Rudolf Steiner began to make public the results of his spiritual scientific researches. He viewed the revelation of reincarnation and karma as one of his most important life tasks. Steiner's contribution however remains unique in its understanding of the human being as an evolving developing being of body soul and spirit. On the basis of his researches presented in numerous books and lectures we begin to understand how the complex interaction of human lives between birth and death and between death and a new birth gives new meaning not only to individual lives lived on Earth in community with others but also to human history and evolution and to earthly and cosmic events. This book collects many of Steiner's major statements on reincarnation and karma. The primary purpose of this volume is to help readers meet the challenge of spiritual research in the area of individual evolution of the soul and spirit in the context of cultural and universal evolution. Such a study can be tremendously revealing and provide spiritual understanding in a time of increasing intellectual confusion and spiritual poverty. The notion of reincarnation and karma is generally associated in most minds with spiritual traditions of the East especially Hinduism and Buddhism. Ren Querido's in depth sixty page introduction however places these concepts within the context of Western spiritual development and esoteric tradition showing us a panoramic view of how such ideas have developed over the centuries in the West.

The Spirit of the Waldorf School Rudolf Steiner, 1995-09 9 lectures September 15 22 1920 and October 15 16 1923 CW 302a Speaking to the teachers at the first Waldorf school in Stuttgart Steiner asserts that the unfortunate presence of dishonesty and alienation in society today cannot be addressed without a completely renewed and holistic education. He states fact that successful teaching requires a living synthesis of the spiritual gymnast the ensouled rhetorician and the intellectual professor. Of these the formative effect of the rhetorician's cultivation of artistic speech is the most important. It's impossible for true teaching to be boring declares Steiner and he offers several examples of how teachers can observe a natural phenomenon so intimately that its creative life can flow into the children through a teacher's own words in the classroom. He also describes in spiritual scientific depth how the actions of teachers directly affect the physiological chemistry of their students. From this perspective education is really therapy transformed to a higher level and should be seen as closely related to the healing arts. Steiner also shows how the perception of hidden relationships between education and the processes of human development can kindle a heartfelt enthusiasm and a sense of responsibility in teachers for the far reaching health effects that educational activities can produce.
