Rudolf Steiner Herald Of A New Epoch:

Rudolf Steiner Stewart C. Easton,1980 This is the first full scale biography of Rudolf Steiner written in English

Rudolf Steiner Gary Lachman,2007-02-01 The first truly popular biography of the influential twentieth century mystic and educator who while widely known for founding the Waldorf schools and other educational and humanitarian movements remains a mystery to many who benefit from his ideas People everywhere have heard of Waldorf schools Biodynamic farming Camphill Villages and other innovations of the Austrian philosopher Rudolf Steiner 1861 1925 Indeed Steiner as an architect artist teacher and agriculturalist ranks among the most creative and prolific figures of the early twentieth century pioneering work in alternative education holistic health and environmental research While his accomplishments are felt all over the world few people understand this unusual figure Steiner s own writings and lectures fill several bookcases intimidating those who would like to know more Works on Steiner are often dense and insider in tone further deterring the curious No popular biography written by a sympathetic but critical outsider has been available Gary Lachman s Rudolf Steiner provides this missing introduction Along with telling Steiner s story and placing Steiner in his historical context Lachman s book presents Steiner s key ideas in a readable accessible manner In particular Lachman considers the spread of Steiner s most popular projects which include Waldorf schools one of the leading forms of alternative education and Biodynamic farming a popular precursor to organic farming He also traces Steiner s beginnings as a young intellectual in the ferment of fin de si cle culture to his rise as a thought leader within the influential occult movement of Theosophy to the founding of his own metaphysical teaching called Anthroposophy Finally the book illustrates how Steiner s methods are put into practice today and relates Steiner s insights into cosmology to the work of current thinkers Rudolf Steiner is a full bodied portrait of one of the most original philosophical and spiritual luminaries of the last two centuries and gives those interested in the history of ideas the opportunity to discover one of the most underappreciated figures of the twentieth century The Four Temperaments

Rudolf Steiner,1985 Between individual characteristics and those of the human race in general lie the four main groups of human temperaments phlegmatic sanguine melancholic and choleric Rudolf Steiner describes how each person s combination of temperaments is shaped out of a particular kind of union between hereditary factors and the inner spiritual nature Telling descriptions are provided for the inwardly comfortable phlegmatic the fickle interest of the sanguine the pained and gloomy melancholic and the fiery assertive choleric Steiner also offers practical suggestions for guiding the temperaments educationally in childhood and for adult self improvement **The Anthroposophical Understanding of the Soul** F. W. Zeylmans van Emmichoven,1983-03 A new psychology of the human soul Use of the word soul to denote the inner world of human experience has not been fashionable in the psychology of recent times However as Zeylmans van Emmichoven stresses in this groundbreaking study human inner life is always active as a whole entity which calls for recognition of the soul as a significant aspect of the human entity Drawing on the works of Goethe Franz Brentano Edmund

Husserl Max Scheler and Rudolf Steiner this original approach to psychology uses the soul's own self-perception as the method of clarifying the mysteries of the inner life. The soul as an inner world participates in two worlds: an external world and a still deeper interior world. The soul is revealed as a mediator between the outer physical world including the body and the inner core of the human being, the I or true self. Through its intentional relationship to these two worlds, an ever-shifting stream of dynamic polarities courses continuously through the soul: love/hate, joy/sorrow, pleasure/displeasure, desire/satisfaction, laughing/weeping, life/consciousness. Many soul processes are explored in this context, including doubt, will, mental images, perceiving, judgment and decision, time and space experience, and sexual identity, as well as how the soul expresses itself in the language of dreams, in everyday speech, in posture, in temperament, and in character. In addition, Van Emmichoven proposes yet another dimension of the human soul through the idea of the soul's drive for development, which unfolds through the Goethean laws of polarity, enhancement, and metamorphosis. He paints a profound picture of the higher aim of human life: the soul's gradual liberation from physical bonds to become an organ for the I, yet always balanced by the soul's inclination to become an organ for the body. Along this unfinished journey toward a full human existence, he describes the roles played by love, by wisdom, and by inner death and resurrection. As van Emmichoven points out with this understanding of the soul, it is clear that there is an area where psychology and a philosophy of life overlap and indeed cannot be entirely separated. If we were to define how the understanding of the soul represented in this book is related to contemporary schools of thought, there are three thinkers: Herder, Goethe, and Steiner, whose spiritual outlook has had a decisive influence. The fact that none of these thinkers became particularly well known in this field is not so surprising if we take into account the comprehensive wisdom and spiritual depth which distinguish their works from the introduction. This book is a translation from Dutch of *De Menselijke Ziel* 1946.

Michael and the Two-horned Beast Bernard Nesfield-Cookson, 1998. In our materialistic and skeptical age, it can be difficult to take seriously the existence of real spiritual beings. Nevertheless, countless individuals, from the historic founders of religions to those who have been through near-death experiences, have spoken of beings of light such as angels and archangels, and evil beings, spirits of darkness. The author, basing his work on Rudolf Steiner's teachings, presents an epic picture of the forces of good and evil, a battle of cosmic dimensions in which we are all intimately involved. He clarifies the pivotal role of the Archangel Michael, the Guardian of Cosmic Intelligence, who fights to hold the balance between the key powers of evil in our time: Lucifer and Ahriman, and describes other members of the evil hierarchies. He also discusses the biblical Apocalypse of St. John, the Mexican Mysteries, and much else. This book is an essential guide to meeting the challenge of evil at the new millennium.

Waldorf Education and Anthroposophy 1 Rudolf Steiner, 1995.

Man and World In the Light of Anthroposophy Stewart C. Easton, **Minor Histories** Mike Kelley, 2004-02-06. The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the blazing network of focused conflations from which Mike Kelley's styles are generated is on display in all

its diversity in this second volume of the artist's writings. The first volume *Foul Perfection* contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work ranging from texts in voices that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. *Statements* consists of twenty pieces produced between 1984 and 2002, most of which were written to accompany exhibitions including *Ajax* which draws on Homer, Colgate, Palmolive and Longinus to present its eponymous hero. *Some Aesthetic High Points* an exercise in autobiography that counters the standard artist bio included in catalogs and press releases and a sequence of creative writings that use mass cultural tropes in concert with high art mannerisms approximating in prose the visual styles that characterize Kelley's artwork. *Video Statements and Proposals* are introductions to videos made by Kelley and other artists including Paul McCarthy and Bob Flanagan and Sheree Rose. *Image Texts* offers writings that accompany or are part of artworks and installations. This section includes *A Stopgap Measure* Kelley's zestful millennial essay in social satire and *Meet John Doe* a collage of appropriated texts. *Architecture* features an discussion of Kelley's *Educational Complex* 1995 and an interview in which he reflects on the role of architecture in his work. Finally *Ufology* considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

A Secret History of Consciousness Gary Lachman, 2003-07 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to. Recently this effort was extended to try to include the inner world of human beings. Gary Lachman argues that this view of consciousness is misguided and unfounded. He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s. In this secret history of consciousness, consciousness is seen not as a result of neurons and molecules but as responsible for them; meaning is not imported from the outer world but rather creates it. In this view, consciousness is a living, evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader, more expansive state. What that consciousness may be like and how it may be achieved is a major concern of this book. Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open. As this history unfolds, we encounter the ideas of many modern thinkers from esotericists like P. D. Ouspensky, Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson, William James, Owen Barfield and the psychologist Andreas Mavromatis. Two little-known but important thinkers play a major role in his synthesis: Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness. An important contribution to the study of consciousness, a must read.

The Education of the Child and Early Lectures on Education Rudolf Steiner, 1996 It is necessary for human beings to remember not only what they already understand but to come to understand what they already know—that is what they have acquired by memory in the way the child acquires language. In a certain sense

understanding things through concepts should proceed from the stored up treasures of the memory The more children know in memory before they begin to understand through intellectual concepts the better p 31 As early as 1884 while tutoring a boy with special needs Steiner began a lifelong interest in applying spiritual knowledge to the practical aspects of life Steiner originally published the essay at the core of this book in 1907 It represents his earliest ideas on education in which he lays out the soul spiritual processes of human development describing the need to understand how the being of a child develops through successive births beginning with the physical body's entry into earthly life and culminating in the emergence of the I being with adulthood Also included are several early lectures on education ranging from 1906 to 1911 well before the birth of the Waldorf movement in 1919

The Western Esoteric Traditions Nicholas Goodrick-Clarke, 2008-10-14 Western esotericism has now emerged as an academic study in its own right combining spirituality with an empirical observation of the natural world while also relating the humanity to the universe through a harmonious celestial order This introduction to the Western esoteric traditions offers a concise overview of their historical development Nicholas Goodrick Clarke explores these traditions from their roots in Hermeticism Neo Platonism and Gnosticism in the early Christian era up to their reverberations in today's scientific paradigms While the study of Western esotericism is usually confined to the history of ideas Goodrick Clarke examines the phenomenon much more broadly He demonstrates that far from being a strictly intellectual movement the spread of esotericism owes a great deal to geopolitics and globalization In Hellenistic culture for example the empire of Alexander the Great which stretched across Egypt and Western Asia to provinces in India facilitated a mixing of Eastern and Western cultures As the Greeks absorbed ideas from Egypt Babylon Assyria and Persia they gave rise to the first esoteric movements From the late sixteenth to the eighteenth centuries post Reformation spirituality found expression in theosophy Rosicrucianism and Freemasonry Similarly in the modern era dissatisfaction with the hegemony of science in Western culture and a lack of faith in traditional Christianity led thinkers like Madame Blavatsky to look East for spiritual inspiration Goodrick Clarke further examines Modern esoteric thought in the light of new scientific and medical paradigms along with the analytical psychology of Carl Gustav Jung This book traces the complete history of these movements and is the definitive account of Western esotericism

The Tree of Life and the Holy Grail Sylvia Francke,2007 Recent works of fiction and popular history have promoted the idea that the Holy Grail symbolizes a physical bloodline that resulted from a union of Jesus Christ and Mary Magdalene It is claimed by some that this is the secret kept tirelessly by certain esoteric movements for the past two millennia Based on her groundbreaking research Sylvia Francke exposes this notion as a blatant misinterpretation of the mystery traditions that preceded and ran parallel to the birth of Christianity She traces the ancient spiritual paths of knowledge from the Cathars the Knights Templar and the enigmatic Rosicrucians to the work of Rudolf Steiner in the twentieth century Here she concludes is true Grail knowledge the Tree of Life and the Holy Grail itself explained in their metaphysical context She suggests a solution to the mystery of sudden wealth and the strange behavior of Brengel Sauni re the mysterious priest of Rennes le Chateau in southern France True Grail knowledge Francke concludes has nothing to do with bloodlines or worldly status rather it is an ancient lifeline to the spiritual origins of creation Its energetic forces radiate out from the Earth and in from the constellations and planets while interacting with human individuals It represents the key to fulfilling humanity's

quest and the next step in human evolution The recent explosion of interest in revisionist Christianity history the shadow Grail prompted Sylvia Francke to revise The Tree of Life and the Holy Grail first published in 1996 The result is a completely reworked and expanded book that offers a powerful and convincing refutation of distorted esoteric truths **The Role of Imagination in Culture and Society** Astrid Diener,2013-07-22 Owen Barfield 1898 1997 philosopher historian and literary theoretician is well known for his friendship with C S Lewis What is virtually unknown is that he was also admired and promoted by T S Eliot who in the 1920s became his publisher at Faber and Faber There can scarcely be two writers at greater variance than Lewis and Eliot that Barfield was admired by both showed that he was an independent thinker far more subtle and complex than has so far been recognized Diener's book about Barfield's early work is the first systematic study to trace the roots and the development of his thought It places Barfield in the tradition of British and European cultural and social critics including Coleridge Arnold Nietzsche and Rudolf Steiner In the light of this tradition Barfield's work emerges as a unique and constructive contribution to twentieth century thought Waldorf Education and Anthroposophy Rudolf Steiner,1995 9 lectures various cities February 23 1921 September 16 1922 CW 304 This is the first of two previously untranslated volumes of Steiner's public lectures on Waldorf education Readers familiar with Steiner's lectures for teachers will discover here how Steiner presented his ideas to the general public with surprising directness Teaching Steiner says should be artistic creative and improvisational not dogmatic Yet he is clear that the great battle concerns the spiritual nature of the child Other themes include understanding the role of health and illness in education as well as repeated expositions of the three major phases in child development imitation authority and freedom There are also two lectures Steiner gave in England on Shakespeare and new ideals in education Topics include Spiritual Science and the Great Questions of our Present Civilization Education and Practical Life from the Perspective of Spiritual Science Knowledge of Health and Illness in Education The Fundamentals of Waldorf Education Educational Methods Based on Anthroposophy Education and Drama Shakespeare and the New Ideals German source Erziehungs und Unterrichtsmethoden auf Anthroposophischer Grundlage GA 304 **Spiritualism and British Society Between the Wars** Jenny Hazelgrove,2000-09-02 Historians of modern British culture have long assumed that under pressure from secular forces interest in spiritualism had faded by the end of the Great War Jenny Hazelgrove challenges this assumption and shows how spiritualism grew between the wars and became part of the fabric of popular culture This book provides a fascinating and lively insight into an alternative culture that flourished and continues to flourish alongside more conventional outlets for spiritual beliefs and needs The Return of Sacred Architecture Herbert Bangs,2006-11-14 An inspirational call for a return to the tenets of traditional architecture as a remedy for the dehumanizing standards of modern architecture Explains how modern architecture is emblematic of our current estrangement from the spiritual principles that shaped humanity's greatest civilizations Reveals how the ancient laws of sacred proportion and harmony can be restored The ugly buildings that characterize the modern landscape are inferior not

only to the great cathedrals of medieval Europe and the temples of ancient Egypt and Greece but even to lesser buildings of the more recent past The great masterworks of our ancestors spoke to humanity's higher nature Architect Herbert Bangs reveals how today's dysfunctional buildings bring out the worst in humanity reinforcing that which is most base within us He shows how through the ancient laws of proportion and number architecture once expressed the harmonious relationship between man and the cosmos In early times the architect worked within a sacred and esoteric tradition of creating structures through which human beings could gain insight into the nature of the divine reality Today that tradition has been abandoned in favor of narrowly defined utilitarian principles of efficiency and economy In *The Return of Sacred Architecture* Bangs provides the key to freeing architecture from the crude functionality of the twentieth century the architects of the modern human landscape must find the deep felt connection to the cosmos that guided the inner lives of those who built the temples of the past The form of their buildings will then reflect the sacred patterns of geometry and proportion and bring forth greater harmony in the world

The Temple Sleep of the Rich Young Ruler Edward Reaugh Smith, 2011-11 Who wrote the Gospel of John The author identifies himself only as the disciple whom Jesus loved and Christian tradition tells us that this disciple was the apostle John However during the past century scholars have increasingly come to doubt that attribution In 1902 Rudolf Steiner wrote that the author of the Gospel of John was in fact Lazarus Steiner's position stemmed from his insight that Lazarus's encounter with death involved far more than people realized an initiation into higher spiritual realities that uniquely qualified him to write this gospel Edward Smith takes up this argument and shows that subsequent research has tended to favor Lazarus for reasons grounded in John's Gospel itself More important Smith shows that subsequent discoveries at Nag Hammadi and Mar Saba corroborate Steiner's reasoning about the nature of the raising of Lazarus pointing to Lazarus as the rich young ruler of Mark's Gospel
