Sport coaching has grown significantly as an area of research interest with an expanding number of sport coaching programs offered The past decade or so has also seen significant interest in games based approaches to coaching and teaching games On a global level Game Sense is one of the most recognized athlete centred approaches for team sports probably close behind Teaching Games for Understanding Game Sense for Coaching and Teaching provides an understanding of how an Australian approach to coaching has grown and developed as it has been taken up across the globe While the focus is on Game Sense the book also offers insights into how any coaching or physical education PE teaching approach changes as it is adapted to different contexts across the world examining the theoretical historical and philosophical foundations of sport coaching and teaching in schools This book is particularly useful for undergraduate and post graduate sport coaching and PE courses but is also likely to be of interest for all practicing sports coaches or physical education teachers and lecturers

Rugby Football New Zealand. Department of Education, The Coach's Guide to Teaching Doug Lemov, 2020-12-07

The mark of a great coach is a constant desire to learn and grow A hunger to use whatever can make them better The best selling author of Teach Like a Champion and Reading Reconsidered brings his considerable knowledge about the science of classroom teaching to the sports coaching world to create championship caliber coaches on the court and field What great classroom teachers do is relevant to coaches in profound ways After all coaches are at their core teachers Lemov knows that coaches face many of the same challenges found in the classroom so the science of learning applies equally to them Unfortunately coaches and organizations have a mixed level of understanding of the research and study of the science of learning Sometimes coaches and organizations build their teaching on myths and platitudes more than science Sometimes

there isn't any science applied at all While there are thousands of books and websites a coach can consult to better understand technical and tactical aspects of the game there is nothing for a coach to consult that explicitly examines the teaching problems on the field the court the rink and the diamond Until now Intended to offer lessons and guidance that are applicable to coaches of any sporting endeavor including everyone from parent volunteers to professional coaches and private trainers Lemov brings the powerful science of learning to the arena of sports coaching to create the next generation of championship caliber coaches
