Scherpe, 2016-01-29 The Impact of Institutions and Organisations on European Family Law looks at the impact that institutions and organisations have had and continue to have on European family law In many ways the chapters in this volume provide the easiest explanation for the existence of a European family law While there is no European body that could actually legislate definitively on family law even the European Union has no such mandate there are still some obvious institutions that have a very direct impact on European family law These can be divided into two groups namely those that have a direct impact such as the European Court of Human Rights and the European Union and those that have an indirect impact such as the Commission on European Family Law CEFL the Council of Europe and the International Commission on Civil Status ICCL CIEC as well as the private international law instruments of the Hague Conference HCCH

and the EU Together with religion all of these institutions are contributing to the creation of a European family law This book and the others in the set will serve as an invaluable resource for anyone interested in family law It will be of particular use to students and scholars of comparative and international family law as well as family law practitioners

What is The Family of Law? Alan Brown,2019-02-07 This book argues that the legal understanding of family in the UK continues to be underpinned by the idealised image of the nuclear family premised upon the traditional gendered roles of father as breadwinner and mother as homemaker This examination of the law s model of the family has been prompted by the substantial reforms that have taken place in family law in recent decades and the significant evolution in social attitudes and familial practices that has occurred in parallel Throughout the book the influence of the nuclear family is noted in several different contexts various specific legal definitions of family the legal regulation of adult conjugal relationships the attribution of legal parenthood and the construction of the role of the parent within the law Ultimately this book argues that while these reforms have resulted in additional categories of relationship coming to be situated within the nuclear family model there has not as yet been any fundamental alteration of the underpinning concept of the nuclear family itself This book concludes by considering the possibilities offered beyond the nuclear family exploring the reconceptualising of the legal understanding of family around alternative and potentially radical models of family
