Ruling Passions A Theory Of Practical Reasoning:

Ruling Passions Simon Blackburn, 2023 Written in a trenchant style *Ruling Passions* propounds an original philosophy of human motivation and morality It uses game theory and cognitive science to illuminate ethics and exposes the pretensions of rival theories

Incommensurability and its Implications for Practical Reasoning, Ethics and Justice Martijn Boot, 2017-06-27 If values conflict and rival human interests clash we often have to weigh them against each other However under particular conditions incommensurability prevents the assignment of determinable and impartial weights In those cases an objective balance does not exist The original thesis of this book sheds new light on aspects of incommensurability and its implications for public decision making ethics and justice Martijn Boot analyzes a number of previously ignored or unrecognized concepts such as incomplete comparability incompletely justified choice indeterminateness and ethical deficit concepts that are essential for comprehending problems of incommensurability Apart from problematic implications incommensurability has also favourable consequences It creates room for autonomous rational choices that are not dictated by reason Besides insight into incommensurability promotes recognition of different possible rankings of universally valid but sometimes conflicting human values This book avoids unnecessary technical language and is accessible not only for specialists but for a large audience of philosophers ethicists political theorists economists lawyers and interested persons without specialized knowledge

Pluralism and Law A. Soeteman, 2013-04-17 AREND SOETEMAN In the past we lived on one earth but in many different worlds Different civilisations in regions far apart knew about one another at least from about the 16th century they competed with one another or tried to dominate the other they influenced one another but in many important aspects they were independent from one another Somewhere in the 20th century however this changed There is no far apart anymore We have lived through two European wars which developed into world wars Modern aeroplanes allow us to travel in only a couple of hours around the world Instant communication between individuals who have the whole globe in between is a reality There still exist great differences between different civilisations But they can ignore one another only at their peril They deeply influence one another Today therefore we live in one world Conflicts in the Middle East in Rwanda and Uganda or in the former Yugoslavia have their impact all over the world Violations of human rights no matter where are increasingly considered to be the concern of all of us The whims and caprices of some dictator may influence the spending possibilities of the general public far away

Making Moral Sense Logi Gunnarsson, 2000-09-18 Is it rational to be moral Can moral disputes be settled rationally Which criteria determine what we have a good reason to do In this innovative book Logi Gunnarsson takes issue with the assumption made by many philosophers faced with the problem of reconciling moral norms with a scientific world view namely that morality must be offered a non moral justification based on a formal concept of rationality He argues that the criteria for the rationality of an action are irreducibly substantive rather than purely formal and that assuming that morality must be given a non moral justification amounts to a distortion of both rationality and

morality His discussion includes substantial critical engagement with major thinkers from two very different philosophical traditions and is notable for its clear and succinct account of Habermas discourse ethics It will appeal to anyone interested in practical reason and the rational credentials of morality Feeling Like It Tamar Schapiro, 2021-02-18 Feeling like doing something is not the same as deciding to do it You may have an inclination to do it but there is still a moment where you can decide to do it or not This moment of decision presents a puzzle if being inclined to do something is a form of motivation or self movement how can we be passive in relation to our own self movement Is our relationship to our inclinations like that of a rider to a horse or is it rather like our relationship to spontaneous judgments or perceptions Schapiro shows that familiar theories of inclination fail to provide compelling answers to these questions as they make being inclined to perform an action either too similar or too dissimilar to the action itself Schapiro puts forward a Kant inspired inner animal view which holds that when you are merely inclined to act the instinctive part of yourself is already active while the rest of you is not The moment of decision is your will at a crossroads Feeling Like It provides a concise and accessible investigation of a new problem at the intersection of ethics philosophy of action and philosophy of mind **Rational Choice and Democratic Deliberation** Guido Pincione, Fernando R. Tesón, 2006-07-24 This book offers a comprehensive and sustained critique of theories of deliberative democracy *Kant and the Scottish Enlightenment* Elizabeth Robinson, Chris W.

Surprenant, 2017-06-26 Most academic philosophers and intellectual historians are familiar with the major historical figures and intellectual movements coming out of Scotland in the 18th Century These scholars are also familiar with the works of Immanuel Kant and his influence on Western thought But with the exception of discussion examining David Hume s influence on Kant s epistemology metaphysics and moral theory little attention has been paid to the influence of the Scottish Enlightenment thinkers on Kant s philosophy This volume aims to fill this perceived gap in the literature and provide a starting point for future discussions looking at the influence of Hume Thomas Reid Adam Smith and other Scottish Enlightenment thinkers on Kant s philosophy **Curriculum for Justice and Harmony** Keith C. Barton, Li-Ching Ho, 2021-09-30 Barton and Ho present a global vision of social and civic education one that reorients the field toward justice and harmony Drawing from diverse philosophical and cultural traditions as well as empirical research they introduce curriculum principles designed to motivate and inform students thoughtful and compassionate deliberation of public issues This book argues that the curriculum must prepare young people to take action on issues of justice and harmony societal ideals that are central to all communities Effective action depends on deliberation characterized by emotional commitment collaborative problem solving and engagement with diverse perspectives and forms of expression Deliberation for public action also requires knowledge of people s lives and experiences their insights into social issues and strategies for advancing justice and harmony These curriculum principles are illustrated through case studies of public housing food insecurity climate change gender bias public health exploitation of domestic workers incarceration of racialized minorities the impact of

development and environmental change on Indigenous communities and other pressing global concerns For additional resources and related information please visit the authors website www.justiceandharmony.com

The Normativity of what We Care about Katrien Schaubroeck, 2013 A love based reason theory as a new perspective in the debate on practical reasons Reasons and obligations pervade our lives The alarm clock gives us a reason to get up in the morning the expectations of colleagues or clients give us a reason to do our jobs well the misery in developing countries gives us a reason to donate money headaches give us a reason to take an aspirin Looking for unity in variety philosophers wonder what makes a consideration count as a reason to do something The nature and source of practical reasons has been debated intensively over the last three decennia in analytic philosophy This book discusses the three most influential theories in current debates referred to as the desire based the value based and the rationality based theories of practical reasons The author argues that all three are defective because they overlook the role of what agents care about

John Stuart Mill and the Art of Life Ben Eggleston, Dale Miller, David Weinstein, 2011 The Art of Life is John Stuart Mill's name for his account of practical reason In this volume eleven leading scholars elucidate this fundamental but widely neglected element of Mill's thought Mill divides the Art of Life into three departments Morality Prudence or Policy and aesthetics In the volume's first section Rex Martin David Weinstein Ben Eggleston and Dale E Miller investigate the relation between the departments of morality and prudence Their papers ask whether Mill is a rule utilitarian and if so whether his practical philosophy must be incoherent The second section contains papers by Jonathan Riley and Wendy Donner who explore the relation between the departments of morality and aesthetics They discuss issues ranging from supererogation to aesthetic pleasure and humanity's relationship with nature The papers in the third section consider the Art of Life's axiological first principle the principle of utility Elijah Millgram contends that Mill's own life refutes his claim that the Art of Life has a single axiological first principle Philip Kitcher maintains that Mill has a dynamic axiology requiring us to continually refine our conception of the good In the final section three papers address what it means to put the Art of Life into practice Robert Haraldsson locates an Art of Ethics in On Liberty that is in tension with the Art of Life Nadia Urbinati plumbs the classical roots of Mill's view of the good life Finally Colin Heydt develops Mill's suggestion that we regard our own lives as works of art

Three Faces of Desire Timothy Schroeder, 2004-08-12 To desire something is a condition familiar to everyone It is uncontroversial that desiring has something to do with motivation something to do with pleasure and something to do with reward Call these the three faces of desire The standard philosophical theory at present holds that the motivational face of desire presents its unique essence to desire a state of affairs is to be disposed to act so as to bring it about A familiar but less standard account holds the hedonic face of desire to reveal to true nature of desire In this view to desire something is to tend to pleasure if it seems that the desired state of affairs has been achieved or displeasure if it seems otherwise thus tying desire to feelings instead of actions In *Three Faces of Desire* Schroeder goes beyond actions and feelings to advance a novel and controversial theory of desire

that puts the focus on desire's neglected face reward. Informed by contemporary science as much as by the philosophical tradition, *Three Faces of Desire* discusses recent scientific discoveries that tell us much about the way that actions and feelings are produced in the brain. In particular, recent experiments reveal that a distinctive system is responsible for promoting action on the one hand and causing feelings of pleasure and displeasure on the other. This system, the brain's reward system, is the causal origin of both action and feeling and is the key to understanding the nature of desire.

Autonomy, Moral Worth, and Right Jeffrey Edwards, 2017-11-07. This book examines the surprising ramifications of Kant's late account of practical reason's obligatory ends as well as a revolutionary implication of his theory of property. It thereby sheds new light on Kant's place in the history of modern moral philosophy. [The Philosophy of Elizabeth Anscombe](#) Roger Teichmann, 2008-04-24. Intentional action. Practical reason. Ethics. Mind and self. Time and causality. Language and thought.

The Primitivist Theory of Truth Jamin Asay, 2013-10-03. Jamin Asay's book offers a fresh and daring perspective on the age-old question: What is truth? With a comprehensive articulation and defence of primitivism, the view that truth is a fundamental and indefinable concept. Often associated with Frege and the early Russell and Moore, primitivism has been largely absent from the larger conversation surrounding the nature of truth. Asay defends primitivism by drawing on a range of arguments from metaphysics, philosophy of language, and philosophy of logic, and navigates between correspondence theory and deflationism by reviving analytic philosophy's first theory of truth. In its exploration of the role that truth plays in our cognitive and linguistic lives, *The Primitivist Theory of Truth* offers an account of not just the nature of truth but the foundational role that truth plays in our conceptual scheme. It will be valuable for students and scholars of philosophy of language and of metaphysics.

Ideological Fixation Azar Gat, 2022-10-04. Combining insights from evolutionary psychology with a broad sweep through history down to the ideological civil war ripping the United States apart, the book explores the deeper roots of people's inability to accept claims about reality which come from the opposite ideological camp, no matter how valid they might be. After theorists around 1960 proclaimed the death of ideology, ideological divides and clashes have reemerged with renewed intensity throughout the world. In the United States, they have become particularly venomous. Each side in America's escalating ideological civil war charges the other with concocting fake news and alternative facts. The other side is widely viewed as malicious, irrational, or downright stupid, and often as barely legitimate. People are deaf to claims about reality that come from the opposite camp, no matter how valid they might be. The zeal of the opposing sides is often scarcely less than that which characterized the religious ideologies of old. Indeed, historical religious ideologies have largely been replaced by secular religions or religion substitutes. Ideology consists of normative prescriptions regarding how society should be shaped, together with an interpretive roadmap indicating how this normative vision can be implemented in reality. *Ideological Fixation* is the result of tensions and conflicts between these two elements. The book focuses on ideologies' factual claims about the world, typically subordinate to and often distorted by their normative

commitment In exploring this phenomenon the book combines insights from evolutionary psychology regarding the nature of some of our deepest proclivities with a broad sweep through history and around the world It proceeds from the Stone Age to the rise of civilization the great religions and modernity to a critique of fundamental factual premises that underlie some of the major debates dominating today s liberal democracies not least the United States

Essays on Neuroscience and Political Theory F. Vander Valk,2013-03-01 The past 20 years have seen increasingly bold claims emanating from the field of neuroscience Advances in medical imaging brain modelling and interdisciplinary cognitive science have forced us to reconsider the nature of social cultural and political activities This collection of essays is the first to explore the relationship between neuroscience and political theory with a view to examining what connections can be made and which claims represent a bridge too far The book is divided into three parts Part I places neuroscience as a social and political practice into historical context Part II weaves together the insights from contemporary neuroscience with the wisdom of major figures in the history of political thought Part III considers how neuroscience can inform contemporary debates about a range of issues in political theory This work brings together scholars who are sceptical about the possibility of integrating neuroscience and political theory with proponents of a neuroscience informed approach to thinking about political and social life The result is a timely and wide ranging collection of essays about the role that our brain might play in the life of the body politic It should be essential reading for all those with an interest in the cutting edge of political theory
