The Unlikely Bushman Ron Hicks, 2011 **Understanding Cancer** Ron Hicks, 2009-10-15 Cancer is a mystery to most people, a deadly mystery. Many believe that just about anything you eat or do can cause cancer and that the disease is an automatic death sentence. This is not the case. The aim of *Understanding Cancer* is to remove the misconceptions that surround the disease and make it understandable to the general public. As early treatment often means the difference between success or failure, the book describes the danger signals you should be aware of, particularly for the top five cancers. This will answer most of the questions people ask about the disease. But above all, it emphasises that most cancers are caused by the environment and most cancers can be prevented or avoided.

This textbook provides a comparative review of financing universal access to healthcare in the Organisation for Economic Co-operation and Development (OECD) countries. The first two chapters of the book provide a framework for financing universal access to healthcare. The remaining eight chapters present case studies of eight OECD countries that have successfully introduced reforms to finance universal access to healthcare for their population through landmark legislative reforms. A concluding chapter focuses on the lessons learned from the OECD and recommendations from policymakers and others who are planning similar reforms. The book is
