political trajectories after 1989 and how the EU's leverage eventually influenced domestic politics in liberal and particularly illiberal democracies. In doing so, *Europe Undivided* illuminates the changing dynamics of the relationship between the EU and candidate states from 1989 to 2004 and challenges policymakers to manage and improve EU leverage to support democracy, ethnic tolerance and economic reform in other candidates and proto candidates such as the Western Balkan states Turkey and Ukraine. Albeit not by design, the most powerful and successful tool of EU foreign policy has turned out to be EU enlargement and this book helps us understand why and how it works. *Roadmap to Bangalore?* Almas

Heshmati, Arno Tausch, 2007 Looks at the global issues that cause some nations to stagnate while others rush forward

Capitalist Diversity on Europe's Periphery Dorothee Bohle, Bela Greskovits, 2012-08-15 With the collapse of the Council for Mutual Economic Assistance in 1991 the Eastern European nations of the former socialist bloc had to figure out their newly capitalist future. Capitalism they found was not a single set of political economic relations. Rather they each had to decide what sort of capitalist nation to become. In *Capitalist Diversity on Europe's Periphery* Dorothee Bohle and Bela Greskovits trace the form that capitalism took in each country, the assets and liabilities left behind by socialism, the transformational strategies embraced by political and technocratic elites and the influence of transnational actors and institutions. They also evaluate the impact of three regional shocks: the recession of the early 1990s, the rolling global financial crisis that started in July 1997 and the political shocks that attended EU enlargement in 2004. Bohle and Greskovits show that the postsocialist states have established three basic variants of capitalist political economy: neoliberal, embedded neoliberal and neocorporatist. The Baltic states followed a neoliberal prescription: low controls on capital, open markets, reduced provisions for social welfare. The larger states of central and eastern Europe, Poland, Hungary and the Czech and Slovak republics, have used foreign investment to stimulate export industries but retained social welfare regimes and substantial government power to enforce industrial policy. Slovenia has proved to be an outlier, successfully mixing competitive industries and neocorporatist social inclusion. Bohle and Greskovits also describe the political contention over such arrangements in Romania, Bulgaria and Croatia. A highly original and theoretically sophisticated typology of capitalism in postsocialist Europe, this book is unique in the breadth and depth of its conceptually coherent and empirically rich comparative analysis.

The Logic of Regional Integration Walter Mattli, 1999-05-20 In the late 1980s regional integration emerged as one of the most important developments in world politics It is not a new phenomenon however and this 1999 book presents an analysis of integration across time and across regions Walter Mattli examines projects in nineteenth and twentieth century Europe but also in Latin America North America and Asia since the 1950s Using the tools of political economy he considers why some integration schemes have succeeded while many others have failed what forces drive the process of integration and under what circumstances outside countries seek to join Unlike traditional political science approaches the book stresses the importance of market forces in determining the outcome of integration but unlike purely economic analyses it also highlights the impact of institutional factors The book will provide students of political science economics and European studies with a framework for the study of international cooperation
