*Run. Risk. Reward.* Ryan Sandes, Steve Smith, 2024-09-01 As a follow up to his hugely popular 2016 autobiography Trailblazer Ryan Sandes new book explores the gripping and often life threatening adventures this extraordinary ultra trail runner has experienced around the globe since then. Not only have these projects tested the very edge of human endurance but on several occasions Ryan literally had to run for his life. Along with a 1 500 kilometre Himalayan adventure read about his attempt at completing the first 700 kilometre solo run up Namibia's legendary Skeleton Coast only to stumble upon some very angry Namibian soldiers conducting controversial seal clubbing. And with his running partner Ryno Griesel becoming the first people to run the entire circumference of Lesotho in one go during which they find themselves fighting off an attack from local herdsmen armed with rocks and knobkerries. In between these adventures Ryan battles to balance a challenging career with a dedicated commitment to his young family. Run Risk Reward is packed with adventure humour and some fascinating insights into the psyche of an ultra endurance athlete. These people are not like you and me.

Competition Vs. Stability: Oligopolistic Banking System with Run Risk Mr. Damien Capelle, 2021-04-23 This paper develops a model where large financial intermediaries subject to systemic runs internalize the effect of their leverage on aggregate risk returns and asset prices. Near the steady state they restrict leverage to avoid the risk of a run which gives rise to an accelerator effect. For large adverse shocks the system enters a zone with high leverage and possibly runs. The length of time the system remains in this zone depends on the degree of concentration through a franchise value price drop and recapitalization channels. The speed of entry of new banks after a collapse has a stabilizing effect.
