The Long Heat Andreas Malm, Wim Carton, 2025-10-07 A scathing critique of proposals to geoengineer our way out of climate disaster by the bestselling authors of *Overshoot* The world is crossing the 1.5°C global warming limit perhaps exceeding 2°C soon after What is to be done when these boundaries set by the Paris Agreement have been passed In the overshoot era schemes proliferate for muscular adaptation or for new technologies to turn the heat down at a later date by removing CO₂ from the air or blocking sunlight Such technologies are by no means safe they come with immense risks and provide an excuse for those who would prefer to avoid limiting emissions in the present But do they also hold out some potential Can the catastrophe be reversed masked or simply adapted to once it is a fact Or will any such round about measures simply make things worse The Long Heat maps the new front lines in the struggle for a liveable planet and insists on the climate revolution long overdue In the end no technology can absolve us of responsibility for our planet and each other

Becoming Earth Ferris Jabr, 2025-04-01 A vivid account of a major shift in how we understand Earth from an exceptionally talented new voice Earth is not simply an inanimate planet on which life evolved but rather a planet that came to life Glorious full of achingly beautiful passages mind bending conceptual twists and wonderful characters Jabr reveals how Earth has been profoundly miraculously shaped by life Ed Yong Pulitzer Prize winner and bestselling author of *An Immense World* FINALIST FOR THE LOS ANGELES TIMES BOOK PRIZE FINALIST FOR THE OREGON BOOK AWARD AN AMERICAN LIBRARY ASSOCIATION NOTABLE BOOK OF THE YEAR A BEST BOOK OF THE YEAR Smithsonian Chicago

Public Library Booklist Scientific American Nature A BEST BOOK OF THE SUMMER The Atlantic and NPR's Science Friday
One of humanity's oldest beliefs is that our world is alive. Though once ridiculed by some scientists, the idea of Earth as a vast interconnected living system has gained acceptance in recent decades. We and all living things are more than inhabitants of Earth; we are Earth, an outgrowth of its structure and an engine of its evolution. Life and its environment have coevolved for billions of years, transforming a lump of orbiting rock into a cosmic oasis, a planet that breathes, metabolizes, and regulates its climate. Acclaimed science writer Ferris Jabr reveals a radical new vision of Earth where lush forests spew water, pollen, and bacteria to summon rain; giant animals engineer the very landscapes they roam; microbes chew rock to shape continents; and microscopic plankton, some as glittering as carved jewels, remake the air and sea. Humans are one of the most extreme examples of life transforming Earth. Through fossil fuel consumption, agriculture, and pollution, we have altered more layers of the planet in less time than any other species, pushing Earth into a crisis. But we are also uniquely able to understand and protect the planet's wondrous ecology and self-stabilizing processes. Jabr introduces us to a diverse cast of fascinating people who have devoted themselves to this vital work. *Becoming Earth* is an exhilarating journey through the hidden workings of our planetary symphony: its players, its instruments, and the music of life that emerges, and an invitation to reexamine our place in it. How well we play our part will determine what kind of Earth our descendants inherit for millennia to come.

Yachting, 2007-12 **Race to Zero** Marian Krüger, Benedict Probst, Sebastian Hanss-Mirodone, 2025-04-17 Actionable Strategies for Businesses to Achieve Climate Neutrality. Climate change is not just an environmental issue. It is a fundamental business risk that demands urgent action from companies of all sizes and industries. While reducing greenhouse gas emissions is essential, reaching full CO2 neutrality remains a significant challenge. Traditional carbon offsetting alone will not be enough to drive meaningful impact. To stay ahead, business leaders must go beyond mitigation and actively contribute to removing carbon from the atmosphere. Marian Krüger and Benedict Probst highlight the most effective carbon removal strategies and share practical insights on how companies can integrate these solutions today, regardless of where they stand in their sustainability journey. *Let Your Mind Run* Deena Kastor, Michelle Hamilton, 2019-04-09 NEW YORK TIMES BESTSELLER. Deena Kastor is one of the greatest bodies in distance running, but this book captures what is so groundbreaking about her mind. Alexi Pappas, Olympian writer and filmmaker, now featuring a workbook to help chart your mind's journey. Inspiring, fascinating, and insightful. Practical for anyone trying to overcome the biggest impediments to climbing that next hill of growth. Shawn Achor, author of *The Happiness Advantage* and *Big Potential*. Deena Kastor was a star youth runner with tremendous promise, yet her career almost ended after college when her competitive method of running as hard as possible for fear of losing brought her to the brink of burnout. On the verge of quitting, she took a chance on legendary coach Joe Vigil, who had started the first professional distance running team in the US. At his Colorado training center, she encountered the notion that shaping her mind to be more encouraging, kind, and resilient could make her faster than she'd

ever imagined possible Building a mind so strong would take years of effort and discipline but it would propel Kastor to the pinnacle of running to American records in every distance from the 5K to the marathon and to the accomplishment of earning America's first Olympic medal in the marathon in twenty years Let Your Mind Run is a fascinating intimate look inside the mind of an elite athlete a remarkable story of achievement and an insightful primer on how the small steps of cultivating possibility can give anyone a competitive edge

Stars to Steer By Julia Jones, 2025-05-08 The extraordinary stories of the fearless women who set their sights on the sea in an all male world paving the way for the female sailing superstars of today Gender issues are stark at sea Historically a ship's crew is all male and although vessels are referred to as she women's contributions to sailing have been largely ignored if not actively opposed Today's sailing legends such as Tracy Edwards and Ellen MacArthur compete with men on equal terms but they stand on the shoulders of many women before them who had to challenge preconceptions prejudice and even the law in their wish to sail Spanning the 19th century to today Julia Jones dives into the lives of an array of incredible and unconventional women we meet single handed sailors wealthy explorers long suffering wives and penniless chancers with a thirst for adventure Each had to face down barriers of official exclusion family imposed restriction social disapproval and often a resulting lack of self belief In the 21st century British women wear Admiral's uniforms and break global yachting records yet their journey to professional sailing remains challenging and the public face of sailing remains mostly male evident in the lack of female Commodores in prestigious yacht clubs Even as sailing becomes more accessible the remarkable contributions within these stories are a precious source of inspiration to all women facing their own challenges today
