Rural Politics Policies For Agriculture Forestry And The Environment:

Rural Politics Michael Winter,1996 This book examines the issues affecting rural areas such as water pollution forestry and the greening of agricultural policy It focuses on the political parameters surrounding these issues **German Agriculture in Transition** G. Wilson,2001-05-21 A much needed contemporary analysis of the Common Agricultural Policy and Germany's role within it The authors investigate the effect of reunification on German policy today and ask whether she has acted as leader partner or obstructor in the formation of policy Their analysis includes social and environmental aspects as well as the economic and political with a special focus on the green agenda in European agriculture **The Law of Nature Conservation** Christopher Rodgers,2013-03-21 This book provides a detailed account of the UK law of nature conservation It covers all the extensive laws introduced in recent years to protect and promote the natural world examining the operation of the legislation in practice **The Rural** Richard Munton,2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts **Geographies of Agriculture** Guy Robinson,2014-01-14 Agricultural Geography has changed dramatically in recent decades reflecting the transformation of the farming industry itself

Geographies of Agriculture embraces these changes applying ideas and methods from contemporary social science as it moves beyond farm based production to address current issues affecting the production and consumption of food and fibre throughout the world The book places special emphasis on topics that reflect globalisation processes integration of agriculture into the wider agri food system concern with attaining sustainable production systems and the importance of both government and supra government policies Examples are drawn from North America Western Europe and the developing world Geographies of Agriculture will appeal especially to Geography students but should also be of interest to a broader range of students in Sociology Economics and Development Studies and anyone interested in agriculture food production and consumption and rural development

Forest Policies and Social Change in England Sylvie Nail, 2008-05-08 Forestry has been witness to some dramatic changes in recent years with several Western countries now moving away from the traditional model of regarding forests merely as sources of wood Rather these countries are increasingly recognizing their forests as multi purpose resources with roles which go far beyond simple economics In this innovative book Sylvie Nail uses England as a case study to explore the relationships between forests society and public perceptions raising important questions about forest policy and management both now and in the future Adopting a sociological approach to forest policy and management the book discusses the current validity of the two principles underlying forestry since the Middle Ages first that forestry should only exist when no better use of the land can be made and second that forestry itself should be profitable The author stresses how values and perceptions shape policies and conversely how policies can modify perceptions and also how policies can fail if they do not take perceptions into account She concludes that many of the issues facing English forestry in the 21st century from leisure health and amenity provision through education and rural as well as urban regeneration to biodiversity conservation go well beyond both national borders and the scope of forestry Indeed forestry in the 21st century seems to be less about planting and managing trees than about being a vector and a mirror of social change This novel synthesis provides a valuable resource for advanced students and researchers from all areas of natural resource studies including those interested in social history socio economics cultural geography and environmental psychology as well as those studying landscape ecology environmental history policy analysis and natural resource management

Multifunctional Agriculture G. A. Wilson, 2007 In a time of great agricultural and rural change the notion of multifunctionality has remained under theorized and poorly linked to the debates in the social sciences This book analyses the extent to which the proposed transition towards post productivist agriculture holds up to scientific scrutiny and proposes a new transition theory

Cultures of the Countryside Veronica Sekules, 2017-11-27 Cultures of the Countryside examines the relationship between the museum and the micro cultures of the countryside Offering an exploration of museums and heritage projects in the UK that have attempted to introduce new ways of engagement between localities objects and people this book considers how museums heritage initiatives and art projects have dealt with pressing local and

global socio political issues relating to the environment and rural life including changing demographics and rural practices local environmental concerns and global climate activism Providing a thorough examination of the representation of competing histories visions and politics Sekules asks whether museums and heritage projects can engage actively in shaping cultures as well as reflecting them At the core of the analysis is an examination of the findings from a project in the UK s East Anglia The Culture of the Countryside from which emerged themes closely bound to different countryside landscapes peoples and heritage Aimed at practitioners and students alike Cultures of the Countryside provides a unique insight into the roles of the museum and heritage projects in rural and environmental issues in the recent past whilst also offering perspectives and recommendations for the future

Environment and Business Alasdair Blair,David Hitchcock,2004-08-02 This text examines how businesses and the environment interact It is ideal for students with no previous knowledge of business studies It examines in depth the ways in which business industry the physical environment environmentalism and social change have evolved alongside each other The authors use boxed case studies to highlight how business practice and the environment interact at levels from local to global with examples from multinational companies government bodies national charities and local enterprise The book also contains a large number of informative diagrams The case studies include Shell Oil s environmental policy railways and the industrial revolution the British National Trust s business enterprises Sainsbury s approach to organic foods Australia s landcare scheme changing trends in retailing Brent Spar big game hunting and conservation

Applied Geography Michael Pacione,2002-03-11 Applied Geography offers an invaluable introduction to useful research in physical environmental and human geography and provides a new focus and reference point for investigating and understanding problem orientated research Forty nine leading experts in the field introduce and explore research which crosses the traditional boundary between physical and human geography A wide range of key issues and contemporary debates are within the books main sections which cover natural and environmental hazards environmental change and management challenges of the human environment techniques of spatial analysis Applied geography is the application of geographic knowledge and skills to identify the nature and causes of social economic and environmental problems and inform policies which lead to their resolution

The Killing Of The Countryside Graham Harvey,2011-09-30 Over then past fifty years the British countryside has changed out of all recognition A wide range of wildlife species are disappearing victims of modern intensive farming of pesticides and fertilisers and the sheer relentless pressure to maximise output from every hedge bank and field corner It need not have happened The loss of our wildlife and countryside has come about through a deliberate and sustained national policy one that costs the British people 8 billion a year The Killing of the Countryside is a devastating attack on modern British agricultural policy and practice and a plea for a return to natural cycles an end to subsidies and the domination of agribusiness and for a safe sustainable farming system Winner of the 1997 BP Natural World Book Award

Merrington, Dr Linton Winder Nfa, R. Parkinson, Mark Redman, L. Winder, 2002-08-22 This comprehensive text provides a concise overview of environmental problems caused by agriculture such as pesticide pollution and increased nitrate levels and offers practical solutions to them. It is well illustrated and contains a fully referenced introduction to the main contemporary agricultural pollution issues in the UK. It will help pro Landscape and Sustainability John F. Benson, Maggie H. Roe, 2005-11-29 This unique book is about landscape sustainability and the practices of the professions which plan, design and manage landscapes at many scales and in many locations: urban, suburban and rural. Despite the ubiquity of sustainability as a concept, this is the first book to address the relationship between landscape architecture and sustainability in a comprehensive way. Much in the book is underpinned by landscape ecology in contrast to the idea of landscape as only appealing to the eye or aspiring cerebrally to be fine art. As this book argues, landscape is and must be much more than this: landscape architecture is about making places which are biologically wholesome, socially just and spiritually rewarding.

The Women's Land Army in First World War Britain B. White, 2014-07-16 Between 1917 and 1919 women enlisted in the Women's Land Army, a national organisation with the task of increasing domestic food production. Behind the scenes, organisers laboured to not only recruit an army of women workers but to also dispel public fears that Britain's Land Girls would be defeminized and devalued by their wartime experiences.
