## **Rural Small Scale Industry In The People:**

*China Under the Four Modernizations* United States. Congress. Joint Economic Committee, 1982 **Michigan Journal of Economics**, 1980 *China Under the Four Modernizations*, 1982, *The Cambridge History of China: Volume 15, The People's Republic, Part 2, Revolutions Within the Chinese Revolution, 1966-1982* Roderick MacFarquhar, John K. Fairbank, Denis Crispin Twitchett, 1991-11-29 In continuing the post revolution study started in Volume 14 Volume 15 considers the developments in Mao's thoughts and how they related to China's government The most comprehensive account of this turbulent period in Chinese history **Technology, Politics, And Society In China** Rudi Volti, 2019-07-11 This study is the first to summarize the major technological policies implemented in China since 1949 and to place them in their social and historical context Dr Volti looks at technological change in China as part of a broader process of economic political cultural and organizational change focusing primarily on four key areas agriculture energy ground transportation and medicine and public health He emphasizes how technological change has been shaped by political and ideological structures notes how China's unique cultural heritage has affected adoption of technologies developed outside China and assesses China's success in developing technologies appropriate to its specific needs as an economically and politically developing nation He draws on interviews with technicians engaged in the transfer of technology to China as well as extensive primary source materials **Food Production in the People's Republic of China** Anthony M. Tang, Bruce Stone, 1980 Abstract A population of one billion people has the potential for enormous impact on the world food supply but demographic and food production data for the People's Republic of China have been difficult to obtain In an effort to fill this gap two papers are presented which attempt to synthesize and analyze as much information as is available and make predictions of probable trends in agriculture and related fields in the year 2000 and for the 1985 grain program Records from 1952-77 are used to estimate cultivated land animals energy consumption farm machinery fertilizer and output of grains soybeans and cotton The effects of industrialization and resources are considered Trends are toward population control although total demand will continue to grow emphasis on agriculture seems to indicate that production will be capable of keeping up with demand may result in some dietary improvement but will not provide for emergency supplies *Red China's Green Revolution* Joshua Eisenman, 2018-04-24 China's dismantling of the Mao era rural commune system and return to individual household farming under Deng Xiaoping has been seen as a successful turn away from a misguided social experiment and a rejection of the disastrous policies that produced widespread famine In this revisionist study Joshua Eisenman marshals previously inaccessible data to overturn this narrative showing that the commune modernized agriculture increased productivity and spurred an agricultural green revolution that laid the foundation for China's future rapid growth Red China's Green Revolution tells the story of the commune's origins evolution and downfall demonstrating its role in China's economic ascendance After 1970 the commune emerged as a hybrid institution including both collective and private elements with a

high degree of local control over economic decision but almost no say over political ones It had an integrated agricultural research and extension system that promoted agricultural modernization and collectively owned local enterprises and small factories that spread rural industrialization The commune transmitted Mao's collectivist ideology and enforced collective isolation so it could overwork and underpay its households Eisenman argues that the commune was eliminated not because it was unproductive but because it was politically undesirable it was the post Mao leadership led by Deng Xiaoping not rural residents who chose to abandon the commune in order to consolidate their control over China Based on detailed and systematic national provincial and county level data as well as interviews with agricultural experts and former commune members Red China's Green Revolution is a comprehensive historical and social scientific analysis that fundamentally challenges our understanding of recent Chinese economic history

**Historical Dictionary of the People's Republic of China** Lawrence R. Sullivan, 2007-05-23 When the Chinese Communist Party CCP seized power in October 1949 China was one of the poorest nations in the world In fact it was so weak it had been conquered by Japan a country one tenth its size a decade earlier Now more than fifty years later the People's Republic of China PRC is an emerging economic political and military superpower with the world's fastest growing economy and largest population 1.3 billion in 2005 A member of the United Nations Security Council since the early 1970s and a nuclear power China wields enormous influence in the world community The second edition of the Historical Dictionary of the People's Republic of China contains more than 400 cross referenced dictionary entries on individual topics spanning China's political economic and social system along with short biographies on important figures from politicians to writers and movie directors who have shaped Chinese history during the period of Communist rule from 1949 to 2006 Supplementing the entries are a chronology an introduction charts outlining the structure of the Chinese government and a bibliography of works in English making this a superb resource for college and high school students needing a quick reference on contemporary China

*China's Economic Development* Chu-yuan Cheng, 2019-03-13 How has the government of the PRC transformed traditional economic institutions into a socialist central planning system What has been the impact of this transformation on China's economic growth What is the essence of the Chinese development model and how successfully has it functioned during the past three decades What are the prospects for

t Technology and Science in the People's Republic of China Jon Sigurdson, 2013-10-22 Technology and Science in the People's Republic of China An Introduction tackles several areas of concerns in the technological development of China The title covers China's research structure scientific resources and technological priorities The text first reviews contemporary China and then proceeds to discussing Chinese history Next the selection talks about China's objective and policies The text also covers the Chinese research organizations along with education and training Chapter 7 tackles the basic and applied science in China while Chapter 8 details mass science The next chapter talks about China's policy on environmental protection The tenth chapter covers electronics and the last chapter tackles the future of Chinese technology The book will

be of great use to readers who have an interest in Chinese technological progress
