Rural Development B. K. Prasad, 2003 **Rural Development in the Digital Age** Martin Pěluha, Edward Kasabov, 2019-10-24 Rural Development in the Digital Age explores current theoretical and policy developments in EU rural policy during the 4 0 period The book offers an analysis of the contradictory and complex drivers and multiple impacts of Period 4 0 policy within the specific territorial context of its implementation It is commonly agreed within academic and policy circles that the contexts trends drivers and impacts which are currently morphing have the potential to determine the nature and boundaries of rural areas in the longer term The authors examine inconsistencies in the design and implementation of EU rural development policy driven largely by intensifying neo productivist pressures The importance and novelty of the book lie in defining and critically examining the territorial impacts of neo productivism as an ideology a practice and a set of policy imperatives during the EU s 2014 2020 programming period The authors argue that such a paradigm shift in EU rural policy may reduce its effectiveness and ability to meet its goals of balanced territorial development and cohesion This book will be of interest to advanced students researchers and policymakers in rural policy regional studies economic geography and EU policy **Alaska's Rural Development** Peter G. Cornwall, 2019-03-01 This book examines the social economic political and cultural concerns surrounding the development of rural Alaska The authors explore the controversy over rural development from a variety of perspectives some supporting economic development and its implications for rural communities others arguing for alternative approaches They raise the issues of external control over local development and the effects of the boom and bust cycle often associated with rural change Part 1 surveys the economic development of Alaska s resources providing an historical overview of its fur timber and fishing industries and examining the current importance of oil gas minerals and agricultural products The section concludes with a discussion of the unique patterns of trade between Alaska and Asia The second part turns to the organizations that have been and are presently the major vehicles for development the village and regional corporations that grew out of the Alaska Native Claims Settlement Act of 1971 and the non profit organizations responsible for social services and education The authors also discuss the increasingly important role of governmental institutions The final section considers the conflict between the goal of economic development and traditional Native values of subsistence and cultural preservation The authors ask whether the development of Alaska s rural regions must take place at the expense of the traditional lifestyle and cultural distinctiveness of Native society **Rural Development - Indian Context** Mr. Rohit Manglik, 2024-03-03 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Regional Development: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2012-04-30 From domestic to international settings aid

The Asian Megacity Region Debnath Mookherjee, 2020-04-11 This book argues that close and disciplined scrutiny of the Asian megacity regions is of critical importance to understanding Asian urbanization. However, any approach to studying these regions must adopt a multi-dimensional and trans-urban perspective; otherwise, without such an approach, we cannot truly make meaningful decisions about growth management and sustainable development for such regions. Amidst the sweeping demographic and structural shifts produced by global urbanization, Asian urbanization has a fascinating and prominent role. Asian urbanization is heterogeneous and more accurately constitutes phenomena than a phenomenon. However, despite this diversity, there are certain common features that we can identify. One of them is the Asian megacity region: the administrative and/or delineated territory of mixed urban-rural landscape surrounding a giant metropolis. The purpose of this book is to understand the main features of 21st-century urbanization. Note the limitations of current approaches: e.g. disparate scales, city-centric views, inadequate data sets. Articulate a pragmatically framed three-pronged approach: scale-based, trans-urban, multi-dimensional. Demonstrate the application of such an approach with a case study of one of the most important megacity regions in South Asia: the Delhi National Capital Region, underscoring the methodological requirements of such an approach. Discuss the next steps for the field as a whole, questions to be raised, and directions to be explored for further study. This timely conceptual and empirical book will appeal to students of urbanization, architects involved in urban policy and planning, and researchers alike.
