Rural Livelihoods And Poverty Reduction Policies:

Rural Livelihoods and Poverty Reduction Policies Frank Ellis, H. Ade Freeman, 2004-08-02 This important new collection of contributions brings together current thinking on poverty reduction and rural livelihoods in developing countries As well as leading economists in the field such as Frank Ellis and Chris Barrett there are a number of contributors from developing countries themselves The book examines both macroeconomic and microeconomic phenomena and contains wide range of case studies Skilfully exposing the gap that exists between the rhetoric of poverty reduction strategies in capital cities and the practice of public sector delivery in rural areas this key text will be essential reading for advanced students and researchers in the fields of rural development rural livelihoods poverty reduction strategies and Sub Saharan Africa development as well as advisors and practitioners in international organizations

Rural Livelihoods and Diversity in Developing Countries Frank Ellis, 2000-06-29 Rural families in developing countries make a living by engaging in diverse activities These range from farming to rural trade to migration to distant cities and even abroad This book explores the implications of rural livelihood diversity for key topics in development studies and for poverty reduction policies The livelihoods approach is gaining momentum and this is the first book to set it out in detail

Collective Action and Property Rights for Poverty Reduction Esther Mwangi, Helen Markelova, Ruth Meinzen-Dick, 2012-05-22 To improve their well being the poor in developing countries have used both collective action through formal and informal groups and property rights to natural resources Collective Action and Property Rights for Poverty Reduction Insights from Africa and Asia examines how these two types of institutions separately and together influence quality of life and how they can be strengthened to improve the livelihoods of the rural poor The product of a global research study by the Systemwide Program on Collective Action and Property Rights CAPRI of the Consultative Group on International Agricultural Research this book draws on case studies from East Africa and South and Southeast Asia to investigate how collective action and property rights have contributed to poverty reduction The book extends the analysis of these institutions beyond their frequently studied role in natural resource management by also examining how they can reduce vulnerability to different types of shocks Essays in the volume identify opportunities and risks present in the institutions of collective action and property rights For example property rights to natural resources can offer a variety of advantages providing individuals and groups not only with benefits and incomes but also with assets that can counter the negative effects of shocks such as drought and can make collective action easier The authors also demonstrate that collective action has the potential to reduce poverty if it includes more vulnerable groups such as women ethnic minorities and the very poor Preventing exclusion of these often marginalized groups and guaranteeing genuinely inclusive collective action might require special rules and policies Another danger to the poor is the capture of property rights by elites which can be the result of privatization and decentralization policies case studies and analysis identify actions to prevent such elite capture

problems and challenges concerning the governance of fisheries explores where these problems are situated and how potential solutions may be found It now seems clear that the crisis in the world's fisheries is a much larger and more complex problem than many had imagined Yet examining it through the lens of governability may offer the best hope for alleviating it as well as alleviating similar crises in other social systems James R McGoodwin Professor Emeritus University of Colorado
