China's Transition to Industrialism Thomas G. Rawski, 2025-10-01 China's Transition to Industrialism studies the history and development of a group of industries which have played key roles in China's recent economic gains Drawing on a wide range of materials the author focuses on engineering chemicals and allied producer industries showing how the growth of these sectors sparked a dynamic process of development which has spread to encompass the entire Chinese economy Rawski traces this industrialization process to three distinct sources vigorous prewar development in the private sector which created a nucleus of experienced producers in Shanghai and other urban centers the resource mobilization efforts of the post 1949 Communist government and a series of economic reforms which relaxed the performance constraints found in other socialist economies and stimulated a burst of innovative activity which has propelled China's economy from the depression of the early 1960s to a record of economic achievement unmatched among the large nations of the developing world

Revolutionary Wealth Alvin Toffler, Heidi Toffler, 2007-06-12 Since the mid 1960s Alvin and Heidi Toffler have predicted the far reaching impact of emerging technological economic and social developments on our businesses governments families and daily lives In **REVOLUTIONARY WEALTH** they once again demonstrate their unparalleled ability to illuminate current trends and anticipate what they mean for the future **REVOLUTIONARY WEALTH** focuses on how wealth will be created and who will get it in the twenty first century As the knowledge based economy a reality the Tofflers predicted forty years ago continues to replace the industrial based economy they argue money is no longer the sole determinate of wealth The Tofflers explain that we are becoming a nation of prosumers consuming what we ourselves produce and argue that we have all taken

on third jobs work we unwittingly do without pay for some of the biggest corporations in the country Using fascinating examples from our daily lives they illustrate how our everyday activities from parenting and volunteering to blogging painting our houses and improving our diets contribute to a non monetary economy that is largely hidden from economists Writing with the same insight and clarity that made their earlier books bestsellers the Tofflers present fresh groundbreaking new ways of thinking about wealth

Efficiency Criteria for Nationalised Industries (Routledge Revivals) Alec Nove,2013-02-01

First published in 1973 Efficiency Criteria for Nationalised Industries asks by what criteria we should judge the efficiency of nationalised industries what we mean by saying they should be run commercially and where the public interest should lie In this work Professor Nove believes we answer these questions incorrectly due to a lack of understanding of economic theory and a desire to relate real world economics to that of the text book The author says many economists in a world of indivisibilities complementarities and systems persist in thinking in terms of one dimensional fragmented marginalism Professor Nove who

is known for his writings on the Soviet economy raises many points relevant to the East as well as the West His work contributes to the economics of socialism while also making the case for greater realism in economic theory in general

Economic Principles David Warsh, 2010-06-15 For nearly ten years readers of the Sunday Boston Globe and newspapers around America have delighted in David Warsh's column Economic Principles This collection shows why Taken as a whole Warsh's writings amount to a vast and colorful group portrait of the personalities who dominate modern economics from the luminaries to unknown soldiers to eccentrics who add sparkle to the tapestry Partly a history of controversies in economics partly an essay on the evolution of the field Economic Principles offers a glimpse of one of the most important stories of our time the metamorphosis of a priestly class of moral philosophers into the mathematical mandarins of today whose ideas are reshaping society even as they reveal its workings in ever more subtle detail Warsh first recounts the rise of the economic paradigm deftly treating the rediscovery of Adam Smith and the centrality of markets He then turns to the generation of economists for whom the Nobel Prize was created in 1969 the men who forged the modern field in a few years during and after World War II Some like Paul Samuelson and Milton Friedman are well known to the public others like Trygve Haavelmo and George Dantzig are less quickly recognized But all have interesting stories which Warsh brings to light Tracing the high tech revolution to the current generation he sketches younger scholars such as Jeffrey Sachs Martin Feldstein and others less popularly known who rule the field today Marking the most powerful applications of modern economics Warsh explains how the ingenious rocket scientists of Wall Street are creating new markets and the business school wizards and leading corporate executives are reinventing the organization Finally in exploring the implications of modern economics Warsh introduces us to scholars operating on the boundaries of the field from Jane Jacobs to Noam Chomsky and to the critics like Donald McCloskey and Robert Reich who have brought a bit of moral philosophy back into the economist's brave new world At every step Warsh maps the field with the journalist's eye for detail Readers will see why he is considered one of the most consistently stimulating economic journalists in America

today *The Collapse of State Socialism* Bartolomiej Kaminski, 2014-07-14 Does the abrupt collapse of communist regimes in Eastern Europe arise only from errors in implementing the policy of state socialism leaving the concept itself still a potentially valid one Bartolomiej Kaminski argues to the contrary state socialism is a fundamentally defective idea that was well carried out enabling it to exist until its accumulated shortcomings made its survival extremely difficult How did the flawed state socialist system endure for so long Why is it failing now In answering these questions Kaminski who is both an economist and a political analyst proposes a general theory and then applies it to the case of Poland Contending that the breakdown of state socialism results from symbiosis of the state and the economy the book describes how communist governments searched for tools that would replace the market mechanism and the rule of law Doomed in advance by the absence of autonomy and competition this search generated new crises by undermining the state's capacity to suppress individual interests and to direct the economy Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Recovery and Development in the European Periphery (1945-1960)** Andrea Bonoldi, Andrea Leonardi, 2009 **Economic Development** John Eatwell, Murray Milgate, Peter Newman, 1989 First published in the New Palgrave a dictionary of economics in four volumes 1987 T p verso Includes bibliographical references Welfare, Choice and Solidarity in Transition János Kornai, Karen Eggleston, 2001-05-31 Reform of the welfare sector is an important yet difficult challenge for all countries in transition from socialist central planning to market oriented democracies Here a scholar of the economics of socialism and post socialist transition and a health economist take on this challenge This 2001 book offers health sector reform recommendations for ten countries of Eastern Europe drawn consistently from a set of explicit guiding principles After discussing sector specific characteristics lessons of international experience and the main set of initial conditions the authors advocate reforms based on organized public financing for basic care private financing for supplementary care pluralistic delivery of services and managed competition Policymakers need to achieve a balance both assuring social solidarity through universal access to basic health services and expanding individual choice and responsibility through voluntary supplemental insurance The authors also consider the problems that undermine effectiveness of market based competition in the health sector **Facing the Era of Great Transformation** Wu Jinglian, 2021-03-31 This book collects essays from Chinese economic sage who was the mastermind of the reform and opening and persistent champion of market driven development In the essays he outlines his vision of the systemic reform needed for today's China from rule of law to completion of the market system and reform of state owned enterprises Dr Wu's thoughts are always of interest but at this

pivotal moment of Chinese economic recalibration his views will be of more value than ever to scholars economists
journalists and those in civil society
