Architecture as Commentary: Ruskin's Pre-modern Architectural Thought and its Influence on Modern Architecture

Giovanni Leoni

Ruskin as a pioneer of modern architecture

Evaluating Ruskin's influence on contemporary architecture¹ is a complex matter since the history of his legacy is fraught with contradiction. On the one hand, Ruskin's architectural thought has enjoyed considerable 'official' success, but at the expense of its fundamental content. Furthermore there exists an authentic but secret legacy, a little explored terrain whose power and range we are only beginning to glimpse now that the century is drawing to a close and the concept of the modern is becoming clearer. Thus Ruskin's fundamental influence on twentieth-century architectural thought may be said to be in conflict with the most commonly held views of Ruskin as architectural theorist.

It would certainly be worthwhile to sketch a history of the misunderstandings that mark the 'official' but unfaithful success of Ruskin's ideas in the field of architecture. Such an account would begin with Ruskin still alive. In the preface to the third edition (1874) of *The Stones of Venice* he writes:

No book of mine has had so much influence on contemporary art as the *Stones of Venice*; but this influence has been possessed only by the third part of it, the remaining two thirds having been resolutely ignored by the British public. And as a physician would, in most cases, rather hear that his patient had thrown all his medicine out of the window, than that he had sent word to his apothecary to leave out two of its three ingredients, so I

John Ruskin's Labour P. D. Anthony, 1983 John Ruskin was one of the great Victorians established while still young as an arbiter of taste in painting and architecture and as one of the greatest of all writers of English prose When he was forty he decided to abandon the field in which his reputation had been secured in order to awaken the world to the peril of devastation which he believed would follow its preoccupation with profit and its subservience to a false economic doctrine He regarded his social criticism as a duty reluctantly accepted to a society which had abandoned the traditional and religious values that had been the foundation of its civilization Ruskin's labour to which he devoted the rest of his life was to bring a searching intelligence considerable learning and a moral concern to providing a ruthless criticism of the values of Victorian England

Building Ruskin's Italy Stephen Kite, 2017-07-05 Based on extensive fieldwork and research into John Ruskin's still little interpreted archival material notebooks and drawings in the Ruskin Library Lancaster University UK and elsewhere Stephen Kite offers an unprecedented account of the evolution of Ruskin's architectural thinking and observation in the context of Italy where his watching of building achieved its greatest intensity Venice naturally figures large in a work that also examines other key sites including Verona Lucca Pisa Florence Milan and Monza here the fabrics are vividly read in their contexts against the rich evidence of Ruskin's diaries his pocket book sketches architectural worksheets drawings and daguerrotypes the early form of photography and the drafts and published editions of the texts Kite presents the complex story of Ruskin's visual thinking in architecture as a narrative of deepening interpretation and representation focusing on the humbler monuments of Italy He shows how Ruskin's early picturesque naturalism was transformed by the realisation that to understand the built realities confronting him in Italy demanded a closer engagement with the substance of the stones themselves reflecting Ruskin's sense of his task as a near archaeological gleaning and gathering of remains hidden in many a grass grown court and silent pathway and lightless canal

Cities Built to Music Michael Bright, 1984 In August of 1861 a congress was convened in Antwerp to consider why it was that the nineteenth century had adopted no distinctive architectural style as its own That such a meeting took place is of substantially greater importance than any business conducted and resolutions passed by the delegates for it suggests the profound dissatisfaction with the state of architecture in Europe that pervaded the continent at the time In England the chief critic of the motley assortment of disharmonious styles was A W N Pugin who in 1843 declared that architecture along with the other arts was passing through a transitional state the phrase was to recur over and over again throughout the century in a variety of contexts an aesthetic wasteland in which following the decay of the Renaissance an anarchic individualism fueled by a runaway eclecticism and a shoddy reliance on shams and disguises was ultimately to prevail Later in the same decade John Ruskin was to propose a stringent indeed a radical reform Professor Bright undertakes an etiological explanation of why the Gothic style was able to satisfy the artistic expectations of the Victorians He dismisses as only partly adequate the frequently offered answers the religious which points to the intimate relations between Revivalist architects and the Ecclesiologists and between Pugin and Roman Catholicism and the literary which relies on the immense popularity of the

novels of Sir Walter Scott and the mania for all things medieval they inspired Rather he finds in the return to a style that was dominant before the Renaissance and in the rejection of the nineteenth century's earlier preference for the neoclassical a reflection in architecture of the generally troubled state of Victorian society so apparent in the other arts of the period Matthew Arnold's ignorant armies clash by night and Tennyson's Arthur saw not whom he fought in the dim weird battle of the west John Stuart Mills identifies as the first of the leading peculiarities of the present age that it is an age of transition Mankind have outgrown old institutions and old doctrines and have not acquired new ones Carlyle laments The Old has passed away but alas the New appears not in its stead Restlessness uncertainty and confusion abound and the idea is often repeated throughout the century that the momentum of change far from slowing to the settled condition from which new and universal values can emerge continues to accelerate at an alarming and vertiginous rate that cause Thomas Arnold to comment that we have been living as it were the life of three hundred years in thirty and that left his son twenty years later Wandering between two worlds one dead The other powerless to be born For Matthew Arnold it was culture that would provide the unity the Scholar Gypsy's one aim one business one desire that was to be the cure for this strange disease of modern life With its sick hurry its divided aims It was unity too a singleness of aim of a devotion to and community of effort in the advancement of art that Sir George Gilbert Scott urged as its president on his colleagues in the Institute of British Architects For Pugin and a host of other artists and critics of art and society unity lay in revival of the Gothic

Catholic Converts Patrick Allitt, 2018-08-06 From the early nineteenth to the mid twentieth century an impressive group of English speaking intellectuals converted to Catholicism Outspoken and gifted they intended to show the fallacies of religious skeptics and place Catholicism once again at the center of western intellectual life The lives of individual converts such as John Henry Newman G K Chesterton Thomas Merton and Dorothy Day have been well documented but Patrick Allitt has written the first account of converts collective impact on Catholic intellectual life His book is also the first to characterize the distinctive style of Catholicism they helped to create and the first to investigate the extensive contacts among Catholic convert writers in the United States and Britain Allitt explains how despite the Church's dogmatic style and hierarchical structure converts working in the areas of history science literature and philosophy maintained that Catholicism was intellectually liberating British and American converts followed each other's progress closely visiting each other and sending work back and forth across the Atlantic The outcome of their labors was not what the converts had hoped Although they influenced the Catholic Church for three or four generations they were unable to restore it to the central place in Western intellectual life that it had enjoyed before the Reformation
