Mid-Century Modernism and the American Body Kristina Wilson,2021-04-13 The first investigation of how race and gender shaped the presentation and marketing of Modernist decor in postwar America In the world of interior design mid century Modernism has left an indelible mark still seen and felt today in countless open concept floor plans and spare geometric furnishings Yet despite our continued fascination we rarely consider how this iconic design sensibility was marketed to the diverse audiences of its era Examining advice manuals advertisements in Life and Ebony furniture art and more Mid Century Modernism and the American Body offers a powerful new look at how codes of race gender and identity influenced and were influenced by Modern design and shaped its presentation to consumers Taking us to the booming suburban landscape of postwar America Kristina Wilson demonstrates that the ideals defined by popular Modernist furnishings were far from neutral or race blind Advertisers offered this aesthetic to White audiences as a solution for keeping dirt and outsiders at bay an approach that reinforced middle class White privilege By contrast media arenas such as Ebony

magazine presented African American readers with an image of Modernism as a style of comfort security and social confidence Wilson shows how etiquette and home decorating manuals served to control women by associating them with the domestic sphere and she considers how furniture by George Nelson and Charles and Ray Eames as well as smaller scale decorative accessories empowered some users even while constraining others A striking counter narrative to conventional histories of design Mid Century Modernism and the American Body unveils fresh perspectives on one of the most distinctive movements in American visual culture **Russel Wright, Good Design is for Everyone** Russel Wright,2001

Founders of American Industrial Design Carroll Gantz,2014-07-15 As the Great Depression started in 1929 several dozen creative individuals from a variety of artistic fields including theatre advertising graphics fashion and furniture design pioneered a new profession Responding to unprecedented public and industry demand for new styles these artists entered the industrial world during what was called the Machine Age to introduce modern design to the external appearance and form of mass produced functional mechanical consumer products formerly not considered art The popular designs by these machine designers increased sales and profits dramatically for manufacturers which helped the economy to recover established a new profession industrial design and within a decade changed American products from mechanical monstrosities into sleek modern forms expressive of the future This book is about those industrial designers and how they founded developed educated and organized today s profession of more than 50 000 practitioners **American Design in the Twentieth Century** Gregory Votolato,1998 Author Greg Votolato presents the intricate story of how design evolved as a profession and a leisure activity Votolato demonstrates that design in affluent American culture is as much about personalization of the material world as it is about the performance and appearance of manufactured goods 114 illustrations

Interior Design Innovators 1910-1960 Cherie Fehrman,Kenneth Fehrman,2009-10 A scholarly review of the prominent designers and designs from 1910 1960 covering the Organic Design Movement methods and materials of construction and in depth measurements with hundreds of archival photographs **Twentieth Century Design** Jonathan M. Woodham,1997-04-10 A look at the wider issues of design and industrial culture throughout Europe Scandinavia North America and the Far East The book explores the way in which 20th century designs such as the Coca Cola bottle have affected our culture more than those considered true classics **Mid-Century Modern Interiors** Lucinda Kaukas Havenhand,2019-01-24 Mid Century Modern Interiors explores the history of interior design during arguably its most iconic and influential period The 1930s to the 1960s in the United States was a key moment for interior design It not only saw the emergence of some of interior design s most globally important designers it also saw the field of interior design emerge at last as a profession in its own right Through a series of detailed case studies this book introduces the key practitioners of the period world renowned designers including Ray and Charles Eames Richard Neutra and George Nelson and examines how they developed new approaches by applying systematic and rational principles to the creation of interior spaces It takes us

into the mind of the designer to show how they each used interior design to express their varied theoretical interests and reveals how the principles they developed have become embodied in the way interior design is practiced today This focus on unearthing the underlying ideas and concepts behind their designs rather than on the finished results creates a richer more conceptual understanding of this pivotal period in modernist design history With an extended introduction setting the case studies within the broader context of twentieth century design and architectural history this book provides both an introduction and an in depth analysis for students and scholars of interior design architecture and design history

A History of Interior Design John F. Pile, 2005 Delivers the inside story on 6 000 years of personal and public space John Pile acknowledges that interior design is a field with unclear boundaries in which construction architecture the arts and crafts technology and product design all overlap

Design in the USA Jeffrey L. Meikle, 2005-07-28 From the Cadillac to the Apple Mac the skyscraper to the Tiffany lamp the world in which we live has been profoundly influenced for over a century by the work of American designers But the product is only the end of a story that is full of fascinating questions What has been the social and cultural role of design in American society To produce useful things that consumers need Or to persuade them to buy things they don't need Where does the designer stand in all of this And how has the role of design in America changed over time since the early days of the young Republic Jeffrey Meikle explores the history of American design from the hand crafted furniture and artifacts of the early nineteenth century through the era of industrialization and the mass production of the machine age to the information based society of the present covering everything from the Arts and Crafts movement to Art Deco modernism to post modernism the MOMA to the Tupperware bowl Beautifully illustrated *Design in the USA* also includes suggestions for further reading a timeline and a list of relevant museums and web sites It is an excellent source of information for anyone seeking to uncover the imagination and industry behind American design

Modern in the Middle Susan Benjamin, Michelangelo Sabatino, 2020-09-01 The first survey of the classic twentieth century houses that defined American Midwestern modernism Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence *Modern in the Middle Chicago Houses 1929-75* explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schweikher Harry Weese Keck Keck and William Pereira From the bold early example of the Battledock House by Henry Dubin 1930 to John Vinci and Lawrence Kenny's gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They

also reveal how residential clients typically middle class professionals progressive in their thinking helped to trailblaze modern architecture in America Though reflecting different approaches to site space structure and materials the examples in *Modern in the Middle* reveal an abundance of astonishing houses that have never been collected into one study until now

The American Design Adventure, 1940-1975 Arthur J. Pulos, 1988 *The American Design Adventure* continues the fascinating and detailed examination of industrial design begun by Arthur Pulos in *American Design Ethic* The first volume discussed and illustrated the objects and artifacts the major designers and schools of design from Colonial times to the 1940s This second splendidly illustrated volume carries the story into the heroic era of American industrial design from the 1940s to the 1970s These were the decades of American industrial design's dominance when special exhibitions and world fairs made design a subject of national pride Big business realized the influence that trademarks packaging and corporate identity programs could have on their bottom line and the world of fashion created a consumer demand for name brands and well designed products Industrial design flourished under the capable hands of Raymond Loewy and Charles Eames while corporations like IBM RCA Herman Miller and Knoll were sponsors of the great American design adventure The extraordinary collection of illustrations that Pulos has assembled documents all of these important design trends while evoking the nostalgia of the 50s and 60s when Pop and Rock held sway Pulos probes all aspects of industrial designers and their work in education and private corporations in professional organizations and governmental agencies He also covers prefabricated housing graphics manufactured products from the exotic to the pragmatic and public systems from the sociopolitical to the economic

Modern Asian Design D.J. Huppatz, 2018-02-22 *Modern Asian Design* provides a comprehensive introduction to the development of Asian design in the modern period both tracing historical threads and offering a theoretical framework within which to chart the history of design in Asia Rather than a singular Asian history this book presents a series of studies centred on trade routes colonial relationships regional networks and cross cultural exchanges *Modern Asian Design* builds on existing resources beyond design history in an effort to map the field focusing particularly on relations between Asia and the West and also across Asian design cultures Opening with a brief overview of trade and exchange networks in the 17th and 18th centuries the bulk of this study comprises analysis of the development of modern design in Asia during the later 19th and early 20th centuries a period of rapid modernisation The book's final two chapters bring these central ideas into a contemporary and highly relevant context

World War II and the American Dream Margaret Crawford, 1995 with essays by Peter S Reed Robert Friedel Margaret Crawford Greg Hise Joel Davidson and Michael Sorkin Among the legacies of World War II was a massive building program on a scale that America had not seen before and has not seen since The war effort created thousands of factories homes even entire cities throughout the country Many of these structures still stand the physical evidence of an unprecedented ability to harness the power and resources of a people The complex legacy of this most notable period in our nation's history is discussed from a different perspective by

each contributor Peter S Reed Associate Curator of the Department of Architecture and Design at the Museum of Modern Art details the rise of modern architecture during the war housing designs that used the latest ideas in prefabricated construction methods lightweight materials innovative technologies and a corporate and institutional aesthetic that helped popularize modernism as the appropriate image of American industrial might and corporate success Robert Friedel Professor of History at the University of Maryland documents the development of new materials especially plastics and discusses techniques for employing traditional materials in novel ways Margaret Crawford Chair of the History and Theory of Architecture Program at the Southern California Institute of Architecture explores the struggle of women and blacks for public housing Greg Hise Assistant Professor in the School of Urban and Regional Planning at the University of Southern California considers how the construction of large scale residential communities near defense plants prefigured postwar suburbia Joel Davidson historian of the World War II and the American Dream exhibition analyzes the impact of the war's building program on the postwar military industrial complex Finally Michael Sorkin architect and writer explores the migration of certain values and aesthetics from the necessities of war to the choices of peace Among these are images of speed camouflage ruin totalization and flight Copublished with The National Building Museum Washington D C

Design, Craft, and American Identity Dianne O. Pierce, 2010 In 1939 in the significant moment just before the involvement of the United States in World War II influential and successful industrial designer Russel Wright conceived a project intended to engage fellow designers craftspeople manufacturers and key department stores in a mission to secure the pre eminence of American design for a national audience The American Way project as Wright called it brought together craft and industry in the design of objects for middle class Americans homes It was an ambitious marketing scheme but far more than that the American Way project was a philosophy of American ness in design when the country was struggling to define itself in all arenas Almost forty designers including Gilbert Rohde Marianne Strengell Raymond Loewy and Wright himself as well as some thirty six prominent craftspeople joined to take American design into every aspect of the domestic interior The venture brought issues of meaning and moral intent such as Modernism's implications for everyday Americans the primacy of native design and the necessity of good design for all to the American consumer Further American Way sought to combine the machine and the hand in an effort to coalesce these two polarities of the industrialized world This paper examines the ideas and objects of the American Way project for what they express about America's mid century cultural and design contexts Situating the project within the career and ideological framework of Russel Wright the paper examines the structure and intent of the American Way program analyzes a representative sample of its designs and details its outcomes Building on previous scholarship on Russel Wright's prolific industrial design career this paper examines the American Way project as a tangible expression of Wright's ideas about native American design American mid century lifestyle and good design for all of the buying public It further places the American Way project at the center of significant movements in design in the pre

World War II period **The Politics of Vietnamese Craft** Jennifer Way, 2019-10-03 Jennifer Way's study *The Politics of Vietnamese Craft* uncovers a little known chapter in the history of American cultural diplomacy in which Vietnamese craft production was encouraged and shaped by the US State Department as an object for consumption by middle class America. Way explores how American business and commerce department stores, the art world and national museums variously guided the marketing and meanings of Vietnamese craft in order to advance American diplomatic and domestic interests. Conversely, American uses of Vietnamese craft provide an example of how the United States aimed to absorb post colonial South Vietnam into the Free World in a Cold War context of American anxiety about communism spreading throughout Southeast Asia. Way focuses in particular on the part played by the renowned American designer Russel Wright, contracted by the US International Cooperation Administration's aid programs for South Vietnam to survey the craft industry in South Vietnam and manage its production, distribution and consumption abroad and at home. Way shows how Wright and his staff brought American ideas about Vietnamese history and culture to bear in managing the making of Vietnamese craft.
