The End of Peasantry? Grigory Ioffe, Tatyana Nefedova, Ilya Zaslavsky, 2006-10-19 The End of Peasantry examines the dramatic recent decline of agriculture in post Soviet Russia Historically Russian farmers have encountered difficulties relating to the sheer abundance of land the vast distances between population centers and harsh environmental conditions More recently the drastic depopulation of rural spaces decreases in sown acreage and overall inefficiency of land usage have resulted in the disruption and spatial fragmentation of the countryside For many decades rural migration has been a selective process resulting in the most enterprising and self motivated people leaving the rural periphery The new agricultural operators representing nascent but aggressive Russian agribusiness have difficulty co-opting traditional rural communities afflicted by profound social dysfunction The contrast between agriculture in proximity to large cities and in their hinterlands is as sharp as ever and some vacant niches are increasingly occupied by ethnically non Russian migrants All of these conditions existed to some degree in pre Soviet times but they have been exacerbated since Russia took steps toward a market economy Understudied and often underestimated in the West the crisis facing Russian agriculture has profound implications for the political and economic stability of Russia The authors see hope in the significant increase in land use intensity on vastly diminished farmland The lessons gathered from this thoroughly researched study are far reaching and relevant to the disciplines of Slavic and European studies agriculture political science economics and human geography

Oldfield, 2017-03-02 Jonathan D Oldfield provides a detailed assessment of the changing relationship between Russian society and the wider environment since the fall of the Soviet Union Through this he highlights the need to critically evaluate assumptions regarding the post Soviet environment in order to move beyond generalization and engage meaningfully with the particularities of Russia's contemporary environmental situation The book begins by focusing on the nature of Soviet environmental legacies as a necessary backdrop to the remainder of the study This is

followed by a general examination of the relationship between economic change and pollution output during the course of the 1990s Further chapters provide in depth analysis of recent legislative and policy developments in the area of environmental protection and an exploration of emerging pollution and environmental quality trends at both the national and regional level In addition the book highlights pressures that are related to Russia s engagement with the global economy [A Geography of Russia and Its Neighbors](#) Mikhail S. Lynch,2005-01-10 The state remains as important to Russia s prospects as ever This is so not

only because as in any society an effectively functioning state administration is necessary to the proper functioning of a complex economy and legal system but also because in Russian circumstances factors of economic geography tend to increase costs of production compared to the rest of the world. These mutually reinforcing factors include the extreme severity of the climate, the immense distances to be covered, the dislocation between European population centers and Siberian natural resource centers, and the inevitable predominance of relatively costly land transportation over sea borne transportation. As a result, it is questionable whether Russia can exist as a world civilization under predominantly liberal economic circumstances in a unified liberal global capital market. Large scale private direct capital investment will not be directed to massive outdoor infrastructure projects typical of state investment in the Soviet period. *Human Geography* Erin Hogan Fouberg, Alexander B. Murphy, Harm J. De Blij, 2015

Small-Town Russia Anne White, 2004-08-12 This book examines a number of key questions about social change in contemporary Russia: issues such as how people survive when they are not paid for months on end, the New Poor, the falling birth rate, why so many Russian men die in middle age, whether regional identities are becoming stronger, and how people's sense of Russianness has developed since the creation of the Russian Federation in 1992. It examines these issues by looking at actual experiences in three small Russian towns. It includes a great deal of original ethnographic research and by looking at real places overall provides a good sense of how different aspects of social change are interlinked and how they actually affect real people's lives. **The Russian Far East** Josh Newell, 2004 In this expansion of the 1996 edition titled *The Russian Far East: Forests, Biodiversity, Hotspots, and Industrial Developments*, Newell, who works for Friends of the Earth Japan, the volume co-sponsor offers a starting point toward sustainable development as a new section is called of the res. *The New Russia* Lawrence R. Klein, Marshall I. Pomer, 2001 This work delivers the unpopular message that the West has played a pivotal role in the Russian economic disaster of the 1990s. The 26 contributions to this book examine this topic which is divided into three parts: theory, evidence, and policy.
