Seven Centuries Of Irish Learning 1000 17:

Ireland and Medicine in the Seventeenth and Eighteenth Centuries James Kelly, 2016-05-06 The story of early modern medicine with its extremes of scientific brilliance and barbaric practice has long held a fascination for scholars The great discoveries of Harvey and Jenner sit incongruously with the persistence of Galenic theory superstition and blood letting Yet despite continued research into the period as a whole most work has focussed on the metropolitan centres of England Scotland and France ignoring the huge range of national and regional practice This collection aims to go some way to rectifying this situation providing an exploration of the changes and developments in medicine as practised in Ireland and by Irish physicians studying and working abroad during the seventeenth and eighteenth centuries Bringing together research undertaken into the neglected area of Irish medical and social history across a variety of disciplines including history of medicine Colonial Latin American history Irish and French history it builds upon ground breaking work recently published by several of the contributors thereby augmenting our understanding of the role of medicine within early modern Irish society and its broader scientific and intellectual networks By addressing fundamental issues that reach beyond the medical institutions the collection expands our understanding of Irish medicine and throws new light on medical practices and the broader cultural and social issues of early modern Ireland Europe and Latin America Taking a variety of approaches and sources ranging from the use of epistolary exchange to the study of medical receipt books legislative practice to belief in miracles local professionalization to international networks each essay offers a fascinating insight into a still largely neglected area Furthermore the collection argues for the importance of widening current research to consider the importance and impact of early Irish medical traditions networks and practices and their interaction with related issues such as politics gender economic demand and religious belief [Late Medieval Irish Law Manuscripts: A Reappraisal of Methodology and Content](#) Rowena Finnane, 2023-09-25 Late Medieval Irish Law Manuscripts A Reappraisal of Methodology and Context challenges the long held view that Irish law manuscripts produced in the secular law schools of the late medieval period are only the work of antiquarians This book examines the texts in their political social and cultural contexts particularly in relation to the Irish revival of the fourteenth century onwards Finnane s examination of the manuscripts includes legal interpretation and the role of glossing and commenting on older canonical texts in establishing the authority of those texts in the present the use of the manuscripts in legal education the use of the past in providing legitimacy and authority particularly in a legal context Finnane argues that the manuscripts are the work of jurists authorising a revived legal system connected to a re emergent Irish political elite after more than a century of Anglo Norman invasion and rule
