Revival: Philosophy and the Physicists (1937) Lizzie Susan Stebbing, 2018-05-08 This book is written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories nor to decide what precisely are their implications We are dependent upon the scientists for an exposition of those developments which so we find them proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans They are not always reliable guides Their influence has been considerable upon the reading public upon theologians and upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon which these views are based

Science Fiction and Narrative Form David Roberts, Andrew Milner, Peter Murphy, 2023-02-23 Establishing science fiction as its own distinct and increasingly important narrative form this book explores how the genre challenges pervasive perceptions of society as they appear in the conventional modern novel Inspired by and building upon Georg Lukács's criticism of the orthodox novel for its depiction of life as alienating and disjointed Milner

Murphy and Roberts demonstrate that science fiction steps beyond this contemporary form to be a more constructive form of literature one able to conceive of society as complete integrated and well rounded Taking stock of three kinds of science fiction which lie outside the scope of the modern novel theological ontological science fiction the science fiction of future history and epic science fiction this book demonstrates the genre s unique capacity to encapsulate the whole world persons and events things and objects in a glance and address the motive behind the longing for meaningful totality With reference to a vast array of works by authors such as Michel Houellebecq Elias Canetti Isaac Asimov Jules Verne H G Wells Aldous Huxley Marge Piercy Iain M Banks Margaret Atwood Ursula K Le Guin William Gibson Dirk C Fleck Philip K Dick George Orwell and Kazuo Ishiguro this book offers a compelling argument for rethinking the position and potential of the science fiction novel and to challenge the way we perceive our culture
