**A Study in Scarlet** Arthur Conan Doyle, Sir, 2017-04-20 In the year 1878 I took my degree of Doctor of Medicine of the University of London and proceeded to Netley to go through the course prescribed for surgeons in the army Having completed my studies there I was duly attached to the Fifth Northumberland Fusiliers as Assistant Surgeon The regiment was stationed in India at the time and before I could join it the second Afghan war had broken out On landing at Bombay I learned that my corps had advanced through the passes and was already deep in the enemy's country I followed however with many other officers who were in the same situation as myself and succeeded in reaching Candahar in safety where I found my regiment and at once entered upon my new duties

**A Study in Scarlet** Arthur Conan Doyle, Sir, 2014-02-01 WHEN HOLMES MET WATSON This was a lofty chamber lined and littered with countless bottles Broad low tables were scattered about which bristled with retorts test tubes and little Bunsen lamps with their blue flickering flames There was only one student in the room who was bending over a distant table absorbed in his work At the sound of our steps he glanced round and sprang to his feet with a cry of pleasure I've found it I've found it he shouted to my companion running towards us with a test tube in his hand I have found a reagent which is precipitated by haemoglobin and by nothing else Had he discovered a gold mine greater delight could not have shone upon his features Dr Watson Mr Sherlock Holmes said Stamford introducing us How are you he said cordially gripping my hand with a strength for which I should hardly have given him credit You have been in Afghanistan I perceive How on earth did you know that I

asked in astonishment Never mind said he chuckling to himself The question now is about haemoglobin No doubt you see the significance of this discovery of mine It is interesting chemically no doubt I answered but practically Why man it is the most practical medico legal discovery for years Don t you see that it gives us an infallible test for blood stains Come over here now He seized me by the coat sleeve in his eagerness and drew me over to the table at which he had been working Let us have some fresh blood he said digging a long bodkin into his finger and drawing off the resulting drop of blood in a chemical pipette Now I add this small quantity of blood to a litre of water You perceive that the resulting mixture has the appearance of pure water The proportion of blood cannot be more than one in a million I have no doubt however that we shall be able to obtain the characteristic reaction As he spoke he threw into the vessel a few white crystals and then added some drops of a transparent fluid In an instant the contents assumed a dull mahogany colour and a brownish dust was precipitated to the bottom of the glass jar Ha ha he cried clapping his hands and looking as delighted as a child with a new toy What do you think of that It seems to be a very delicate test I remarked Beautiful beautiful The old Guaiacum test was very clumsy and uncertain So is the microscopic examination for blood corpuscles The latter is valueless if the stains are a few hours old Now this appears to act as well whether the blood is old or new Had this test been invented there are hundreds of men now walking the earth who would long ago have paid the penalty of their crimes Indeed I murmured Criminal cases are continually hinging upon that one point A man is suspected of a crime months perhaps after it has been committed His linen or clothes are examined and brownish stains discovered upon them Are they blood stains or mud stains or rust stains or fruit stains or what are they That is a question which has puzzled many an expert and why Because there was no reliable test Now we have the Sherlock Holmes test and there will no longer be any difficulty
