Television Variety Shows David M. Inman,2014-12-03 For the few hundred television viewers in 1946 a special treat on the broadcast schedule was the variety show called *Hour Glass* It was the first TV program to go beyond talking heads cooking demonstrations and sporting events featuring instead dancers comics singers and long commercials for its sponsor Chase and Sanborn coffee Within two years another variety show *Texaco Star Theatre* became the first true television hit and would

be credited with the sales of thousands of television sets The variety show formula was a staple of television in its first 30 years in part because it lent itself to a medium where everything had to be live and preferably inside a studio Most of the early television stars including Jackie Gleason Milton Berle Sid Caesar Ed Sullivan Red Skelton Dinah Shore and Arthur Godfrey rose to prominence through weekly variety shows In the 1960s major stars such as Jerry Lewis Dean Martin Judy Garland and Danny Kaye were hosting variety shows By the 1970s the format was giving way to sitcoms and dramas but pop music stars Sonny and Cher Tony Orlando and Dawn and Donny and Marie Osmond hosted some of the last of the species This book details 57 variety shows from the 1940s through the 1990s A history of each show is first provided followed by a brief look at each episode Air date guest stars sketches performed and a listing of songs featured are included [Origin of Species Revisited](#) Donald R. Forsdyke, 2001-10-09 The trail led first to Joseph Hooker and Thomas Huxley who had been both the theory's strongest supporters and its most penetrating critics and eventually to Darwin's young research associate the Victorian Georges Romanes and to the Victorian Edwardian William Bateson Although these men were well known their resolution of the origin of species paradox has either been ignored Romanes or ignored and reviled Bateson Four years after Darwin's death Romanes published a theory of the origin of species by means of physiological selection that resolved the inconsistencies in Darwin's theory and introduced the idea of a peculiarity of the reproductive system that allowed selective fertility between physiological complements Forsdyke argues that the chemical basis of the origin of species by physiological selection is actually the species dependent component of the base composition of DNA showing that Romanes thus anticipated modern biochemistry Using this new perspective Forsdyke considers some of the outstanding problems in biology and medicine including the question of how self is distinguished from not self by members of different species Finally he examines the political and ideological forces that led to Romanes' contribution to evolutionary biology which has remained unappreciated until now *The Living Age*, 1912 [Host Bibliographic Record for Boundwith Item Barcode 30112114734418 and Others](#), 1912
