Shifting Borders:

Shifting Borders Kent A. Ono, John M. Sloop, 2002 Like articles representing the positions of proponents of the measure those representing opponents construct the nation as potentially in danger as a result of undocumented immigration How do we learn to recognize the damning effects of good rhetorical intentions And where will we find arguments which escape this trap that permeates the liberal social policy world **Shifting Borders** uses an evaluation of the debate over California

Proposition 187 to demonstrate how this quandary is best understood by close interrogation of mainstream reports and debates and by bringing to the fore voices that are often left out of mediated discussions It is these voices outside the mainstream so called outlaw discourses that hold the best possibilities for real social change To illustrate their claim the authors present dominant and outlaw discourses around Proposition 187 from television reports internet chat sites and religious discourse to coverage of the Los Angeles Times Their critique ably demonstrates how difficult it is to maintain a position outside the mainstream but also how important it is for the press citizens and scholars to actively search out such voices The find

Shifting Borders Jean-François Bélisle, Reid Cooper, Luke Nicholson, 2021-02-19 **Shifting Borders** brings together new research on visual culture by scholars located across North America This compilation of essays explores the notion of borders in a range of domains including art history architecture art theory video games performance art artistic creation and photography The authors seek to address contemporary concerns affecting larger society through the lens of visual culture The world is becoming increasingly globalized as nations and multilateral organizations advocate freer international trade the sharing of technological and political ideas and multiculturalism Yet despite a rhetorical attachment to the message of lower national barriers there has been a concomitant rise in veiled borders These barriers promise to maintain cultural exclusion and economic hegemony The essays in this volume share a desire to re examine inherited knowledge systems to redefine the terms of debate and create spaces that more accurately reflect a just reality While this is not the unique purview of Postmodern ethics what is novel here is the willingness of the authors of these essays and the artists they investigate to identify with dwell in and expand upon the margins of their particular subject matter The essays presented in **Shifting Borders** have the force to open up new forms and understandings of cultural difference and initiate new perspectives in and beyond their respective domains

Shifting Borders Stefano Jacoviello, Tamaso Sbriccoli, 2012-12-19 In the last few decades creolisation has become a recurrent feature in the works of scholars from many disciplines serving as a useful metaphor for understanding contemporary societies in a world of globalisation More than a metaphor creolisation can be conceived as a powerful analytical and theoretical tool in order to grasp the current dynamics of intercultural encounter and conflict allowing a close look at the production of new subjectivities and identities In accordance with this viewpoint in this book creolisation processes have been investigated under the interdisciplinary gaze of a wide European research group which has tried to detect creole patterns in the fields of literature arts politics and the labour market as well

as in the daily practices of people who enact peculiar strategies in order to posit themselves in highly exclusive contexts By focusing on the multiplicity of shifting borders that today articulate the sense of daily life along multiple contiguous universes this collective work addresses problems of citizenship intercultural politics and difficult cohabitations starting from the analysis of their narratives and discursive representations This volume thus has much to say about moving and mixing in our times and shows in more ways how thinking about creolist and related notions can be very fruitful

The EU's Shifting Borders Klaus Bachmann, Elzbieta Stadtmuller, 2012-03-12 The EU's internal borders have become mostly invisible Today external borders are at the centre of controversy about an alleged fortress Europe Using different theoretical and methodological perspectives this book examines the challenges facing the EU's external borders including Neighborhood Policy migration issues and the diffusion of norms and values to other countries Divided into two parts the book first presents different theoretical approaches and empirical studies of the EU's external borders mobility and security issues It is an invaluable guide to border research within a framework of European Integration and Globalization Studies The second part of this volume focuses on the analyses of the EU's Neighbourhood Policy the approach to Eastern Europe and EU energy policy Expert contributors collaborate to explore debates about migration the EU as a normative civil power energy security and the securitization of borders Highly relevant and insightful the text provides a timely assessment of EU borders in an increasingly globalized and integrated European neighbourhood The EU's Shifting Borders will be of interest to students and scholars of European Union Politics and International Relations

EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion James Wesley Scott, 2016-04-22 The 2004 entry of 10 Central and Eastern European countries along with Malta and Cyprus into the EU has caused a huge shift in the EU's external boundaries The socio economic and political transformations that this shift has caused not only suggest new regional development opportunities but also many potential problems and tensions While the EU insists that enlargement will not signify new divisions processes of inclusion and exclusion and the imposition of visa restrictions on non EU citizens could pose obstacles to co operation conjuring fears of an emerging fortress Europe that effectively divides the continent Illustrated with case studies from Central and Eastern European border areas this book examines capacities for region building across national borders in within the context of EU enlargement synthesizing the various insights provided by local information and suggesting ways forward for the future development of the EU's Wider Europe strategy

Polarization, Shifting Borders and Liquid Governance Anja Mihr, Chiara Pierobon, 2023-12-26 This open access book explores the security dynamics amid the polarization shifting borders and liquid governance that define the Zeitenwende era in Europe's eastern neighbourhood and Central Asia Presenting various case studies the volume unveils the intricate web of border dynamics and practices including the nuanced interplay of border disputes within the Organization for Security and Cooperation in Europe OSCE member states The contributions shed new light on how contested borders and liquid modes of governance have impacted the engagement of international organizations

such as the European Union EU North Atlantic Treaty Organization NATO and OSCE in security crises and conflict prevention Delving deeper a special part dissects the ongoing Russia Ukraine conflict and examines European and international responses By analyzing the stances of diverse European countries their neighborhood and international organizations this section uncovers commonalities and disparities in their approaches to the Ukrainian crisis *The shifting border: Legal cartographies of migration and mobility* Ayelet Shachar, 2020-03-24 The border is one of the most urgent issues of our times We tend to think of a border as a static line but recent bordering techniques have broken away from the map as governments have developed legal tools to limit the rights of migrants before and after they enter a country's territory The consequent detachment of state power from any fixed geographical marker has created a new paradigm the shifting border an adjustable legal construct untethered in space This transformation upsets our assumptions about waning sovereignty while also revealing the limits of the populist push toward border fortification At the same time it presents a tremendous opportunity to rethink states responsibilities to migrants This book proposes a new functional approach to human mobility and access to membership in a world where borders like people have the capacity to move **Changing Borders in Europe** Jacint Jordana, Michael Keating, Axel Marx, Jan Wouters, 2018-12-21 Changing Borders in Europe focuses on the territorial dimension of the European Union It examines the transformation of state sovereignty within the EU the emergence of varied self determination claims and the existence of a tailor made architecture of functional borders established by multiple agreements This book helps to understand how self determination pressures within the EU are creating growing concerns about member states identity redefining multi level government in the European space It addresses several questions regarding two transformative processes blurring of EU borders and state sovereignty shifts and their interrelations from different disciplinary perspectives such as political science law political economy and sociology In addition it explores how the variable geographies of European borders may affect the issue of national self determination in Europe opening spaces for potential accommodations that could be compatible with existing states and legal frameworks This book will be of key interest for scholars students and practitioners of EU politics public administration political theory federalism and more broadly of European studies international law ethnic studies political economy and the wider social sciences *Shifting Borders* Emily Butterworth, Kathryn Robson, 2001 This volume containing selected papers from a conference held by the Department of French in the University of Cambridge in 1999 addresses the exciting and challenging figure of the shifting border in modern French literature and literary theory Using a variety of critical approaches the contributors map the fluctuating borders in specific literary texts and explore how these moving boundaries reflect on their practice of literary analysis Inspired by the ideas of European and American thinkers including Giorgio Agamben Jacques Derrida Julia Kristeva Jacques Lacan and Jean Fran ois Lyotard they consider three major areas of current concern the construction of identity the conceptualisation of literary genres and the demarcation of geographical and cultural domains Applying their insights to a

wide ranging corpus of francophone texts this volume analyses the work both of canonical figures such as Mallarmé Proust and Zola and of lesser known writers such as Aimé Césaire Assia Djebar and St John Perse

Migrating borders and moving times Hastings Donnan, Madeleine Hurd, Carolin Leutloff-Grandits, 2017-04-21 This electronic version has been made available under a Creative Commons BY NC ND open access license Migrating borders and moving times analyses migrant border crossings in relation to their everyday experiences of time and connects these to wider social and political structures Sometimes border crossing takes no more than a moment sometimes hours some crossers find themselves in the limbo of detention for others the crossing lasts a lifetime to be interrupted only by death Borders not only define separate spaces but different temporalities This book provides both a single interpretative frame and a novel approach to border crossing an analysis of the reconfiguration of memory personal and group time that follows the migrants renegotiation of cross border space and recalibrations of temporality

Unbounded Loyalty Naomi Standen, 2006-12-31 Unbounded Loyalty investigates how frontiers worked before the modern nation state was invented The perspective is that of the people in the borderlands who shifted their allegiance from the post Tang regimes in North China to the new Liao empire 907-1125 Naomi Standen offers new ways of thinking about borders loyalty and identity in premodern China She takes as her starting point the recognition that at the time China did not exist as a coherent entity neither politically nor geographically neither ethnically nor ideologically Political borders were not the fixed geographical divisions of the modern world but a function of relationships between leaders and followers When local leaders changed allegiance the borderline moved with them Cultural identity did not determine people's actions Ethnicity did not exist In this context she argues collaboration resistance and accommodation were not meaningful concepts and tenth century understandings of loyalty were broad and various Unbounded Loyalty sheds fresh light on the Tang Song transition by focusing on the much neglected tenth century and by treating the Liao as the preeminent Tang successor state It fills several important gaps in scholarship on premodern China as well as uncovering new questions regarding the early modern period It will be regarded as critically important to all scholars of the Tang Liao Five Dynasties and Song periods and will be read widely by those working on Chinese history from the Han to the Qing

Canada's Fluid Borders Geoffrey Hale, Greg Anderson, 2021-01-05 Trade and investment policies face a changing geopolitical environment They also face challenges from the interactions and limits of Canada's multiple trade agreements with other countries These challenges take on varied forms in different sectors that involve the bordering of energy trade food safety and related environmental and public health issues Similarly bordering dynamics differ significantly for cross border flows of tourism skilled labour and irregular migration This book uncovers and analyzes factors that govern economic activity and human interaction across Canada's fluid border The contributors to this collection engage major domestic political technical and administrative factors that shape the conditions for and constraints on effective international policy and regulatory cooperation Published in English **Borders on the Move** Leslie Waters, 2020 An examination of territorial changes between Czechoslovakia and Hungary and their effects on the local populations of the borderlands in the World War II era **Borders, Mobility and Technologies of Control** Sharon Pickering, Leanne Weber, 2006-09-08 Territorial borders are taking on a new significance the implications of which are relatively unexplored within the discipline of criminology This book presents the first systematic attempt to develop a critical criminology of the border and offers a unique treatment of the impact of globalisation and mobility It focuses on borders and the significance of the activities which take place on and around them For many the border is an everyday reality a space in which to live a land necessary to cross For states the border space increasingly requires protection and defence is at the centre of state ideology and performance is the site for investing significant political and material resources and is ultimately ungovernable Providing a wealth of case material from Australia Europe and North America it is for students academics and practitioners working in the areas of criminology migration human geography international law and politics globalisation sociology and cultural anthropology **Borders Mobility and Technologies of Control** provides a model of criminological inquiry that is global in scope constructionist in vision and capable of combining the insights of dialogic and political economic analyses into a holistic understanding of the growing conflict between nation states and multitudes This book is an important new step forward for all those who approach criminology not as an adjunct to state control but as sociological inquiry in pursuit of human justice Dr Raymond Michalowski Arizona Regents Professor Northern Arizona University USA **Borders mobility and technologies of control** is a radical exploration of new terrain in transnational and comparative criminology Crossing disciplinary boundaries this collection

charts new forms of transgression and control in the borderlands raising new theoretical questions and topics for research Ben Bowling Professor of Criminology Criminal Justice King s College London Critical Border Studies Noel Parker, Nick Vaughan-Williams, 2016-03-23 This edited collection formalises Critical Border Studies CBS as a distinctive approach within the interdisciplinary border studies literature Although CBS represents a heterogeneous assemblage of thought the hallmark of the approach is a basic dissatisfaction with the Line in the Sand metaphor as an unexamined starting point for the study of borders A headline feature of each contribution gathered here is a concerted effort to decentre the border By decentring we mean an effort to problematise the border not as taken for granted entity but precisely as a site of investigation On this view the border is not something that straightforwardly presents itself in an unmediated way It is never simply present nor fully established nor obviously accessible Rather it is manifold and in a constant state of becoming Empirically contributors examine the changing nature of the border in a range of cases including the Arctic Circle German Dutch borderlands the India Pakistan region and the Mediterranean Sea Theoretically chapters draw on a range of critical thinkers in support of a new paradigm for border research The volume will be of particular interest to border studies scholars in anthropology human geography international relations and political science Critical Border Studies was published as a special issue of Geopolitics

British Columbia's Borders in Globalization Nicole Bates-Eamer, Helga Kristín Hallgrímsdóttir, 2021-11-24 This book is a case study collection examining the influences and functions of British Columbia s BC borders in the 21st century British Columbia s Borders in Globalization examines bordering processes and the causes and effects of borders in the Cascadian region from the perspective of BC The chapters cover diverse topics including historical border disputes and cannabis culture and identity the governance of transboundary water flows migration and preclearance policies for goods and people and the emerging issue of online communities The case studies provide examples that highlight the simultaneous but contradictory trends regarding borders in BC while boundaries and bordering processes at the external borders shift away from the territorial boundary lines self determination local politics and cultural identities re inscribe internal boundaries and borders that are both virtual and real Moreover economic protectionism racial discourses and xenophobic narratives driven by advances in technology reinforce the territorial dimensions of borders These case studies contribute to the literature challenging the notion that territorial borders are sufficient for understanding how borders function in BC and in a few instances they illustrate the nuanced ways in which borders or bordering processes are becoming detached from territory The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies **Border Conflicts** Michael Davis, AI, 2025-03-21 Border Conflicts explores the enduring significance of territorial disputes in shaping international relations and national identities The book examines how lines on a map become deeply intertwined with a nation s sense of self often rooted in historical grievances and political maneuvering Many current border conflicts stem from the legacy of colonialism where arbitrary divisions disregarded existing cultural and ethnic boundaries These divisions

created lasting tensions over resources influence and sovereignty making them worth fighting for and shaping today's geopolitics. The book adopts a structured approach beginning with fundamental concepts such as territoriality and nationalism. It then delves into specific historical and contemporary border conflicts across Europe, Africa, Asia, and the Americas, illustrating the diverse factors at play. By synthesizing these case studies, *Border Conflicts* identifies common patterns and underlying drivers such as ethnic conflicts and power imbalances. Ultimately, the work proposes potential solutions and strategies for conflict resolution, emphasizing diplomacy and international law to offer practical insights into the complexities of international relations.

Dr Nick Vaughan Williams, University of Warwick This impressive collection will have a broad appeal beyond specialist border studies. Anyone with an interest in the nation-state, nationalism, ethnicity, political geography, or indeed the whole historical project of the modern world system will want to have access to a copy. The substantive scope is global and the intellectual reach deep and wide. Simply indispensable. Richard Jenkins, University of Sheffield Dramatic growth in the number of international borders has coincided in recent years with greater mobility than ever before of goods, people, and ideas. As a result, interest in borders as a focus of academic study has developed into a dynamic, multi-disciplinary field embracing perspectives from anthropology, development studies, geography, history, political science, and sociology. Authors provide a comprehensive examination of key characteristics of borders and frontiers, including cross-border cooperation, security and controls, migration, and population displacements, hybridity, and transnationalism. *A Companion to Border Studies* brings together these disciplines and viewpoints through the writing of an international collection of preeminent border scholars. Drawing on research from Africa, Asia, the Middle East, Europe, and the Americas, the contributors argue that the future of Border Studies lies within such diverse collaborations, which approach comparatively the features of borders worldwide.
