Lahyani, Architects Associates, Berlin, Shin Takamatsu, Architect Associates, Kyoto Aedes, Galerie für Architektur und Raum, Shin Takamatsu Architect and Associates, Takamatsu + Lahyani Architects Associates, 1994* Responding to Chaos David N Buck, 2014-04-04 A celebration of a unique culture and its experience of design this sensitive text is a timely examination of Japanese design at the start of a new century The country's economic boom in the 1980s produced a surge of interest in land and building and consequently in design in all its forms From restaurant interiors to products from private housing to recreational spaces design received an unprecedented degree of attention However the bursting in the early 1990s of this so called bubble economy has prompted a re examination of design and its role in urban society **GA architect, 09; Shin Takamatsu**, *Shin Takamatsu* David B. Stuart, Shin Takamatsu, Kyoto Municipal Museum of Art!241547415!, Tokyo Station Gallery!128313706!, 1995 **Shin Takamatsu** Yukio Futagawa, 1990 Works Shin Takamatsu, 1984 Shin Takamatsu Shin Takamatsu, Paolo Polledri, 1993 Briefly describes the career of the Japanese architect and shows examples of his designs for office buildings stores and homes 木村 浩一, 1993 *Wood Architecture* Ruth Slavid, 2005 Timber is having a renaissance as an architectural material as more architects come to understand its properties and enjoy adding it to their repertoire of materials With a growing crop of good new timber buildings architects are coming to realise that this is no longer the sole preserve of the traditionalist but a material that has an important role to play in the contemporary world The book's introduction examines the ways in which a raw material of diminishing quality but abundant quantity can be stretched to perform as it has never done before using new technology and careful detailing The 40 case studies are devoted to some of the most interesting new wood projects from around the world The projects are grouped in seven themed chapters Featured architects from around the world include Steven Holl Foster and Partners Rural Studio Renzo Piano and Shigeru Ban **Shinkenichiku**, 2000 Architecture for a Free Subjectivity Dr Simone Brott, 2013-06-28 Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze's model of subjectivity for architecture by surveying the prolific effects of architectural encounter and the spaces that figure in them For Deleuze and his Lacanian collaborator Félix Guattari subjectivity does not refer to a person but to the potential for and event of matter becoming subject and the myriad ways for this to take place By extension this book theorizes architecture as a self actuating or creative agency for the liberation of purely impersonal effects Imagine a chemical reaction a riot in the banlieues indeed a

walk through a city Simone Brott declares that the architectural object does not merely take part in the production of subjectivity but that it constitutes its own This book is to date the only attempt to develop Deleuze's philosophy of subjectivity in singularly architectural terms Through a screening of modern and postmodern American and European works this provocative volume draws the reader into a close encounter with architectural interiors film scenes and other arrangements while interrogating the discourses of subjectivity surrounding them and the evacuation of the subject in the contemporary discussion The impersonal effects of architecture radically changes the methodology just as it reimagines architectural subjectivity for the twenty first century

The Armageddon of Architecture and Design Anthony Sully, 2022-10-21 This book examines why there is a lack of humanity in current architecture that produces such ghastly environmental errors It brings together a selective study of past historical styles and works of art since primitive times in order to understand how the evolution of design was broken in the 20th century Current ideologies and philosophies of the day are examined to ascertain those elements which fuelled a modern architecture that is lacking in humanity and agreeable contextual co-existence with our inherited communities It shows that the complex effervescence of evolutionary life with its joy communal celebratory nature and constructive creative urges is vulnerable from attack by these stronger alien forces of elimination and reductionism because their actions are by nature aggressive and dictatorially dominant This book will appeal to all those academics and professional stakeholders who care for the environment and wish to see more positive changes
