Colour Rudolf Steiner, 2013-04-03 Building on the achievements of Goethe in his Theory of Colour Rudolf Steiner shows how colour affects us in many areas of life including our health our sense of well being and our feelings Distinguishing between image and lustre colours he lays the foundation based on his spiritual scientific research for a practical technique of working with colour that leads to a new direction in artistic creativity His many penetrating remarks on some of the great painters of the past are supplemented by a deep concern to see a cultural spiritual renewal emerge in

the present time If you realize he states that art always has a relation to the spirit you will understand that both in creating and appreciating it art is something through which one enters the spiritual world This volume is the most comprehensive compilation of Rudolf Steiner's insights into the nature of colour painting and artistic creation It is an invaluable source of reference and study not only for artists and therapists but for anyone interested in gaining an appreciation of art as a revelation of spiritual realities

Handbook of Research on Using Educational Robotics to Facilitate Student Learning Papadakis, Stamatios, Kalogiannakis, Michail, 2020-12-05 Over the last few years increasing attention has been focused on the development of children's acquisition of 21st century skills and digital competences Consequently many education scholars have argued that teaching technology to young children is vital in keeping up with 21st century employment patterns Technologies such as those that involve robotics or coding apps come at a time when the demand for computing jobs around the globe is at an all time high while its supply is at an all time low There is no doubt that coding with robotics is a wonderful tool for learners of all ages as it provides a catalyst to introduce them to computational thinking algorithmic thinking and project management Additionally recent studies argue that the use of a developmentally appropriate robotics curriculum can help to change negative stereotypes and ideas children may initially have about technology and engineering The Handbook of Research on Using Educational Robotics to Facilitate Student Learning is an edited book that advocates for a new approach to computational thinking and computing education with the use of educational robotics and coding apps The book argues that while learning about computing young people should also have opportunities to create with computing which have a direct impact on their lives and their communities It develops two key dimensions for understanding and developing educational experiences that support students in engaging in computational action 1 computational identity which shows the importance of young people's development of scientific identity for future STEM growth and 2 digital empowerment to instill the belief that they can put their computational identity into action in authentic and meaningful ways Covering subthemes including student competency and assessment programming education and teacher and mentor development this book is ideal for teachers instructional designers educational technology developers school administrators academicians researchers and students **I Want a Better Catastrophe** Andrew Boyd, 2023-02-14 An existential manual for tragic optimists can do pessimists and compassionate doomers WITH GLOBAL WARMING projected to rocket past the 1.5°C limit lifelong activist Andrew Boyd is thrown into a crisis of hope and off on a quest to learn how to live with the impossible news of our climate doom He searches out eight leading climate thinkers from collapse psychologist Jamey Hecht to grassroots strategist adrienne maree brown eco philosopher Joanna Macy and Indigenous botanist Robin Wall Kimmerer asking them Is it really the end of the world and if so

now what With gallows humor and a broken heart Boyd steers readers through their climate angst as he walks his own From storm battered coastlines to pipeline blockades and hopelessness workshops he maps out our existential options and tackles some familiar dilemmas Should I bring kids into such a world Can I lose hope when others can't afford to and Why the fuck am I recycling He finds answers that will surprise inspire and maybe even make you laugh in this insightful and irreverent guide for achieving a better catastrophe **AWARDS BRONZE 2023 Living Now Book Awards Social Activism Charity Faith, Hope and Poetry** Malcolm Guite, 2020-04-15 Faith Hope and Poetry explores the poetic imagination as a way of knowing a way of seeing reality more clearly Presenting a series of critical appreciations of English poetry from Anglo Saxon times to the present day Malcolm Guite applies the insights of poetry to contemporary issues and the contribution poetry can make to our religious knowing and the way we do theology This book is not solely concerned with overtly religious poetry but attends to the paradoxical ways in which the poetry of doubt and despair also enriches theology Developing an original analysis and application of the poetic vision of Coleridge Larkin and Seamus Heaney in the final chapters Guite builds towards a substantial theology of imagination and provides unique insights into truth that complement and enrich more strictly rational ways of knowing Readers of this book will return to their reading of poetry equipped with new insights and enthusiasm and will be challenged to integrate imaginative ways of knowing into their other academic and intellectual pursuits The Spoken Word and the Work of Interpretation Dennis Tedlock, 2011-06-03 Dennis Tedlock presents startling new methods for transcribing translating and interpreting oral performance that carry wide implications for all areas of the spoken arts Moreover he reveals how the categories and concepts of poetics and hermeneutics based in Western literary traditions cannot be carried over in their entirety to the spoken arts of other cultures but require extensive reevaluation *Creation and Religious Pluralism* David Cheetham, 2020-08-21 In the well worn debates about religious pluralism and the theology of religions there have been many different rubrics used to account for comprehend or engage with the religious other This book is chiefly a work of Christian theology and seeks to bring the doctrine of creation and the theology of religions into dialogue and in so doing it comes at things from a different direction than other works It contains an extensive exploration of the doctrine of creation and asks how it might intervene distinctively in these discourses to produce a new conceptual and practical topography It will consider inter religious engagement from the perspective of the doctrine of creatio ex nihilo that forms the dominant view in the Jewish Christian and Islamic traditions The book pays close consideration to anthropology i e creaturehood the quotidian and wisdom the idea of sabbath human action and work and vivifying the immanent through a consideration of some representative phenomenologists The book will develop these ideas in a more practical direction by considering sacraments and rituals in the public sphere as well as attempting to describe the kind of creational politics that might bring traditions into dialogue Whilst these themes challenge more conventional ways of considering relations between religions such themes because they are different from concerns commonly found in the literature can also be profitably

engaged with across the spectrum of opinion i.e. exclusivist or pluralist etc. Thus whilst the position adopted in this work is creatio ex nihilo part of the motivation is to review the ways in which this focus helps to broaden rather than limit the discussion.

Kundalini Rudolf Steiner, 2019-04-25 In Hindu tradition the concept of kundalini refers to a form of primal energy located at the base of the spine. Through traditional Eastern methods efforts were made to awaken the kundalini in order to achieve transformed consciousness. Rudolf Steiner offers an entirely new perspective integrating the kundalini idea into his spiritual philosophy. This anthology contains all relevant comments and notes by Steiner on the theme highlighting how his thinking evolved. At the same time it accentuates the differences and similarities between Western and Eastern spiritual paths and in the process reveals what is new and original about Steiner's esoteric teachings. In contrast to most yoga traditions which cultivate the energy rising from the lower life centre the Western path of esoteric schooling starts in our upper centre of consciousness in thinking and the I. From there the centre of experience is shifted downward from the head to the heart. After development of the new heart centre as Rudolf Steiner describes it forces can be guided consciously and through specific exercises the kundalini snake can be fully awoken. In his detailed introduction editor Andreas Meyer distils the perspectives and instructions from Steiner's complete works presenting a valuable synopsis for our understanding and practice of meditation today. Chapters include: The Meaning of Meditation and the Six Exercises; Developing and Cleansing the Lotus Flowers; The Snake Symbol; The Kundalini Fire; The Kundalini Light; Developing the New Heart Organ; The Reversal in Thinking and Will; Specific Aspects of Kundalini Schooling; Transforming Physical Love and the Division of the Sexes; Breathing the Light Soul Process and the New Yoga Will; The Polarity of Light and Love and Transforming the Kundalini Fire into Fraternity.
