Shipping And Shipbuilding In Atlantic Canada 18201914:

Maritime Capital Eric W. Sager, Gerald E. Panting, 1996 In this final volume of the Atlantic Canada Shipping Project Sager and Panting argue that the decline of the shipping industry was not as has commonly been assumed the inevitable result of the conversion from wood and sail to iron and steam They show that the merchant class in failing to maintain a merchant marine built and owned in their region contributed in no small way to the Maritimes present state of underdevelopment Annotation copyrighted by Book News Inc Portland OR *Canadian History: Beginnings to Confederation* Martin Brook Taylor, Doug O'Wram, 1994-01-01 In these two volumes which replace the Reader's Guide to Canadian History experts provide a select and critical guide to historical writing about pre and post Confederation Canada with an emphasis on the most recent scholarship Cover **Shipbuilding on Prince Edward Island** Nicolas De Jong, Marven E. Moore, 1994-01-01 This detailed examination of wooden shipbuilding on Prince Edward Island traces the industry's cycles of prosperity and decline and describes the types of vessels built production profiles and market orientation Accounts of shipbuilding at the community level reveal the local impact of financing and constructing vessels and document how the industry facilitated the distribution of timber and agricultural surpluses Published in English *The Atlantic Region to Confederation* Phillip Buckner, John G. Reid, 2017-06-22 Nearly thirty years ago W S MacNutt published the first general history of the Atlantic provinces before Confederation An outstanding scholarly achievement that history inspired much of the enormous growth of research and writing on Atlantic Canada in the succeeding decades Now a new effort is required to convey the state of our knowledge in the 1990s Many of the themes important to today's historians notably those relating to social class gender and ethnicity have been fully developed only since 1970 Important advances have been made in our understanding of regional economic developments and their implications for social cultural and political life This book is intended to fill the need for an up to date overview of emerging regional themes and issues Each of the sixteen chapters written by a distinguished scholar covers a specific chronological period and has been carefully integrated into the whole The history begins with the evolution of Native cultures and the impact of the arrival of Europeans on those cultures and continues to the formation of Confederation The goal has been to provide a synthesis that not only incorporates the most recent scholarship but is accessible to the general reader The book reassesses many old themes from a new perspective and seeks to broaden the focus of regional history to include those groups whom the traditional historiography ignored or marginalized **Maritime History at the Crossroads** Frank Broeze, 2017-10-18 This volume seeks to critically review the contemporary state of maritime historiography as it stands at the volume's publication date of 1995 The volume is comprised of thirteen essays each focused on the recent research into the maritime concerns of a particular geographical location listed as follows Australia Canada China Denmark Germany Greece Ibero America India the Netherlands the Ottoman Empire Spain the United States and a final chapter concerning historians and maritime labour in Britain Australia and New Zealand One concern made evident by the collection

is the lack of stable identity and cohesive aims within maritime history the subject holds many conflicting definitions and concepts The purpose of this volume is to explore the recent developments in maritime history plus the growth of scholarly interest to provide a beacon and stimulus for future work and to clearly direct and define maritime historiography toward a solid position in the field of history **Historical Atlas of Canada: The land transformed, 1800-1891** Geoffrey J.

Matthews, Don Measner, 1987-01-01 Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century *At the Ocean's Edge* Margaret Conrad, 2020-07-09 At the Ocean's Edge offers a vibrant account of Nova Scotia's colonial history situating it in an early and dramatic chapter in the expansion of Europe Between 1450 and 1850 various processes sometimes violent often judicial rarely conclusive transferred power first from Indigenous societies to the French and British empires and then to European settlers and their descendants who claimed the land as their own This book not only brings Nova Scotia's struggles into sharp focus but also unpacks the intellectual and social values that took root in the region By the time that Nova Scotia became a province of the Dominion of Canada in 1867 its multicultural peoples including Mi'kmaq Acadian African and British had come to a grudging unequal and often contested accommodation among themselves Written in accessible and spirited prose the narrative follows larger trends through the experiences of colourful individuals who grappled with expulsion genocide and war to establish the institutions relationships and values that still shape Nova Scotia's identity **Atlantic Canada** Margaret Conrad, James Hiller, 2001 Having long combined a profound sense of place pride and optimism with a fatalistic resignation today the people of Atlantic Canada are increasingly coming to share a determination to overcome their position as poor cousins within the Canadian federation Atlantic Canada tells the story of the region from its geological origins through its settlers Aboriginal and European to their descendants lives on a series of margins first of the French and British empires then of Confederation now of the global free market Urban and community development in Atlantic Canada, 1867-1991, 1993-01-01 This book offers the first comprehensive overview of community development for the Atlantic Provinces The authors take a collaborative approach to their research question and contribute more than just a survey on urban development They also create a framework for understanding the relationship between the development of towns and cities in Atlantic Canada and in other parts of the country Published in English

The World of Shipping David M. Williams, 2018-11-07 Published in 1997 this volume is a collection of seminal articles on a theme of central importance in the study of transport history selected from the leading journal in the field containing articles selected by a distinguished scholar as well as an authoritative new introduction by the volume editor The book will form an essential foundation to the study of the history of shipping **Mediterranean Wooden Shipbuilding** Apostolos Delis, 2015-10-27 In Mediterranean Wooden Shipbuilding Economy Technology and Institutions in Syros in the Nineteenth Century Apostolos Delis analyses the wooden shipbuilding industry of the port of Syros an important maritime and commercial crossroad in the nineteenth century eastern Mediterranean The main axes of analysis are the economic technical

and institutional aspects of the industry in relation to the wider international context of shipping and trade Based on unpublished archival sources multi language secondary literature and the employment of interdisciplinary theoretical tools Apostolos Delis not only highlights the national and international significance of Syros shipbuilding industry but also contributes novel material to our knowledge of wooden shipbuilding in the Mediterranean Seafaring Labour Eric W. Sager,1996 Sager argues that sailors were not misfits or outcasts but were divorced from society only by virtue of their occupation The wooden ships were small communities at sea fragments of normal society where workers lived struggled and often died With the coming of the age of steam the sailor became part of a new division of labour and a new social hierarchy at sea Sager shows that the sailor was as integral to the transition to industrial capitalism as any land worker A Game of Chance Andrea Kirkpatrick,2023 It s almost impossible to imagine spending eight months at sea without once putting foot on land But that s exactly what whalers experienced when playing the dangerous game of chance hunting down leviathans for oil and bone all for a lay or share of the vessel s spoils A Game of Chance is the first comprehensive in depth study of British North American South Seas whaling Author Andrea Kirkpatrick takes readers on a series of fascinating and sometimes fantastical journeys as she chronicles in great detail the story of a largely forgotten industry that operated out of Nova Scotia and New Brunswick ports from the 1760s to 1850 Kirkpatrick plumbed the depths of myriad logbooks and journals to piece together the often murky tales of an astonishing number of ships In this treatise covering a century of whaling she shares details such as ownership tonnage voyages captains pedigrees and names of crewmen including nascent whaler Herman Melville author of Moby Dick Hoping for greasy luck the men who manned these ships found both camaraderie and competition as they hunted the world s whaling grounds from Cape Horn to Kamchatka many circumnavigating the globe during their careers They battled squalls and high seas scurvy and venereal disease heartbreak and homesickness and sometimes each other Many never returned home their bodies committed to the deep or buried on foreign land Written in two parts landward and seaward Kirkpatrick s clear prose and adoption of whaling lingua franca brings this high risk venture to the fore with authenticity newly revealed facts and remarkable stories of adventure **Powering Up Canada** R.W. Sandwell,2016-11-01 With growing concerns about the security cost and ecological consequences of energy use people around the world are becoming more conscious of the systems that meet their daily needs for food heat cooling light transportation communication waste disposal medicine and goods Powering Up Canada is the first book to examine in detail how various sources of power fuel and energy have sustained Canadians over time and played a pivotal role in their history Powering Up Canada investigates the ways that the production processing transportation use and waste issues of various forms of energy changed over time transforming almost every aspect of society in the process Chapters in the book s first part explore the energies of the organic regime food animal muscle water wind and firewood while those in the second part focus on the coal oil gas hydroelectricity and nuclear power that define the mineral regime Contributors identify both

continuities and disparities in Canada's changing energy landscape in this first full overview of the country's distinctive energy history. Reaching across disciplinary boundaries, these essays not only demonstrate why and how energy serves as a lens through which to better understand the country's history but also provide ways of thinking about some of its most pressing contemporary concerns. Engaging Canadians in an urgent international discussion on the social and environmental history of energy production and use and its profound impact on human society, *Powering Up Canada* details the nature and significance of energy in the past, present, and future. Contributors include Jenny Clayton (University of Victoria), George Colpitts (University of Calgary), Colin Duncan (Queen's University), J. I. Little (emeritus, Simon Fraser University), Joanna Dean (Carleton University), Matthew Evenden (University of British Columbia), Laurel Sefton MacDowell (emerita, University of Toronto), Mississauga, Joshua MacFadyen (Arizona State University), Eric Sager (University of Victoria), Jonathan Peyton (University of Manitoba), Steve Penfold (University of Toronto), Philip van Huizen (McMaster University), Andrew Watson (University of Saskatchewan), and Lucas Wilson (independent scholar).

A Bridge of Ships James Pritchard, 2011-05-20 In *A Bridge of Ships*, James Pritchard tells the story of the rapidly changing circumstances and forceful personalities that shaped government shipbuilding policy. He examines the ownership and expansion of the shipyards and the role of ship repairing as well as recruitment and training of the labour force. He also tells the story of the struggle for steel and the expansion of ancillary industries. Pritchard provides a definitive picture of Canada's wartime ship production, assesses the cost (more than 1.2 billion), and explains why such an enormous effort left such a short-lived legacy. The story of Canada's shipbuilding industry is as astonishing as that of the nation's wartime navy. The personnel of both expanded more than fifty times, yet the history of wartime shipbuilding remains virtually unknown. With the disappearance of the Canadian shipbuilding industry from both the land and memory, it is time to recall and assess its contribution to Allied victory.

The Long Way Home John Demont, 2017-10-03 The province's premier journalist tells the story he was born to write. No journalist has travelled the back roads, hidden vales, and fog-soaked coves of Nova Scotia as widely as John DeMont. No writer has spent as much time considering its peculiar warp and weft of humanity, geography, and history. *The Long Way Home* is the summation of DeMont's years of travel, research, and thought. It tells the story of what is from the European view of things, the oldest part of Canada. Before Confederation, it was also the richest, but now Nova Scotia is among the poorest. Its defining myths and stories are mostly about loss and sheer determination. Equal parts narrative, memoir, and meditation, *The Long Way Home* chronicles with enthralling clarity a complex and multi-dimensional story: the overwhelming of the first peoples and the arrival of a multitude of pioneers who carved out pockets of the wilderness, the random acts and unexplained mysteries, the shameful achievements and noble failures, the rapture and misery, the twists of destiny and the cold-heartedness of fate. This is the biography of a place that has been hardened by history. A place full of reminders of how great a province it has been and how great with the right circumstances and a little luck it could be again.

Time and a Place Edward MacDonald, Joshua MacFadyen, Irénée

Novaczek,2016-06-01 With its long and well documented history Prince Edward Island makes a compelling case study for thousands of years of human interaction with a specific ecosystem The pastoral landscapes red sandstone cliffs and small fishing villages of Canada s garden province are appealing because they appear timeless but they are as culturally constructed as they are shaped by the ebb and flow of the tides Bringing together experts from a multitude of disciplines the essays in *Time and a Place* explore the island s marine and terrestrial environment from its prehistory to its recent past Beginning with PEI s history as a blank slate a land scraped by ice and then surrounded by rising seas this mosaic of essays documents the arrival of flora fauna and humans and the different ways these inhabitants have lived in this place over time The collection offers policy insights for the province while also informing broader questions about the value of islands and other geographically bounded spaces for the study of environmental history and the crafting of global sustainability Putting PEI at the forefront of Canadian environmental history *Time and a Place* is a remarkable accomplishment that will be eagerly received and read by historians geographers scholars of Canadian and island studies and environmentalists

The Life and Times of a Merchant Sailor Jason M. Burns,2012-12-06 Historical archaeologists are in a unique position to analyze both historical documents and archaeological data in order to generate hypotheses and draw conclusions In this work the data not only provided the history of the ship Catharine but also the economic social and political environments in which the ship was built and employed This work focuses not only on the shipwreck and the wrecking event but on the history and archaeology of a single ship With this expanded view the research also delves into International shipbuilding The struggle for dominance in the ship trade in the 19th century This book will be of interest to underwater historical and cultural archaeologists social historians cultural heritage managers and archaeologists working in the southeastern United States

A Brief History of Canada Roger E. Riendeau,2007 Presents a concise history of Canada from the time of early exploration by Europeans to the present day

All Things in Common Ruth Compton Brouwer,2021-06-29 In the first decade of the twentieth century a few closely related families established a utopian community in Canada s smallest province Known officially as B Compton Limited but described by a journalist in 1935 as Prince Edward Island s unique brotherly love community this utopia owed its longevity to the cohesion provided by its communal organization dense kin ties and long held millenarianism and to a decidedly pragmatic approach to business *All Things in Common* demonstrates how un utopian such a community could be while problematizing the contention that the inevitable end of all utopian experiments is a full blown dystopia Beginning with a compelling backstory and locating the Compton community in the historiography of North American utopias the author goes on to explore the community s business endeavours its religious familial and transgressive aspects and its brief period of international fame before assessing the factors that led to its dissolution in 1947 Providing a strong narrative framework *All Things in Common* draws on rich family and archival records and diverse secondary sources concluding with a consideration of the community s legacy for its alumni and their descendants
