Rod Macdonald, 2024-07-09 informative and detailed with some interesting and little known anecdotes as well National Maritime Historical Society Early on Sunday 7 December 1941 Japanese carrier borne aircraft launched a surprise attack against the US Pacific Fleet based at Pearl Harbor It was a date that President Roosevelt declared will live in infamy During the strike Japanese planes attacked the seven US battleships lined up in Battleship Row and the flag battleship USS Pennsylvania in drydock for overhaul The battleship USS Arizona exploded from a bomb hit at the forward magazine killing 1 177 officers and men On USS Oklahoma 429 men were killed many trapped inside as the great battleship capsized after aerial torpedo strikes USS West Virginia meanwhile was hit by at least seven torpedoes and several bombs and engulfed in flames she settled onto the bottom on an even keel USS California was hit by a pair of torpedoes and a bomb flooding slowly she too settled on the bottom The other four battleships present were more lightly damaged with the crippled Nevada the only battleship to get underway during the attack being successfully beached By the time the assault was over eight battleships three light cruisers three destroyers a training ship and other smaller vessels had been sunk or damaged Hundreds of US aircraft had been damaged or destroyed while 2 403 Americans had been killed Within a week of the Japanese attack a great salvage organization had been formed Very quickly the lightly damaged battleships Pennsylvania Maryland and Tennessee had been repaired in naval yards and put back into service to protect the west coast of the USA Of the eight battleships attacked all but Arizona were raised temporarily patched up and sent back to naval yards on the west coast of America for final repair and modernization Main battery guns and ordnance were recovered from the wrecked Arizona which would then be left to rest on the bottom of the harbor for eternity as a memorial to the events of that fateful December day USS Nevada was lifted off the bottom in February 1942 California in March 1942 and West Virginia in June 1942 The capsized Oklahoma while eventually parbuckled and raised was found to be too badly damaged to be fully rebuilt Six of the eight battleships would thus return to service with improved protection against bombs and torpedoes and being fitted with the latest anti aircraft and gunnery systems They would re enter to the war to wreak a terrible revenge making their presence felt during the reconquest of the Aleutian Islands and the Philippines and the great battles of Leyte Gulf Iwo Jima and Okinawa Nevada would go on Atlantic convoy duty before bombarding German positions off Utah beach as the D Day Normandy landings began This is the story of those six *Diving and Snorkeling Guide to Truk Lagoon* Tim Rock, 1994 This illustrated guide helps divers explore Truk s most impressive wrecks including the Japanese freights Fujikawa Maru and Hoyo Maru In addition there are descriptions of the snorkelling and reef sites at Cannon Island Northeast Pass and Pisiwi and Pisimwe islands **Task Force 58** Rod Macdonald, 2023-01-04 The new breed of American fast aircraft carriers could make thirty three knots and each carried almost 100 strike aircraft Brought together as Task Force 58 also known as the Fast Carrier Task Force this awesome armada at times comprised more than 100 ships carrying more than 100 000 men afloat By 1945 more than 1 000 combat aircraft fighters dive and torpedo bombers could be launched in under an hour The fast

carriers were a revolution in naval warfare it was a time when naval power moved away from the big guns of the battleship to air power projected at sea Battleships were eventually subordinated to supporting and protecting the fast carriers of which at its peak Task Force 58 had a total of seventeen This book covers the birth of naval aviation the appearance of the first modern carriers in the 1920s through to the famous surprise six carrier _Kido Butai_ Japanese raid against Pearl Harbor on 8 December 1941 and then the early US successes of 1942 at the Battles of the Coral Sea and Midway The fast carriers allowed America in late 1942 and early 1943 to finally move from bitter defence against the Japanese expansionist onslaught to mounting her own offensive to retake the Pacific Task Force 58 swept west and north from the Solomon Islands to the Gilbert and Marshall Islands neutralising Truk in Micronesia and Palau in the Caroline islands before the vital Mariana Islands operations the Battle of Saipan the first battle of the Philippine Sea and the Great Marianas Turkey Shoot The strikes by Task Force 58 took Allied forces across the Pacific to the controversial Battle of Leyte Gulf and to Iwo Jima and Okinawa Task Force 58 had opened the door to the Japanese home islands themselves allowing US bombers to finally get close enough to launch the devastating nuclear bombing raids on Hiroshima and Nagasaki Task Force 58 participated in virtually all the US Navy s major battles in the Pacific theatre during the last two years of the war Having spent many years investigating naval shipwrecks across the Pacific many the result of the devastating effectiveness of Task Force 58 diver and shipwreck author Rod Macdonald has created the most detailed account to date of the fast carrier strike force the force that brought Japan to its knees and brought the Second World War to its crashing conclusion

International Law of Underwater Cultural Heritage Kim Browne,Murray Raff,2023-01-01 This book brings together three distinct areas of International Law namely Environmental Heritage and Ocean Law to address the international legal protection of historically significant wrecks with particular focus on the environmental hazards they may pose The confluence

of Heritage Law and the Law of the Sea with International Environmental Law represents an important development in international governance strategies for the twenty first century in particular those legal and administrative regimes that concern the world's oceans and underwater cultural heritage protection. Importantly, connections between international legal regimes such as the 1982 Law of the Sea and institutions like the International Maritime Organisation (IMO) and United Nations Educational Scientific and Cultural Organisation (UNESCO) can play a crucial part in governance strategies that involve the regulation of marine pollution and historic shipwrecks. National Historic Landmarks Network, 1998. Underwater Cultural Heritage Elena Perez-Alvaro, 2019-05-07. Underwater Cultural Heritage investigates cases of underwater cultural heritage exploring ethical issues that have never been studied before. A vast cultural heritage lies beneath the sea including the archaeological remains of more than three million vessels as well as historic monuments and whole cities. In addition, climate change, population growth and current events around the world mean that new underwater cultural heritage is being created faster than ever before. It is therefore essential that the ethical issues related to the management of such heritage are considered now, especially as decisions made now will bestow the heritage with a value and will establish legal frameworks that could be used either to protect or harm underwater heritage in the future. Considering a range of challenges related to underwater cultural heritage including preservation, management, use, sustainability, valuation, politics, identity, human rights and intangible heritage, the book presents case studies that both illustrate the key ethical issues and also offer possible solutions to help navigate such challenges. The book will also explore the various legislative instruments protecting underwater cultural heritage and emphasise the importance of revising and updating legal frameworks whilst also taking into account ethical concerns that may expose cultural heritage to more serious menaces. Underwater Cultural Heritage draws on case studies from around the globe and as such should be of great interest to academics, researchers and students working in heritage studies, archaeology, history, politics and sustainability. It should also be appealing to heritage practitioners and policymakers who want to learn more about the issues surrounding not only management of underwater cultural heritage but management of cultural heritage in general.
