Barbara Orlans, 1998 This volume of case studies on animal ethics deals with important social controversies involving the human use of animals and analyzes the moral issues involved An introduction to ethical theory provides a framework to the 16 original case studies which include the use of animals in research testing and education as food as companion animals and in religious rites The book is intended for bioethics courses and animal care staff

Heterotopia and the City Michiel Dehaene, Lieven De Cauter, 2008-05-15 Heterotopia literally meaning other place is a rich concept in urban design that describes a space that is on the margins of ordered or civil society and one that possesses multiple fragmented or even incompatible meanings The term has had an impact on architectural and urban theory since it was coined by Foucault in the late 1960s but it has remained a source of confusion and debate since Heterotopia and the City seeks to clarify this concept and investigates the heterotopias which exist throughout our contemporary world in museums theme parks malls holiday resorts gated communities wellness hotels and festival markets With theoretical contributions on the concept of heterotopia including a new translation of Foucault's influential 1967 text *Of Other Space* and essays by well-known scholars the book comprises a series of critical case studies from Beaubourg to Bilbao which probe a range of post-urban transformations and which redirect the debate on the privatization of public space Wastelands and terrains vagues are studied in detail in a section on urban activism and transgression and the reader gets a glimpse of the extremes of our dualized post-civil condition through case studies on Jakarta Dubai and Kinshasa Heterotopia and the City provides a collective effort to reposition

heterotopia as a crucial concept for contemporary urban theory The book will be of interest to all those wishing to understand the city in the emerging postcivil society and post historical era Planners architects cultural theorists urbanists and academics will find this a valuable contribution to current critical argument *American Blacksmith and Motor Shop*

City Council,1897 **How to Love Animals** Henry Mance,2021-07-13 A personal journey into our evolving relationships with animals and a thought provoking look at how those bonds are being challenged and reformed across disciplines We love animals but does that make the animals lives any happier With factory farms climate change and deforestation this might be the worst time in history to

be an animal If we took animals experiences seriously how could we eat think and live differently How to Love Animals is a lively and important portrait of our evolving relationship with animals and how we can share our planet fairly Mance works in a slaughterhouse and on a pig farm to explore the reality of eating meat and dairy He explores our dilemmas over hunting wild animals over fishing the seas visiting zoos and saving wild spaces What might happen if we extended the love we show to our pets to other sentient beings In an age of extinction and pandemics our relationship with animals has become unsustainable Mance argues that there has never been a better time to become vegetarian or vegan and that the conservation movement can flourish if people in wealthy countries shrink their footprint Mance seeks answers from chefs farmers activists philosophers politicians and tech visionaries who are redefining how we think about animals Inspired by the author s young daughters his book is a story of discovery and hope that outlines how we can find a balance with animals that fits with our basic love for them
