**A Short History of Anatomy from the Greeks to Harvey** Charles Singer, 1957 This work has been out of print for many years I long hoped that someone more competent than I would cover the ground more completely This has not happened and since the demand for the book has continued it is here revised with a number of minor adjustments I would express the hope that this new edition may rouse sufficient practical interest in the subject to induce someone to undertake a more comprehensive work The literature in English is now more copious than it was when the first edition was published over thirty years ago Works by some of the leading figures in the history of anatomy Vesalius Galen Coiter Mondino Leonardo are now available in English translation and I am in hope that this new edition may turn my readers attention at least to these Charles Singer Kilmarth Par Cornwall 26th May 1956 Preface to Second Edition page iii

Volumes 1-4 Second Edition is a pioneering four volume encyclopedia compiled by an international team of forensic specialists who explore the relationship between law, medicine and science in the study of forensics. This important work includes over three hundred state of the art chapters with articles covering crime solving techniques such as autopsies, ballistics, fingerprinting, hair and fiber analysis and the sophisticated procedures associated with terrorism investigations, forensic chemistry, DNA and immunoassays. Available online and in four printed volumes, the encyclopedia is an essential reference for any practitioner in a forensic, medical, healthcare, legal, judicial or investigative field looking for easily accessible and authoritative overviews on a wide range of topics. Chapters have been arranged in alphabetical order and are written in a clear and concise manner with definitions provided in the case of obscure terms and information supplemented with pictures, tables and diagrams. Each topic includes cross referencing to related articles and case studies where further explanation is required, along with references to external sources for further reading. Brings together all appropriate aspects of forensic medicine and legal medicine. Contains color figures, sample forms and other materials that the reader can adapt for their own practice. Also available in an on line version which provides numerous additional reference and research tools, additional multimedia and powerful search functions. Each topic includes cross referencing to related articles and case studies where further explanation is required, along with references to external sources for further reading. *Nervous Acts* G.

Rousseau, 2004-11-02 These essays demonstrate the sweeping influence of the human nervous system on the rise of literature and sensibility in early modern Europe. The brain and nerves have usually been treated as narrow topics within the history of science and medicine. Now George Rousseau, an international authority on the relations of literature and medicine, demonstrates why a broader context is necessary. The nervous system was a crucial factor in the rise of recent civilization. More than any other body part, it holds the key to understanding how far back the strains and stresses of modern life, fatigue, depression, mental illness, extend. *Human Sex and Sexuality* Edwin Benzel Steen, James Harold Price, 1988-01-01 Clear

concise coverage of sexual development, anatomy, sexual relations, reproduction, contraception, pornography, deviations, much more. New material on AIDS, toxic shock, etc. Circulation of the Blood Alfred P. Fishman, Dickinson W. Richards, 2013-05-26

Capturing the real spirit of creativity in physiology, this book explores the personal elements involved in scientific discovery. *Circulation of the Blood* is the story of the people and achievements that have changed the way we've come to view the human body. The authors, renowned for their extensive experience in the field, examine the heritage of creative genius involved in physiology and trace the historical development of ideas relating to various aspects of circulation of the blood. Their comprehensive coverage goes from the early discoveries of the Greeks and Romans up to modern times.

Archaeology and Bioarchaeology of Anatomical Dissection at a Nineteenth-Century Army Hospital in San Francisco P. Willey, Peter Gavette, Eric J. Bartelink, Colleen F. Milligan, 2023-12-13 This volume uses historical, archaeological and bioarchaeological analysis to study and understand a nineteenth century medical waste pit discovered at the former Army

hospital at Point San Jose in San Francisco      Venice William H. McNeill, 2009-11-15 In this magisterial history National Book Award winner William H. McNeill chronicles the interactions and disputes between Latin Christians and the Orthodox communities of eastern Europe during the period 1081-1797. Concentrating on Venice as the hinge of European history in the late medieval and early modern period, McNeill explores the technological, economic, and political bases of Venetian power and wealth and the city's unique status at the frontier between the papal and Orthodox Christian worlds. He pays particular attention to Venetian influence upon southeastern Europe and from such an angle of vision the familiar pattern of European history changes shape. No other historian would have been capable of writing a book as direct, as well informed, and as little weighed down by purple prose as this one. Or, as impartial, McNeill has succeeded admirably. Fernand Braudel, *Times Literary Supplement*. The book is serious, interesting, occasionally compelling, and always suggestive. Stanley Chojnacki, *American Historical Review*.      **Laboratory Animal Medicine** Lynn C. Anderson, Glen Otto, Kathleen R. Pritchett-Corning, Mark T. Whary, 2015-07-04

Quod Nihil Scitur Francisco Sánchez, 1988 This is an edition of one of the crucial texts of Renaissance skepticism. *Quod nihil scitur* by the Portuguese scholar Francisco Sánchez. The treatise first published in 1581 is a refutation of Aristotelian dialectics and scientific theory in the search for a true scientific method. This volume provides a critical edition of the original text, an English translation, the first ever published, a substantial introduction, and comprehensive annotation.      **Science and Civilisation in China, Part 6, Medicine** Joseph Needham, 2000-04-13 The latest volume in Joseph Needham's magisterial review of China's premodern scientific and technological traditions introduces the history of medicine. Following the deaths of Joseph Needham and Lu Gwei Djen, a considerable amount of written material on the development of Chinese medicine awaited publication. This material has been gathered together by the editor Nathan Sivin in the five essays contained in this volume. They offer a broad and readable account of medicine in culture, including hygiene and preventive medicine, forensic medicine, and immunology, and the examinations taken by some Chinese physicians for more than a thousand years. Professor Sivin has edited the essays, expanding them where appropriate and incorporating the results of recent research. His extensive introduction discusses the contributions of Needham and Lu, placing the essays in context and surveying recent scholarship.
