Este artículo muestra un tema complejo ya que vamos a manifestar interrogantes, incertidumbres y reflexiones sobre las dificultades de aprendizaje y la forma de abordarlas por los profesionales que tratan al niño.

¿Existen más niños ahora con dificultades de aprendizaje? ¿Es cierta la prevalencia que revelan la mayoría de publicaciones cercana al 15-20%? ¿La formación de los profesionales que tratan a estos niños es suficiente?

En las últimas décadas, con la introducción de las nuevas tecnologías y los avances científicos en neonatología y pediatría, la mortalidad infantil ha descendido significativamente, pero a la vez ha ido aumentado la morbilidad, originándose nuevas dis-

“Trastornos del aprendizaje” es un término ampliamente utilizado ya que, como se señala en párrafos anteriores afecta a una parte importante de la población. Aunque se habla y se debate, sobre estos trastornos, el dato objetivo es que son poco conocidos, tanto en ámbitos médicos como psicológicos y educativos. A pesar de haber sido una población ampliamente estudiada sigue siendo aún un tema polémico y dado a controversias ya que no se ha promocionado la investigación y la enseñanza en desarrollo y conducta infantil, evolucionando cada disciplina de una forma independiente.

Efforts have been made to support teachers in promoting diversity in classrooms but research shows that students with learning disabilities (LD) including autism spectrum disorder, neurodevelopmental disabilities, dyslexia, and executive dysfunction still struggle to keep up despite having individualized education programs (IEPs). These students are not receiving the necessary support they need to learn effectively in the classroom, leaving them behind and often completely unprepared for their futures. When intersectional statistics are taken into account, students who have a learning disability and are among minority ethnic groups have even lower rates of earning a diploma than their counterparts. Changes in the educational system must be made to close this learning chasm and create a more equitable learning environment. *Closing the Educational Achievement Gap for Students With Learning Disabilities* increases awareness of the issue of inequalities in education for students with learning disabilities through improved training programs for teachers, recommendations for policy changes, and development

of new strategies to close the gap between these students and their classmates The goal of this book is to educate and empower educators researchers and policymakers on how they can help students with learning disabilities thrive academically and emotionally It examines the barriers that prevent teachers from effectively providing instruction to these students This book covers topics such as achievement gaps student centered approaches and culturally responsive teaching and is ideal for educators professionals researchers special education professionals speech and occupational therapists disability service providers intervention strategists psychologists parents and local communities
