Some of them even boasted of his attendance at their meetings to their friends, hinting at the special distinction which they felt in his presence.

Gradually, however, because they could find no relationship with this man developing, the guests began to suspect that he was an impostor, perhaps a fraud. Several of them felt uncomfortable in his presence. application of a relational psychoanalytic lens to the patient therapist animal triad can enhance the therapeutic process in ways that encourage progressive communication understanding of the patient and the relaxing of defences leading to the symbolising of relational capacity therapeutic breakthrough and intrapsychic change
