Magnet Schools Recent Developments And Perspectives:

Magnet Schools Nolan Estes, Daniel U. Levine, Donald R. Walldrip, 1990 **The Wiley Handbook of School Choice** Robert A. Fox, Nina K. Buchanan, 2017-03-13 The Wiley Handbook of School Choice presents a comprehensive collection of original essays addressing the wide range of alternatives to traditional public schools available in contemporary US society A comprehensive collection of the latest research findings on school choices in the US including charter schools magnet schools school vouchers home schooling private schools and virtual schools Viewpoints of both advocates and opponents of each school choice provide balanced examinations and opinions Perspectives drawn from both established researchers and practicing professionals in the U S and abroad and from across the educational spectrum gives a holistic outlook Includes thorough coverage of the history of traditional education in the US its current state and predictions for the future of each alternative school choice **American Educational History Journal** Donna M. Davis, 2015-09-01 The American Educational History Journal is a peer reviewed national research journal devoted to the examination of educational topics using perspectives from a variety of disciplines The editors of AEHJ encourage communication between scholars from numerous disciplines nationalities institutions and backgrounds Authors come from a variety of disciplines including political science curriculum history philosophy teacher education and educational leadership Acceptance for publication in AEHJ requires that each author present a well articulated argument that deals substantively with questions of educational history

Law and School Reform Jay Philip Heubert, 1999-01-01 An examination of six of the most controversial school reform initiatives in the US school desegregation school finance reform special education education of immigrant children integration of youth services and enforceable performance mandates **Resources in Education** , 1999-10 **Making Up Our Mind** Sigal R. Ben-Porath, Michael C. Johanek, 2019-04-24 If free market advocates had total control over education policy would the shared public system of education collapse Would school choice revitalize schooling with its innovative force With proliferating charters and voucher schemes would the United States finally make a dramatic break with its past and expand parental choice Those are not only the wrong questions they re the wrong premises argue philosopher Sigal R Ben Porath and historian Michael C Johanek in Making Up Our Mind Market driven school choices aren t new They predate the republic and for generations parents have chosen to educate their children through an evolving mix of publicly supported private charitable and entrepreneurial enterprises The question is not whether to have school choice It is how we will regulate who has which choices in our mixed market for schooling and what we as a nation hope to accomplish with that mix of choices Looking beyond the simplistic divide between those who oppose government intervention and those who support public education the authors make the case for a structured landscape of choice in schooling one that protects the interests of children and of society while also identifying key shared values on which a broadly acceptable policy could rest **The Least Dangerous Branch?** Stephen P. Powers, Stanley Rothman, 2002-11-30 Is the American judiciary still the least

dangerous branch as Alexander Hamilton and legal scholar Alexander Bickel characterized it Unlike legislatures or administrative agencies courts do not make policy so much as direct and redirect policy as it is implemented The judicial contribution to policymaking involves the infusion of constitutional rights into the realm of public policy and as the government has grown the courts have become more powerful from doing more and more of this Powers and Rothman explore the impact of the federal courts providing a brief account of the development of constitutional law and an overview of the judiciary's impact in six controversial areas of public policy Busing Affirmative action Prison reform Mental health reform Procedural reforms in law enforcement Electoral redistricting In each of these areas the authors review significant cases that bear on the particular policy exploring the social science evidence to assess the impact of the courts on policies and the consequences of that intervention Powers and Rothman conclude that judicial intervention in public policy has often brought about undesirable consequences sometimes even for the intended beneficiaries of government intervention

Teaching City Kids Kecia Hayes, 2007 Textbook *Keeping the Immigrant Bargain* Vivian Louie, 2012-06-01 Most nineteenth and early twentieth century European immigrants arrived in the United States with barely more than the clothes on their backs They performed menial jobs spoke little English and often faced a hostile reception But two or more generations later the overwhelming majority of their descendants had successfully integrated into American society Today's immigrants face many of the same challenges but some experts worry that their integration especially among Latinos will not be as successful as their European counterparts *Keeping the Immigrant Bargain* examines the journey of Dominican and Colombian newcomers whose children have achieved academic success one generation after the arrival of their parents Sociologist Vivian Louie provides a much needed comparison of how both parents and children understand the immigrant journey toward education mobility and assimilation Based on Louie's own survey and interview study *Keeping the Immigrant Bargain* examines the lives of thirty seven foreign born Dominican and Colombian parents and their seventy six young adult offspring the majority of whom were enrolled in or had graduated from college The book shows how they are adapting to American schools jobs neighborhoods and culture Louie discovers that before coming to the United States some of these parents had already achieved higher levels of education than the average foreign born Dominican or Colombian and after arrival many owned their own homes Significantly most parents in each group expressed optimism about their potential to succeed in the United States while also expressing pessimism about whether they would ever be accepted as Americans In contrast to the social exclusion experienced by their parents most of the young adults had assimilated linguistically and believed themselves to be full participants in American society *Keeping the Immigrant Bargain* shows that the offspring of these largely working class immigrants had several factors in common that aided their mobility Their parents were highly engaged in their lives and educational progress although not always in ways expected by schools or their children and the children possessed a strong degree of self motivation Equally important was the availability of key institutional networks of support including teachers

peers afterschool and other enrichment programs and informal mentors outside of the classroom These institutional networks gave the children the guidance they needed to succeed in school offering information the parents often did not know themselves While not all immigrants achieve such rapid success this engrossing study shows how powerful the combination of self motivation engaged families and strong institutional support can be Keeping the Immigrant Bargain makes the case that institutional relationships such as teachers and principals who are trained to accommodate cultural difference and community organizations that help parents and children learn how to navigate the system can bear significantly on immigrant educational success
