Magnetic Resonance of Myelination and Myelin Disorders Marjo S. van der Knaap, Jaap Valk, 2005-08-15 Our thanks go to our colleagues at the VU University Medical Center and to those in other hospitals Reading through the prefaces of the two previous editions who referred their patients to us We are indebted to them that much of what was said there still holds At the same time however much has changed published or unpublished making it possible for us to There has been immense progress in the technical present illustrations of nearly all known white matter possibilities of magnetic resonance and in the known disorders Two colleagues were particularly helpful ledge of genetic defects biochemical abnormalities and provided us with essential and unpublished data on cellular processes underlying myelin disorders Thanks to our friends Susan Blaser from the Hospital for Sick Children in Toronto and Zoltan Patay from the Zoltan Patay Hospital in Riyadh upon the enormous task of rewriting the previous King Faisal Hospital in Riyadh edition and adding 40 chapters In doing so we have Many people at the VU University Medical Center tried to cover most white matter disorders hereditary have been of great technical help to us in producing and acquiring and to present a collection of images to high quality images and in providing secretarial assistance to illustrate the field to the fullest possible extent This assistance The contributions of these people are edition will therefore be more complete than the pre mentioned separately in the acknowledgements

Magnetic Resonance of Myelin, Myelination, and Myelin Disorders Jacob Valk, Marjo S. van der Knaap, 2013-04-17 Magnetic resonance imaging MRI is now considered the imaging modality of choice for the majority of disorders affecting the central nervous system This is particularly true for gray and white matter disorders thanks to the superb soft tissue contrast in MRI which allows gray matter unmyelinated and myelinated white matter to be distinguished and their respective disorders identified The present book is devoted to the disorders of myelin and myelination A growing amount of detailed in vivo information about myelin myelination and myelin disorders has been derived both from MRI and from MR spectroscopy MRS This prompted us to review the clinical laboratory biochemical and pathological data on this subject in order to integrate all available information and to provide improved insights into normal and disordered myelin and myelination We will show how the synthesis of all available information contributes to the interpretation of MR images After a brief historical review about the increasing knowledge on myelin and myelin disorders we propose a new classification of myelin disorders based on the subcellular localization of the enzymatic defects as far as the inborn errors of metabolism are concerned This classification serves as a guide throughout the book All items of the classification will be discussed and whenever relevant and possible be illustrated by MR images

Imaging of White Matter, An Issue of Radiologic Clinics of North America, E-Book Sangam Kanekar, 2014-03-28 White matter lesions have been always challenging

for general as well as neuroradiologists Any disease process in the brain or body can affect white matter making it very difficult to pinpoint the diagnosis However the application of the proper algorithmic approach pattern of distribution and study of the morphology of these lesions makes it possible to limit the differential diagnosis and many times pinpoint specific diagnosis Advancement of various imaging techniques predominately in MR MR spectroscopy MR perfusion diffusion tensor imaging DTI functional MR along with PET has further improved our understanding of these disease processes However most of these techniques are new and not well understood by every physician This issue will cover the topics necessary to master these techniques
