Reforming Federal Policy

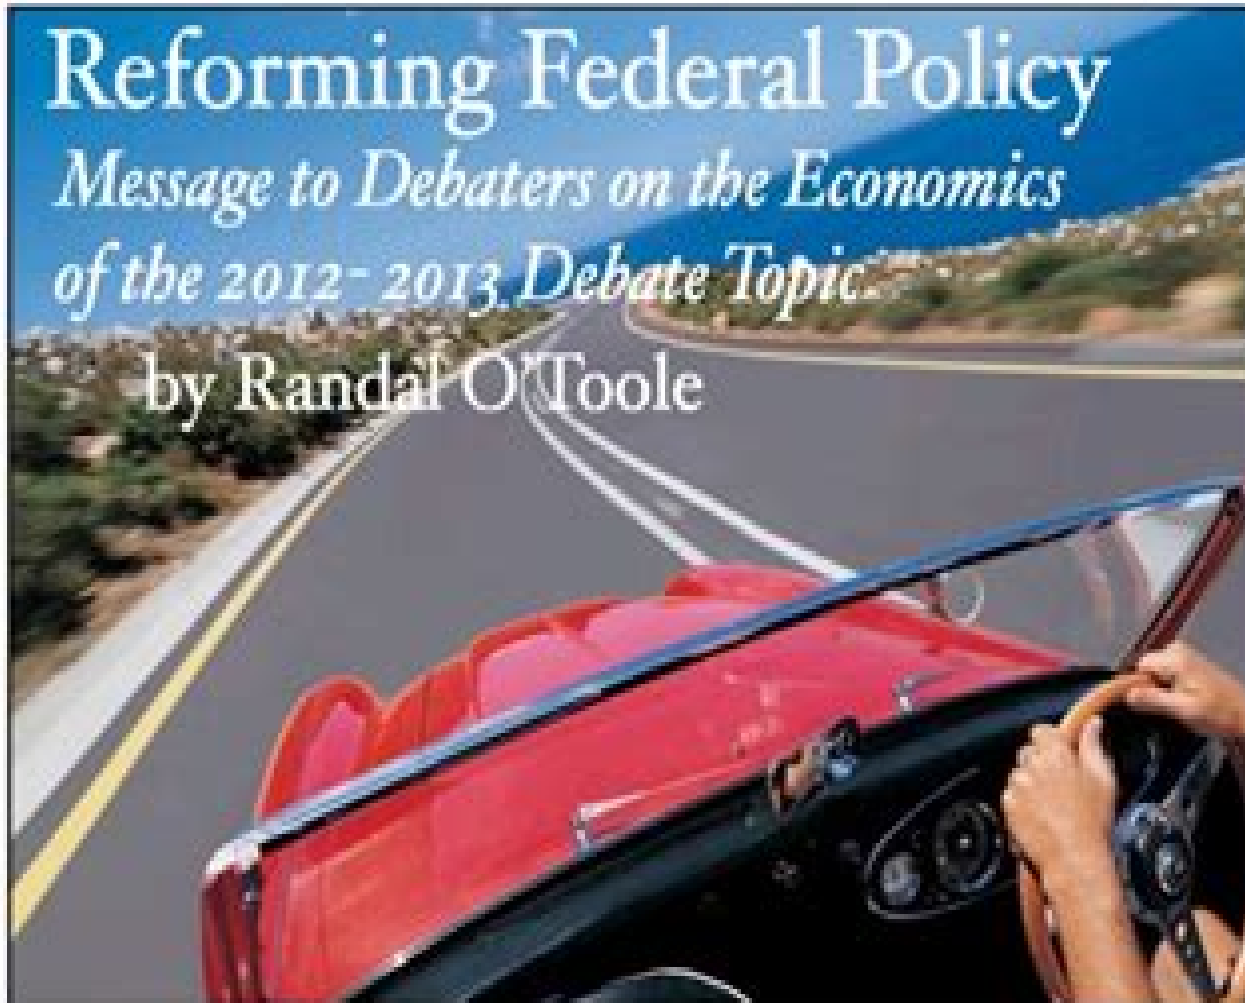

Message to Debaters on the Economics of the 2012-2013 Debate Topic

by Randal O'Toole

Resolved: The United States federal government should substantially increase its transportation infrastructure investment in the United States.

Economics?

Economics deals with the allocation of scarce resources. The term "eco" comes from the Greek word for house and the term "nomos" comes from the Greek word for management, and the first "economists" were household managers. Today, the term economics has expanded to include the management of

Perspectives on Federal Transportation Policy James Clifford Miller, American Enterprise Institute for Public Policy Research, 1979 Perspectives on Federal Transportation Policy J. C. Miller (III.), 1975 *Study of Federal Aid to Rail Transportation* United States. Department of Transportation, 1977 **Transportation** Eston T. White, 1981 Regulatory Decision, Airlines : Player's Handbook Peter Clancy, 1985 *Hearings, Reports and Prints of the Joint Economic Committee* United States. Congress. Joint Economic Committee, 1977 *Heavy Traffic* Daniel Madar, 2011-11-01

Canada and the United States exchange the world's highest level of bilateral trade valued at 1.4 billion a day. Two thirds of this trade travels on trucks. Heavy Traffic examines the way in which the regulatory reform of American and Canadian trucking coupled with free trade has internationalized this vital industry. Before deregulation restrictive entry rules had fostered two separate national highway transportation markets and most international traffic had to be exchanged at the border. When the United States deregulated first the imbalance between its opened market and Canada's still restricted one produced a surprisingly difficult bilateral dispute. American deregulation was motivated by domestic incentives but the subsequent Canadian deregulation blended domestic incentives with transborder rate comparisons and concerns about trade competitiveness. Daniel Madar shows that deregulation created a de facto regime of free trade in trucking services. Removing regulatory barriers has enabled Canadian and American carriers to follow the expansion of transborder traffic that began with the Canada US Free Trade Agreement and continues with NAFTA. The services available with deregulated trucking have also supported sweeping changes in industrial logistics. As transborder traffic has surged the two countries carriers from billion dollar corporations to family firms have exploited the latitude provided by deregulation. This book is a valuable contribution to our understanding of the policy processes and economic conditions that led to trucking deregulation. As a study in public policy formation and the international effects of reform it will be of interest to students and scholars of political economy, international relations and transportation.
