Politics Of Precaution Genetically Modified Crops In Developing Countries:

The Politics of Precaution Robert L. Paarlberg, 2001-09-06 Genetically modified GM food crops have inspired increasing controversy over the past decade. By the mid 1990s they were widely grown in the U S, Canada and Argentina but precautionary regulations continue to limit their use elsewhere. The restrictive policies of Europe and Japan toward GM crops have been much discussed. Less attention has been paid to the policies affecting the adoption of GM crops in the developing world where their potential impact on the availability and quality of food is even greater. In this book Robert Paarlberg looks at the policy choices regarding GM food made by four important developing countries: Kenya, Brazil, India and China. Of these so far only China has approved the planting of GM crops. Paarlberg identifies five policy areas in which governments of developing countries can either support or discourage GM crops: intellectual property rights, biosafety, trade, food safety and public research and investment. He notes that highly cautious biosafety policies have so far been the key reason that Kenya, Brazil and India have hesitated to plant GM crops. These cautious policies have been strongly reinforced by international market forces and international diplomatic and NGO pressures. China has been less cautious toward GM crops in part because there is less opportunity in China for international organizations or independent critics of GM crops to challenge official policy.

Policies for Genetically Modified Crops in Developing Countries Mara Nielle Bird, 2006 **Food Policy for the Poor** Joachim Von Braun, Rajul Pandya-Lorch, 2005-01-01 **Risk Regulation in Europe** Jale

Tosun, 2012-11-05 The publication aims to familiarize students of public policy with the precautionary principle which plays a vital role in the European Union's approach toward regulating risks. The precautionary principle contends that policy makers should refrain from actions having a suspected risk of causing harm to the public and/or the environment. However, the

precautionary principle only provides guidance to policy makers but does not prescribe specific policy responses Therefore there should be variation in the way the principle is applied Furthermore precautionary measures are in principle of a provisional nature suggesting that they are likely to be subject to changes over time This book is thus interested in shedding light on how the precautionary principle is put into practice and to what extent precautionary measures become modified Empirically it focuses on how the EU has regulated the use of growth hormones in meat production the cultivation of genetically modified corn and the use of Stevia based sweeteners in foods and beverages The main theoretical argument advanced by this study is that the way in which the original regulatory standards were formulated affects whether and how they are changed By placing particular emphasis on the relevance of scientific evidence for the re definition of precautionary measures the book is expected to appeal to both academics and practitioners

GM agricultural technologies for Africa

Chambers, Judith A., Zambrano, Patricia, Falck-Zepeda, José Benjamin, Gruère, Guillaume P., Sengupta, Debdatta, Hokanson, Karen, 2014-09-29 The African Development Bank AfDB in commissioning this report to be prepared by the International Food Policy Research Institute IFPRI highlighted the need for a comprehensive evidenced based review of agricultural biotechnology in order to better understand its current status issues constraints and opportunities for Africa Agricultural biotechnology comprises several scientific techniques genetic engineering molecular marker assisted breeding the use of molecular diagnostics and vaccines and tissue culture that are used to improve plants animals and microorganisms However in preparing this desktop analysis IFPRI has focused on genetic modification GM technologies in particular and on the agricultural context in which they are being applied because GM technologies are at the center of the controversy about biotechnology's role in Africa In addition because we have attempted to focus our review on peer reviewed evidence and documented examples the preponderance of data presented in the report is focused on genetically modified also abbreviated GM crops in use and under development although we recognize the potential of the technology for livestock fisheries and forestry

Politics of Intellectual Property European Consortium for Political Research. Joint Sessions of

Workshops, 2009 We know much more about the global politics of intellectual property than we do about national political contests over the ownership of knowledge Haunss and Shadlen have identified this gap in the literature and have done a fine job of bringing together a set of essays that helps to fill this gap in our understanding of the multi layered nature of intellectual property politics Peter Drahos The Australian National University Canberra This thought provoking volume provides invaluable new insights and is a major contribution to the debate on the politics of intellectual property rights Duncan Matthews Queen Mary University of London UK This book offers empirical analyses of conflicts over the ownership control and use of knowledge and information in developed and developing countries Sebastian Haunss and Kenneth C Shadlen along with a collection of eminent contributors focus on how business organizations farmers social movements legal communities state officials transnational enterprises and international organizations shape IP policies in areas such as health

information communication technologies indigenous knowledge genetic resources and many others The innovative and original chapters examine conflicts over the rules governing various dimensions of IP including patents copyrights traditional knowledge and biosafety regulations Written from a political perspective this book is a must read for political scientists sociologists and anthropologists who study IP and conflicts over property It is also an essential read for stakeholders in institutions NGOs and industry interested in knowledge governance and IP politics

Regional Biotechnology Regulations: Design Options and Implications for Good Governance Nicholas Linacre, 2008

Governing Agricultural Sustainability Phil Macnaghten, Susana Carro-Ripalda, 2015-06-26 Although GM crops are seen by their advocates as a key component of the future of world agriculture and as part of the solution for world poverty and hunger their uptake has not been smooth nor universal they have been marred by controversy and all too commonly their regulation has been challenged as inadequate even biased This book aims to understand these dynamics examining the impacts of GM crops in diverse contexts and their potentials to contribute to sustainable agricultural futures Part 1 draws on research from three global rising powers Brazil India and Mexico exploring the views of scientists farmers and publics Using a diverse array of ethnographic and qualitative methodologies the book examines the dynamics that have underpinned the controversy in three diverse geo political contexts the manner in which dominant institutional framings have been closely aligned with the interests of powerful elites and the multiple ways in which these have been resisted through local symbolic and material practices Part 2 comprises a series of short comment pieces from 11 leading social and natural scientists responding to the question of how to develop a policy framework for the responsible innovation of sustainable culturally appropriate and socially just agricultural GM technologies This innovative book offers new insights for researchers and postgraduates in Science and technology studies Agro ecology and Environmental Studies Development studies Anthropology Human Geography Sociology Political Science Public Administration Latin American studies and Asian studies

Transatlantic Environment and Energy Politics Stacy D VanDeveer, Mr Henrik Selin, Professor Miranda A Schreurs, 2013-03-28 Environmental and energy policies have become increasingly significant in European and North American politics This fascinating book uses a wide range of case studies that embrace climate change product standards chemical regulations renewable energy policies food safety and genetically modified organisms to examine areas of conflict and cooperation in the transatlantic relationship While there are many areas where the European Union and the United States are following divergent policy paths there are also many signs that a more cooperative transatlantic relationship could emerge in the future Transatlantic Environment and Energy Politics is highly relevant to understanding how the European Union and North America can cooperate more effectively in meeting today's many global environmental and energy policy challenges It is essential reading for all advanced students and scholars
