The Customer-Funded Business John Mullins, 2014-07-21. Who needs investors? More than two generations ago, the venture capital community (VCs, business angels, incubators, and others) convinced the entrepreneurial world that writing business plans and raising venture capital constituted the twin centerpieces of entrepreneurial endeavor. They did so for good reasons: the sometimes astonishing returns they've delivered to their investors and the astonishingly large companies that their ecosystem has created. But the vast majority of fast-growing companies never take any venture capital. So where does the money come from to start and grow their companies? From a much more agreeable and hospitable source: their customers. That's exactly what Michael Dell, Bill Gates, and Banana Republic's Mel and Patricia Ziegler did to get their companies up and running and turn them into iconic brands. In *The Customer-Funded Business*, best-selling author John Mullins uncovers five novel approaches that scrappy and innovative 21st-century entrepreneurs, working in companies large and small, have ingeniously adapted from their predecessors like Dell, Gates, and the Zieglers: Matchmaker models, Airbnb Pay-in-advance models, Threadless Subscription models, TutorVista Scarcity models, Vente Privée Service-to-product models, GoViral. Through the captivating stories of these and other inspiring companies from around the world, Mullins brings to life the five models and identifies the questions that angel or other investors will and should ask of entrepreneurs or corporate innovators seeking to apply them. Drawing on in-depth interviews with entrepreneurs and investors who have actually put these models to use, Mullins goes on to address the key implementation issues that characterize each of the models: when to apply them, how best to apply them, and the pitfalls to watch out for. Whether you're an aspiring entrepreneur lacking the start-up capital you need, an early-stage entrepreneur trying to get your cash-starved venture into take-off mode, an intrapreneur seeking funding within an established company, or an angel investor or mentor who supports high-potential ventures, this book offers

provocative and thoughtful account of how our nations ideals of equality and the pursuit of happiness emerged as an inspiration and a beacon of hope for the entire world and how politicians Wall Street and our own sense of entitlement have gradually eroded this Dream to the point of endangering Americas preeminence In this fascinating and informative book Louis Hernandez Jr explores the origins evolution and economic underpinnings of the American Dream detailing how key government policies over facilitated the Dreams attainment weakened the will of the American people and drove us inexorably toward the 2007 financial crisis He shows how policies put in place after the crisis not only failed to address the core problems America faces but created a growing disconnect between Wall Street and Main Street that has made things far worse The book examines how our myopic political focus on Too Big to Fail institutions has threatened the most crucial pillars of the American Dream our small businesses and the community banks and credit unions that support them and sabotaged their ability to support job growth and responsible financial services for families and local communities
