rediscovery of the history of England through archaeology and the imagination History thrives on stories TIME S ANVIL explores archaeology s influence on what such stories say how they are told who tells them and how we listen In a dazzlingly wide ranging exploration Richard Morris casts fresh light on three quarters of a million years of history in the place we now think of as England Drawing upon genres that are usually pursued in isolation like biography poetry or physics he finds potent links between things we might imagine to be unrelated His subjects range from humanity s roots to the destruction of the wildwood from the first farmers to industrialization and from Tudor drama to 20th century conflict Each topic sits at a different point along the continuum between epoch and the fleeting moment In part this is a history of archaeology in part too it is a personal account of the author s history in archaeology But mainly it is about how the past is read and about what we bring to the reading as well as what we find The result is a book that defies categorisation but one which will by turns surprise enthrall and provoke anyone who cares for England who we are and where we have come from TIME S ANVIL was longlisted for the Samuel Johnson Prize for Non Fiction 2013
