Extended Objects in Noisy Point Clouds with Application in Telepresence Systems Faion, Florian,2016-09-13 We discuss theory and application of extended object tracking This task is challenging as sensor noise prevents a correct association of the measurements to their sources on the object the shape itself might be unknown a priori and due to occlusion effects only parts of the object are visible at a given time We propose an approach to track the parameters of arbitrary objects which provides new solutions to the above challenges and marks a significant advance to the state of the art

Crime Fiction, 1749-1980 Allen J. Hubin,1984 **Dynamics of Coupled Systems in High-Speed Railways** Weihua

Zhang,2019-11-25 Dynamics of Coupled Systems in High Speed Railways Theory and Practice presents the relationship between various coupled systems that can affect train operation including interaction between track and train the pantograph catenary system and train power supply system and train and airflow and train with respect to the structure and characteristics of high speed railway The overall simulation optimization and control are achieved based on an analysis of the dynamics generated by coupled systems in high speed trains with a theoretical framework for the dynamics presented in the book Presents the first book available on the dynamics of coupled systems in high speed trains Provides a systematic view of high speed vehicle dynamics covering the issues that are especially concerned for high speed operations such as high speed pantograph and catenary aerodynamic characteristics and running stability of high speed trains Covers the optimization of dynamic performance the design of parameters the simulation of high speed train service processes and the identification of high speed train state and condition assessment **The Dynamics of Vehicles on Roads and Tracks** Martin

Rosenberger,Manfred Plöchl,Klaus Six,Johannes Edelmann,2016-03-30 The IAVSD Symposium is the leading international conference in the field of ground vehicle dynamics bringing together scientists and engineers from academia and industry The biennial IAVSD symposia have been held in internationally renowned locations In 2015 the 24th Symposium of the International Association for Vehicle System Dynamics IAVSD **Numerical Methods** George Em Karniadakis,2019-04-15 This multi volume handbook is the most up to date and comprehensive reference work in the field of fractional calculus and its numerous applications This third volume collects authoritative chapters covering several numerical aspects of fractional calculus including time and space fractional derivatives finite differences and finite elements and spectral meshless and particle methods The Cumulative Book Index ,1979 A world list of books in the English language Track Data-Oriented Maintenance Intervention Limit Determination for Ballasted Light Rail Tracks through Multibody Simulations David Camacho Alcocer,2021-07-13 Light rail trains LRT are an important part of public transport but due to perceived high life cycle costs are not always considered suitable Life cycle cost reduction might be achieved through a knowledge based maintenance management rather than just on experience This work develops limits of maintenance and renewal of LRT systems based on vehicle reactions to the current track quality through measured data multibody simulations and track geometry indices An approach based on knowledge would lead to a track condition which allows a safe comfortable and under an appropriate maintenance strategy economically profitable operation
