The term underground music as it's being used here connects various forms of music making that exist outside or on the fringes of mainstream institutions and culture such as noise free improvisation and extreme metal. This is music that makes little money that's noisy and exploratory in sound and that's largely independent from both the market and from traditional high art institutions. It sometimes exists at the fringes of these commercial and cultural institutions as for example with experimental metal or improv but for the most part it's removed from the mainstream underground as we see with noise artists such as Werewolf Jerusalem or Ramleh obscure black metal artists such as Lord Foul and improvisers such as Maggie Nicols. In response to a lack of previous scholarly discussion Graham provides a cultural political and aesthetic mapping of this broad territory. By outlining the historical background but focusing on the digital age the underground and its fringes can be seen as based in radical anti capitalist politics or radical aesthetics while also being tied to the political contexts and structures of late capitalism. The book explores these various ideas of separation and captures through interviews and analysis a critical account of both the music and the political and cultural economy of the scene.      *Clinical Eye Atlas* Daniel H.
