Behavioral Medicine with the Developmentally Disabled J.H. Kedesdy,D.C. Russo,2013-11-11 Since the late 1960s the behavioral treatment of mentally retarded au tistic and other developmentally disabled persons has grown progres sively more sophisticated The literature on behavioral treatment has produced effective and clinically significant programs for the reduction of maladaptive behaviors such as tantrums aggression and self injury skills deficits have been remediated through improved programs for language and life skills acquisition and new environments have been opened in the creation of mainstream educational opportunities In spite of these advances it strikes us that this almost exclusive focus on behavior problems and skills remediation has been somewhat myopic and that much of the potential for application of behavioral science to solving problems of the developmentally disabled is as yet untapped In the 1980s an important revolution has taken place the devel opment of the field of behavioral medicine This field in merging disease treatment and management with learning and behavior has already made impressive progress toward a reconceptualization of health care that acknowledges the centrality of behavior in disease expression Al though there has as yet been only a preliminary application of this reconceptualization to the field of developmental disabilities we are convinced that further extension has great potential

DSM-IV Training Guide For Diagnosis Of Childhood Disorders Judith L. Rapoport,Deborah R. Ismond,2014-03-18 First published in 1996 Revised to reflect changes made in DSM IV as they pertain to childhood psychiatric disorders this updated DSM IV Training Guide for Diagnosis of Childhood Disorders provides specific instructions for optimally using the DSM IV This meticulously researched companion guide will provide welcome clarification and definition of the terms and concepts included in the DSM IV criteria for disorders pertaining specifically to children and adolescents The volume encompasses both psychopathology specific to infancy childhood and adolescence and other psychiatric disorders such as Anxiety Obsessive Compulsive Disorder Depression and Schizophrenia that are more common as adult disorders by may appear in childhood While the diagnostic criteria for these are largely the same for children and adults there are differences that emerge when making differential diagnosis of these disorders for children as illuminated in the Training Guide This companion guide focuses on the manifestation of various disorders differentiation among syndromes and qualify of characteristics Numerous and vivid case vignettes clearly illustrate clinical symptoms and demonstrate the application of diagnostic guidelines The book highlights the multi axial approach of DSM as a means of assessing the child from a variety of perspectives including exogenous factors

influencing development sources of a particular disorder and the child's innate limitations and capabilities. Diagnostic criteria and main features of specific disorders are highlighted in numerous tables and figures interspersed throughout the volume. Most importantly, the Guide highlights the gray areas of diagnosis with the hope that increased clinical awareness and record keeping will lead to more accurate classification and ultimately superior treatment in the future. The DSM-IV Training Guide for Diagnosis of Childhood Disorders will serve clinicians well in the sometimes difficult and subjective quest for the appropriate diagnosis, treatment, and management of children and adolescents with psychiatric disorders. It will also serve to promote the kind of dialogue and research that will lead to even greater diagnostic consensus among practitioners and encourage a more reliable and valid diagnostic practice in the future.

[Measures of Personality and Social Psychological Constructs](#) Gregory J. Boyle, Donald H. Saklofske, Gerald Matthews, 2014-09-04. Measures of Personality and Social Psychological Constructs assists researchers and practitioners by identifying and reviewing the best scales/ measures for a variety of constructs. Each chapter discusses test validity, reliability, and utility. Authors have focused on the most often used and cited scales/ measures with a particular emphasis on those published in recent years. Each scale is identified and described; the sample on which it was developed is summarized, and reliability and validity data are presented, followed by presentation of the scale in full or in part where such permission has been obtained. Measures fall into five broad groups. The emotional disposition section reviews measures of general affective tendencies and/or cognitive dispositions closely linked to emotion. These measures include hope and optimism, anger and hostility, life satisfaction, self-esteem, confidence, and affect dimensions. Emotion regulation scales go beyond general dispositions to measure factors that may contribute to understanding and managing emotions. These measures include alexithymia, empathy, resiliency, coping, sensation seeking, and ability and trait emotional intelligence. The interpersonal styles section introduces some traditional social psychological themes in the context of personality assessment. These measures include adult attachment, concerns with public image and social evaluation, and forgiveness. The vices and virtues section reflects adherence to moral standards as an individual characteristic shaped by sociocultural influences and personality. These measures include values and moral personality, religiosity, dark personalities, Machiavellianism, narcissism, and subclinical psychopathy and perfectionism. The sociocultural interaction and conflict section addresses relationships between different groups and associated attitudes. These measures include cross-cultural values, personality and beliefs, intergroup contact, stereotyping, and prejudice, attitudes towards sexual orientation, and personality.
