Rational Belief:

Rational Belief Systems Brian David Ellis, 1979 **Rational and Irrational Beliefs** Daniel David, Steven Jay Lynn, Albert Ellis, 2009-08-20 In *Rational and Irrational Beliefs* Research Theory and Clinical Practice leading scholars researchers and practitioners of rational emotive behavior therapy REBT and other cognitive behavioral therapies CBTs share their perspectives and empirical findings on the nature of rational and irrational beliefs the role of beliefs as mediators of functional and dysfunctional emotions and behaviors and clinical approaches to modifying irrational beliefs enhancing rational beliefs and adaptive coping in the face of stressful life events Offering a comprehensive and cohesive approach to understanding REBT CBT and its central constructs of rational and irrational beliefs contributors review a steadily accumulating empirical literature indicating that irrational beliefs are associated with a wide range of problems in living and that exposure to rational self statements can decrease anxiety and other psychological symptoms and play a valuable role in health promotion and disease prevention Contributors also identify new frontiers of research and theory including the link between irrational beliefs and other cognitive processes such as memory psychophysiological responses and evolutionary and cultural determinants of rational and irrational beliefs A truly accessible state of the science summary of REBT CBT research and clinical applications *Rational and Irrational Beliefs* is an invaluable resource for psychotherapy practitioners of all theoretical orientations as well as instructors students and academic psychologists *Rationality and Belief* Ralph Wedgwood, 2023 This book gives a general theory of rational belief Although it can be read by itself is a sequel to the author's previous book *The Value of Rationality* Oxford 2017 It takes the general conception of rationality that was defended in that earlier book and combines it with an account of the varieties of belief and of what it is for these beliefs to count as correct to develop an account of what it is for beliefs to count as rational According to this account rationality comes in degrees the degree to which one's beliefs count as rational is determined by their distance from a corresponding probability function where this distance is measured by those beliefs' expected degree of incorrectness according to the probability function the account also involves an explanation of what determines exactly which probability function plays this role in each case and of why this probability function should play this role In developing and defending this account new light is shed on several central epistemological issues These issues include the distinction between propositional and doxastic justification the debates between internalism and externalism and between foundationalism and coherentism the significance or lack of it of the notion of evidence the relationship between credences full belief inference and suspension of judgment the nature of the kind of possibility that is presupposed by the relevant sort of probability and whether rationality is diachronic so that the beliefs that it is rational for us to have now depend in part on the beliefs that we held in the past Finally some suggestions are made about how this theory bears on a range of further topics including the defeasibility of inference scepticism and the analysis of knowledge **Rational Belief** Robert Audi, 2015 This book is a wide ranging treatment of central topics in

epistemology It provides conceptions of belief and knowledge offers a theory of how they are grounded in our experience and in the social context of testimony and connects them with the will and with action moral responsibility and intellectual virtue

Evolutionary Debunking Arguments Diego E. Machuca,2022-09-09

Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics metaphysics and epistemology The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains

Rationality and Relativism I.C. Jarvie,2015-07-03 Anthropology revolves round answers to problems about the nature development and unity of mankind problems that are both philosophical and scientific In this book first published in 1984 Professor Jarvie applies Popper s philosophy of science to understanding the history and theory of anthropology Jarvie describes how the ancient view that the aim of science and philosophy was to get at the truth is challenged in anthropology by the doctrine of cultural relativism that is that truth varies with the cultural framework He shows how philosophers as various as Peter Winch W V O Quine W T Jones Nelson Goodman and Richard Rorty were influenced by this doctrine Yet these philosophers also accept the value of rational argument Jarvie believes that there is a contradiction between relativism and any notion of human rationality that centres around argument Forced by the contradiction to choose between rationality and relativism he argues strongly that logical scientific and moral considerations favour rationality and urge repudiation of relativism The central argument of the book is that relativism is intellectually disastrous and has fostered intellectual attitudes from which anthropology still suffers

Behavioural Economics and Business Ethics Philip Alexander Rajko,2013-03-01 Economics and moral philosophy have in recent years been considered to be distinct and separate fields However behavioural economics has started to reconcile various aspects of morality and economics which has offered new conceptual opportunities to advance economics ethics and business ethics This book aims to advance economic ethics and business ethics by combining normative principles and empirical evidence grounded on the key motivational forces in economic decision making It has three core objectives to assess order ethics as a theory of both economic ethics and business ethics using behavioural economics methods and evidence to identify cardinal virtues for modern business ethics to to set up

valuable guidelines for the implementation of economic ethics and business ethics *The Order of Public Reason* Gerald Gaus,2010-12-13 In this innovative and important work Gerald Gaus advances a revised and more realistic account of public reason liberalism showing how in the midst of fundamental disagreement about values and moral beliefs we can achieve a moral and political order that treats all as free and equal moral persons The first part of this work analyzes social morality as a system of authoritative moral rules Drawing on an earlier generation of moral philosophers such as Kurt Baier and Peter Strawson as well as current work in the social sciences Gaus argues that our social morality is an evolved social fact which is the necessary foundation of a mutually beneficial social order The second part considers how this system of social moral authority can be justified to all moral persons Drawing on the tools of game theory social choice theory experimental psychology and evolutionary theory Gaus shows how a free society can secure a moral equilibrium that is endorsed by all and how a just state respects and develops such an equilibrium **Uncertainty, Rationality, and Agency** Wiebe van der

Hoek,2006-08-18 This book collects all the papers that appeared in 2005 in *Knowledge Rationality and Action* KRA a journal published as a special section of *Synthese* which addresses contemporary issues in epistemic logic belief revision game and decision theory rational agency planning and theories of action As such the special section appeals to researchers from Computer Science Game Theory Artificial Intelligence Philosophy Knowledge Representation Logic and Agents addressing issues in artificial systems that have to gather information reason about it and then make a sensible decision about what to do next It will be clear already from the contents pages that this book indeed reflects the core of KRA the papers in this volume address degrees of belief or certainty and rational agency The latter has several manifestations often constraints on the agent's belief behaviour or decision making Moreover this book shows that KRA indeed represents a loop in the behaviour of the agent after having made a decision the life of the agent does not end rather it will do some sensing or collect otherwise the outcome of its decision to update its beliefs or knowledge accordingly and make up its mind about the next decision task

The Logic of the History of Ideas Mark Bevir,2002-06-20 Human cultures generate meanings and the history of ideas broadly conceived is the study of these meanings An adequate theory of culture must therefore rest on a suitable philosophical enquiry into the nature of the history of ideas Mark Bevir's book explores the forms of reasoning appropriate to the history of ideas enhancing our understanding by grappling with central questions such as What is a meaning What constitutes objective knowledge of the past What are beliefs and traditions How can we explain why people held the beliefs they did The book ranges widely over issues and theorists associated with post analytic philosophy post modernism hermeneutics literary theory political thought and social theory **Foundations of Belief: Exploring the Essential**
