Rational Man and Irrational Society? Brian Barry,Russell Hardin,1982-04 The Prisoner s Dilemma and Kenneth Arrow s General Possibility Theorem are two of the most simple yet far reaching concepts in social science The first captures in an easily understood paradox how individually rational acts that benefit individual people can combine to produce a result that is of less benefit to everyone The Arrow Theorem shows that there is no formula for ranking the preferences of many people into a rational aggregate This book is a collection of the best work done on these two ideas It is an ideal introduction for students or sourcebook for professionals it presents the traditional works addressing the problems of rationality in social and political theory the anthology represents a much nee

New Approach to Utilitarianism C.L. Sheng,2012-12-06 1 1 Utilitarian Theories This book is a monograph on moral philosophy and social philosophy particularly the part of the philosophy of economics that is related to the general distribution problem It presents a comprehensive ethical theory together with an application of the theory to distributive justice The viewpoint of this theory is utilitarian However this theory is different in some crucial points as well as in minor details from all existing forms of utilitarianism Moral philosophy deals essentially with the moral judgment of actions i e whether a moral action is right or wrong good or bad The judgment is usually based on a line of logical reasoning which can be traced to a final reason called the justification or ultimate principle An ethical theory is a self consistent system built upon a basic or ultimate principle An ultimate principle can never be rigorously proven and is not unique Different philosophers establish different ethical theories upon different principles Therefore in the history of development of moral philosophy there have been a large number of ethical theories and schools Even within the same school having the same ultimate principle different philosophers may have different versions of the theory because of small variations in the interpretation of the ultimate principle or in the elaboration of the details

The Importance of Assent Jan-Willem Van der Rijt,2011-09-24 The view that persons are entitled to respect because of their moral agency is commonplace in contemporary moral theory What exactly this respect entails however is far less uncontroversial In this book Van der Rijt argues powerfully that this respect for persons moral agency must also encompass respect for their subjective moral judgments even when these judgments can be shown to be fundamentally flawed Van der Rijt scrutinises the role persons subjective moral judgments play within the context of

coercion and domination His fresh original analysis of Kant's third formulation of the Categorical Imperative reveals how these judgments are intimately connected to a person's dignity The result is an insightful new account of coercion a novel Kantian reformulation of the republican notion of non domination and a compelling innovative argument in favour of retributive justice In this admirably clear and insightful work Van der Rijt develops an original account of coercion and dignity On the basis of his analysis of the relation between these two concepts he also provides an intriguing new angle on the nature of republicanism I recommend this book to anyone interested in freedom and power and their roles in normative political theory Ian Carter University of Pavia In this carefully argued and original study Jan Willem van der Rijt offers an analysis of coercion a broadly Kantian argument that coercion is an affront to dignity and an illuminating contrast with Philip Pettit's republicanism A most welcome contribution Thomas E Hill Jr University of North Carolina at Chapel Hill Jan Willem van der Rijt has written a well argued original book that will prove to be extremely helpful for the philosophical inquiry of the relationship between coercion and human dignity as well as for the assessment of republicanism and its consequences Ralf Stoecker University of Potsdam

The Concept of Meaninglessness Edward Erwin, 2019-12-01 Originally published in 1970 Many contemporary philosophers have thought that certain philosophic disputes could be settled by using the concept of meaninglessness To solve philosophic problems in this way however it seemed necessary to provide a reliable criterion for deciding when a particular sentence or statement is meaningless But devising such a criterion has proved to be very difficult In fact in recent years many philosophers have become quite skeptical about the adequacy of the standard criteria of meaninglessness Some of the more radical skeptics have even argued that the concept of meaninglessness as it is used by philosophers is itself defective and would be even if an adequate criterion could be found Professor Erwin in a systematic study of the concept of meaninglessness begins by examining the standard criteria of meaninglessness proposed by philosophers These criteria include operationalist verificationist and type or category criteria Each of these criteria he argues is inadequate Erwin then turns to the question What kinds of items if any should be said to be meaningless Most philosophers concerned with this question have claimed that only sentences not statements or propositions can be meaningless Erwin argues however that this is wrong statements and propositions can be meaningless Once this is demonstrated it can then be shown that the more radical skepticism about the philosophic use of the concept of meaninglessness is misguided In particular Erwin shows that the following assertions of the radical skeptic are false that what is meaningless is relative to a given language or to a given time and that the concept of meaninglessness forces us to condemn as nonsense metaphors comprehensible to competent speakers of English In his concluding chapter Erwin considers the implications of there not being any adequate general criterion of meaninglessness He then tries to show how the concept of meaninglessness when interpreted in the manner he suggests can be profitably used by philosophers despite the many persuasive objections to its use that philosophers have raised in their disputes over it

Society 5.0 Bruno Salgues, 2018-08-21 Following the rapid

development of connected technologies which are now highly sophisticated and spread across the globe Society 5.0 has emerged and brought with it a dramatic societal shift In 1998 Kodak the world leader in photographic film had 170 000 employees It thus seemed unthinkable that just 3 years later the majority of people would stop taking photographs to paper film and that Kodak would have disappeared These are the stakes of this new society that is taking shape This book which does not seek to critique current politics management or marketing literature aims to fight against the excesses of this often misunderstood Society 5.0 and to present the ideas and associated technologies that comprise it all working towards societal improvement Among these technologies artificial intelligence robotics digital platforms and 3D printing are undoubtedly the most important and thus receive the greatest focus *Amor Mundi and Overcoming Modern World Alienation* Justin Pack,2019-10-17 Love in many premodern cultures extended to and permeated the world or even the cosmos but love in contemporary consumerist society tends to be sexualized romanticized and individualized As a result ancient visions of ethical love are difficult for moderns to comprehend especially those rooted in premodern Western thought or Native American thinkers that describe a love of the natural world that would help us live more responsibly on the Earth This volume retrieves the significant narratives of love of the world and the concomitant ethical ramifications of those visions and argues that our age of science and technology has destroyed the ancient living cosmos of previous visions and replaced it with a mechanical universe This shift has resulted in various forms of destruction diminishment and forgetfulness Overcoming modern world alienation requires recovering a sense of what it means to love the world and changing our practices to reflect our interconnection with it and our interdependency on it **The works of ...
