Rethinking Development Theory And Policy:

Rethinking Development Theory and Policy Senyo B-S. K. Adjibolosoo, 1999-01-30 Critiques traditional development thinking and examines the causes for the failure of development programmes in developing countries Argues that what is fundamental to development is the human factor perspective *Rethinking Development* Saint Mary's University (Halifax, N.S.). International Education Centre, 1987

Rethinking Development Ronaldo Munck, 2021-05-17 Development and underdevelopment are the main determinants of life chances worldwide arguably more so than social class Marxism as the underlying theory for social revolution needs to have a clear understanding of the dynamics of development and social progress Exploring the intersection of Marxism and development this book looks at Marx's original conception of capitalist development and his later engagement with under developed Russia The author also reviews Lenin's early critique of the Russian populists rejection of capitalism compared with his later analysis of imperialism as a brake on development in the non European world The book then considers Rosa Luxemburg who arguably provides a bridge between these theorists and those that follow with her analysis of imperialism as a necessity for capitalism to incorporate non capitalist lands Turning then to the non European world the author examines the Latin American dependency theories the post development school and the recent indigenous development theories advanced by Andean Marxism Finally Munck addresses the relationship between globalization and development Does this relationship suggest that it has not been capitalism but a lack of capitalism that has led to under development

Economic Theory and Policy amidst Global Discontent Ananya Ghosh Dastidar, Rajeev Malhotra, Vivek Suneja, 2018-02-06 This book rethinks economic theory and calls for a creative and pragmatic approach to policymaking It examines what development and sustenance of economic progress mean and how these may be facilitated The relevance of this issue has received fresh impetus from the significant changes in the degree and pattern of international economic relations that are unfolding across the world posing both opportunities and challenges While globalisation of goods and financial markets may have delivered high growth for some nations the distribution of the benefits has often been highly unequal with gains to owners of capital and skills being disproportionately higher compared to that of labour especially the unskilled Widening and persistent inequalities have been at the heart of rising polarisation and spread of conflicts that threaten the social fabric This work emphasises the relevance of a broad policy framework based on building individual capabilities and in line with a human centric perspective At the same time it points out the crucial need to create policy space

for macroeconomic stability and to accommodate heterodox influences especially when conventional wisdom proves inadequate as starkly demonstrated inter alia during the recent global financial crisis This festschrift dedicated to Deepak Nayyar presents chapters on diverse themes that address the persisting global problems of poverty inequality and sustaining development The book will be of great interest to scholars and researchers of economics development studies public policy and governance and also to policymakers government officials and those in media

Promoting Innovation, Productivity and Industrial Growth and Reducing Poverty Maureen Mackintosh,Joanna Chataway,Marc Wuyts,2021-04-26 Development and the ending of mass poverty require a massive increase in productive capabilities and production in developing countries Some countries notably in Asia are achieving this Yet pro poor aid policies especially for the least developed countries operate largely without reference to policy thinking on the promotion of innovation for productivity growth Conversely policy makers and researchers on innovation and industrial policies tend to know little about the potential for social protection to support innovation and productivity improvement This book aims to focus attention on this gulf between research on innovation and on poverty reduction and to identify some of its policy consequences to set out some ways in which this gulf can be bridged analytically and empirically and to contribute to the creation of an agenda for further research and an understanding of the urgency of the implied rethinking The first two chapters provide sustained arguments for embedding social policy thinking in much more productivist frameworks of thought that focus on raising productivity and employment

and for identifying growth theories that can incorporate satisfactory understandings of innovation and employment upgrading A set of chapters then tackle these broad themes in the context of health addressing the interlinked issues of innovation health inequity and associated impoverishment The final set of chapters examines the challenge of creating industrial policies that generate both innovation and employment using and going beyond concepts of systems of innovation

The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly

formulated that conventional wisdom is actually contradicted by historical evidence and common sense. It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure. In fact, the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological: low income countries are by definition those where such ingredients are missing. None of today's high income countries started its growth process with the required and complete list of growth ingredients. Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism, the conventional view must be re-examined, debated, and questioned. This volume, the second of the Oxford Handbook of Africa and Economics, reassesses the economic policies and practices observed across the continent since independence. It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints. Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book.

Theory and Practice in Policy Analysis M. Granger Morgan, 2017-10-12. Many books instruct readers on how to use the tools of policy analysis. This book is different. Its primary focus is on helping readers to look critically at the strengths, limitations, and the underlying assumptions analysts make when they use standard tools or problem framings. Using examples, many of which involve issues in science and technology, the book exposes readers to some of the critical issues of taste, professional responsibility, ethics, and values that are associated with policy analysis and research. Topics covered include policy problems formulated in terms of utility maximization, such as benefit-cost decision and multi-attribute analysis; issues in the valuation of intangibles; uncertainty in policy analysis; selected topics in risk analysis and communication; limitations and alternatives to the paradigm of utility maximization; issues in behavioral decision theory; issues related to organizations and multiple agents; and selected topics in policy advice and policy analysis for government.
