declined significantly in the wake of the social and cultural changes that began in the 1960s Does this mean that people in these societies are losing any religious dimension in their lives or is it being expressed in other forms and places This study begins by looking at comparative data on how church going patterns have changed in five countries Britain the United States Canada Australia and New Zealand examining reasons for the decline how churches have responded to these changes and why some churches have shown greater resilience It then explores some of the particular challenges these changes pose for the future of churches in these societies and some of the responses that have been made drawing on both sociological and theological insights The conclusion is that despite the loss of belonging believing persists and religion continues to play a significant role in these societies mediated in a variety of diffuse cultural forms Cases illustrating these changes are largely drawn from New Zealand which as the country most recently settled by Europeans has always been secular and thus provides helpful insights **Leader** Katy Granville-Chapman, Emmie Bidston, 2020-06-30 What exactly is it that good leaders do to enable their teams to succeed How do they think What do findings from neuroscience teach us about effective

**Sensorimotor-Focused EMDR** Arthur O'Malley, 2018-12-14 Sensorimotor Focused EMDR combines two hugely influential and effective therapies EMDR therapy and sensorimotor psychotherapy to provide a new approach In doing so the book supports the widely held view of psychotherapists that in trauma the primary store of neurological information is somatic rather than cognitive Many therapists trained in EMDR find that additional resources are needed for patients who present with symptoms of complex trauma and dissociation This is because EMDR is primarily a top down approach based on CBT with the addition of bilateral stimulation BLS in visual tactile and auditory modalities By contrast Sensorimotor Focused EMDR takes a body based and bottom up approach that seeks to resolve trauma by reprocessing information at multiple levels in the gut brain the heart brain and the head brain as well as in the endocrine immune and nervous systems Fully revised since The Art of BART 2015 the book looks at the latest advances in neuroscience including research into the effectiveness of psychotherapy and the mysteries of consciousness and the development of mind It also looks at the role of newly discovered organs the mesentery and the interstitium and provides clear anatomical evidence for the communication of biophotons in energy channels known as the primo vascular system SF EMDR is the only therapy that fully integrates Western theories of affective neuroscience with Eastern observations on activation of chakras pranas and energies and in doing so it offers strong potential for enhanced outcomes and optimized performance for patients

*Identity and State Formation in Africa* Manuel Castells, Bernard Lategan, 2021-03-16 This book examines how the interplay between globalization and the assertion of local identities is reshaping the political landscape of Africa While defending their values against external forces people simultaneously and paradoxically use the interconnectivity of global networks to maximize their particular interests Focusing on the relation between national identity and state formation the authors explore the far reaching consequences of these contradictory dynamics Although Africa shares many common trends with other parts of the world it also displays distinctive features A region characterized by the increased mobility of people goods and ideas challenges some conventional assumptions of statecraft and also highlights the advantages of federalism not merely as a constitutional option but as a pragmatic device for managing diversity and holding fragile states together The book further explores emerging types of state formation in the same political space as exemplified by the combination of elements of a kingdom an independent state and a national power base in the province of KwaZulu Natal and the careful crafting of an alternative state within a state by the Solidarity Movement in South Africa Informed by examples and case studies drawn from different parts of Africa this book will be of great interest to students and scholars of Africa politics sociology media studies and the social sciences more generally
