Farrell, 2021-01-15 Atomic Bomb Island tells the story of an elite top secret team of sailors airmen scientists technicians and engineers who came to Tinian in the Marianas in the middle of 1945 to prepare the island for delivery of the atomic bombs then being developed in New Mexico to finalize the designs of the bombs themselves and to launch the missions that would unleash hell on Japan Almost exactly a year before the atomic bombs were dropped strategically important Tinian was captured by Marines because it was only 1 500 miles from Japan and its terrain afforded ideal runways from which the new B 29 bombers could pound Japan In the months that followed the U S turned virtually all of Tinian into a giant airbase with streets named after those of Manhattan Island a Marianas city where the bombs could be assembled the heavily laden B 29s could be launched and the Manhattan Project scientists could do their last work Don Farrell has done this story incredible justice for the 75th anniversary The book is a thoroughly researched beautifully illustrated mosaic of the final phase of the Manhattan Project from the Battle of Tinian and the USS Indianapolis to Hiroshima and Nagasaki **Critical Thinking Using Primary Sources in U.S. History** Wendy S. Emergency War Plan Sean M. Maloney,2021-02 2023 AFHF Air Power History Book Prize Winner *Emergency War Plan* examines the theory and practice of American nuclear deterrence and its evolution during the Cold War Previous examinations of nuclear strategy during this time have for the most part categorized American efforts as massive retaliation and mutually assured destruction blunt instruments to be casually dismissed in favor of more flexible approaches or summed up in inflammatory and judgmental terms like MAD These descriptors evolved into slogans and any nuanced discussion of the efficacy of the actual strategies withered due to a variety of political and social factors Drawing on newly released weapons effects information along with new information about Soviet capabilities as well as risky and covert espionage missions *Emergency War Plan* provides a completely new examination of American nuclear deterrence strategy during the first fifteen years of the Cold War the first such study since the 1980s Ultimately what emerges is a picture of a gargantuan and potentially devastating enterprise that was understood at the time by the public in only the vaguest terms but that was not as out of control as has been alleged and was more nuanced than previously understood **Stars and Stripes Across the**

Pacific William Nimmo, 2001-09-30 In the late 19th century the United States began a period of increased engagement in the Western Pacific a situation that continues to this day Nimmo provides a study of U S diplomatic economic and military relations with the nations of East Asia and the Pacific from the late 1800s to 1945 In addition to interaction with China Korea and Japan the book includes U S involvement in Hawaii American Samoa Guam and the Philippines This one volume treatment ranging from the Spanish American War to the Second World War examines the continuity in U S policy during this crucial period Particular attention is devoted to the U S response to Japan s territorial aggression during this period primarily its undeclared wars against China in Manchuria in 1931 and in North and Central China from 1937 to 1945 This examination counters revisionist claims that the United States led Japan into war in 1941 and that war could have been avoided by the pursuit of a more conciliatory policy on the part of the U S It explores why it was necessary for the U S to demand unconditional surrender and refutes claims that Japan was a victim of the war The acquisition of U S territory in the Pacific initially began with the annexation of Hawaii and continued with the former possessions of Spain ceded in the Spanish American War Nimmo follows this story through the Philippine War efforts to promote Philippine independence the Commonwealth era and finally independence in 1946

Pacific Skies Jerome Klinkowitz, 2009-09-18 From 1941 to 1945 the skies over the Pacific Ocean afforded the broadest arena for battle and the fiercest action of air combat during World War II It was in the air above the Pacific that America s involvement in the war began It was in these skies that air power launched from carriers became a new form of engagement and where the war ultimately ended with kamikaze attacks and with atomic bombs dropped over Japan Throughout the conflict American flyers felt a compelling call to supplement the official news and military reports In vivid accounts written soon after combat and in reflective memoirs recorded in the years after peace came both pilots and crew members detailed their stories of the action that occurred in the embattled skies Their first person testimonies describe a style of warfare invented at the moment of need and at a time when the outcome was anything but certain Gathering more than a hundred personal narratives from Americans and from Japanese Pacific Skies recounts a history of air combat in the Pacific theater Included are the words of such famous aces and bomber pilots as Joe Foss Pappy Boyington Dick Bong and Curtis Lemay as well as the words of many rank and file airmen Together their stories express fierce individualism and resourcefulness and convey the

vast panorama of war that included the skies over Pearl Harbor Wake and Guadalcanal and missions from Saipan and Tinian As Pacific Skies recounts the perilous lives of pilots in their own words Jerome Klinkowitz weaves the individual stories into a gripping historical narrative that exposes the shades of truth and fiction that can become blurred over time A book about experiencing and remembering Pacific Skies also is a story of unique perspectives on the war *The Heroes We Needed* Trevor B McIntyre,2024-10-31 McIntyre recounts the stories of many airmen who did not return which are undeniably touching as are the photographs he includes Because of their size the B 29s were able to drop the atomic bombs that ended the war But it is the human stories that resonate the most A heartfelt account of the men who flew the combat airplane known as the Superfortress Kirkus Reviews During World War II there were many ways that a B 29er could be killed a ruthless enemy an unforgiving ocean that stretched for thousands of miles or the faulty engines of their own airplanes But they all volunteered for it and they continued flying and dying until they brought the war to an early end and saved hundreds of thousands of American lives They were The Heroes We Needed In this riveting saga of sacrifice and salvation Trevor McIntyre brings to life the courageous American airmen who brought the Japanese Empire to its knees and ended World War II with the greatest bombers the world had ever seen the Boeing B 29 Superfortress and his fight 70 years later to save their stories from being forgotten **Nuclear Dawn** James P. Delgado,2011-12-20 At once fascinating and horrific this book details the conception development and impact of the atomic bombs infamously dropped over Hiroshima and Nagasaki in August 1945 The obliteration of Hiroshima and Nagasaki in August 1945 brought the world to a stand still This unimaginable shock confirmed to the world that the race to develop a working atomic weapon during World War II had been won by the American led international effort Horrific and controversial even today these first uses of the atomic bomb had intense ramifications not only on the continued development of the bomb but also on politics and popular culture As well as the technological development historian James Delgado also examines how the US Army Air Force had to develop the capacity to deliver the weapons and examines the sites where development and testing took place in order to give a comprehensive history of the dawning of the nuclear age **Nuclear Weapons and the World Court** Ved P. Nanda,David Krieger,1998 Is the threat or use of nuclear weapons ever permissible This question was at the request of the United Nations General Assembly put before the International Court of Justice in 1996 for an advisory opinion An evenly divided Court concluded that the threat or use of nuclear weapons would generally be contrary to the rules of international law applicable in armed conflict and in particular the principles and rules of humanitarian law not an outright condemnation but certainly strong enough to set in motion the serious initiative to outlaw nuclear weapons currently before the nations of the world *Racing for the Bomb* Robert S. Norris,2014-10-21 In September 1942 Colonel Leslie R Groves was given the job of building the atomic bomb As a career officer in the Army Corps of Engineers Groves had overseen hundreds of military construction projects including the Pentagon Until now scientists have received the credit for the Manhattan Project s remarkable

achievements And yet it was Leslie R Groves who made things happen It was Groves who drove manufacturers construction crews scientists industrialists and military and civilian officials to come up with the money the materials and the plans to solve thousands of problems and build the bomb in only two years It was his operation and in *Racing for the Bomb* he emerges as a take charge can do figure who succeeds in the face of formidable odds Revealed for the first time in *Racing for the Bomb* Groves played a crucial and decisive role in the planning timing and targeting of the Hiroshima and Nagasaki missions Norris offers new insights into the complex and controversial questions surrounding the decision to drop the bomb in Japan and Groves s actions during World War II which had a lasting imprint on the nuclear age and the Cold War that followed Grove s extensive influence on key institutions of postwar America has been overlooked for too long In this full scale biography which includes archival material and family letters and documents and features several previously unpublished photographs Norris places Groves at the center of the amazing Manhattan Project story Skyhorse Publishing along with our Arcade Good Books Sports Publishing and Yucca imprints is proud to publish a broad range of biographies autobiographies and memoirs Our list includes biographies on well known historical figures like Benjamin Franklin Nelson Mandela and Alexander Graham Bell as well as villains from history such as Heinrich Himmler John Wayne Gacy and O J Simpson We have also published survivor stories of World War II memoirs about overcoming adversity first hand tales of adventure and much more While not every title we publish becomes a New York Times bestseller or a national bestseller we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home

Racing for the Bomb Robert Stan Norris, 2002 Follows the World War II race to build the atomic bomb while profiling its top commander documenting how Colonel Groves organized the collection of the necessary funds and materials while orchestrating solutions to thousands of technical problems
