Rule and Conflict in an Early Medieval Society Karl Leyser, American Council of Learned Societies, 1979      **Medieval German and Its Neighbours, 900-1250** Karl Leyser, 1982-01-01 The inner workings of early medieval societies cannot be understood without also studying their links religious cultural economic and political with their neighbours In this collection Karl Leyser shows how Ottonian and Salian Germany both influenced and was influenced by the societies with which it came into contact While the author s central interest is in Germany his work is of value for the study of medieval European society as a whole      **England and Germany in the High Middle Ages** Alfred Haverkamp, Hanna Vollrath, Karl Leyser, 1996 This collection of essays examines the similarities and differences between medieval England and Germany at a period of great change in almost all areas of life It asks a number of fundamental questions which highlight the foundations of a rich common European heritage What was it that made life in the twelfth century more varied less peaceful and less secure than before How can the parallel developments changes and transformations that took place in Latin Europe in the High Middle Ages be related to each other What answers were found to the challenges of the age in England and Germany This volume gives the reader an opportunity to see how English speaking and German scholars approach similar themes Edited by two leading German medievalists it includes 17 contributions by eminent scholars from Britain North America and Germany It is divided into 4 sections on modes of communication war and peace Christians and non Christians and urban and rural developments and is essential reading for students and scholars of English or German medieval history      **Topographies of Power in the Early Middle Ages** Mayke de Jong, Frans Theuvs, 2001-06-28 The 19 papers presented in this volume by North American and European historians and archaeologists discuss how early medieval political and religious elites constructed places of power and how such places in turn created powerful people They also examine how the high level power exercised by elites was transformed in the post Roman kingdoms of Europe as Roman cities gave way as central stages for rituals of power to a multitude of places and spaces where political and religious power were represented Although the Frankish kingdoms receive a large share of attention contributions also focus on the changing topography of power in the old centres of the Roman world Rome and Constantinople to what centres of power may have meant in the steppes of Inner Asia Scandinavia or the lower Vistula where political power was even more mobile and decentralised than in the post Roman kingdoms as well as to monasteries and their integration into early medieval topographies of power      Conflict, Bargaining, and Kinship Networks in Medieval Eastern Europe Christian Raffensperger, 2018-04-26 Conflict Bargaining and Kinship Networks in Medieval Eastern Europe takes the familiar view of Eastern Europe families and conflicts and stands it on its head Instead of a world rife with civil war and killing this book presents a relatively structured environment where conflict is engaged in for the purposes of advancing one s position and where death among the royal families is relatively rare At the heart of this analysis is the use of situational kinship networks relationships created by elites for the purposes of engaging in

conflict with their own kin but only for the duration of a particular conflict A new image of medieval Eastern Europe less consumed by civil war and mass death will change the perception of medieval Eastern Europe in the minds of readers This new perception is essential to not only present the past more accurately but also to allow for medieval Eastern Europe's integration into the larger medieval world as something other than an aberrant other The Oxford Encyclopedia of Medieval Warfare and Military Technology Clifford J. Rogers, 2010 From the Viking invasions to the Crusades to the Hundred Years War wars were crucial agents of change in medieval Europe They fostered many economic and political changes They also affected the science technology religion and culture of the parties involved Examines all aspects of warfare and military technology in medieval times and provides an exhaustive and accurate view of how and why wars were waged throughout Europe the Byzantine Empire and the Crusader States from circa 500 CE to circa 1500 **Unpredictability and Presence** Hans Jacob Orning, 2008 This book applies a legal anthropological framework to high medieval Norwegian history It formulates the question of state formation in a new and challenging way by showing how the king a substantial degree based his dominion on unpredictability and presence The Holy Roman Empire Brian A. Pavlac, Elizabeth S. Lott, 2019-06-01 Reference entries overview essays and primary source document excerpts survey the history and unveil the successes and failures of the longest lasting European empire The Holy Roman Empire endured for ten centuries This book surveys the history of the empire from the formation of a Frankish Kingdom in the sixth century through the efforts of Charlemagne to unify the West around A D 800 the conflicts between emperors and popes in the High Middle Ages and the Reformation and the Wars of Religion in the Early Modern period to the empire's collapse under Napoleonic rule A historical overview and timeline are followed by sections on government and politics organization and administration individuals groups and organizations key events the military objects and artifacts and key places Each of these topical sections begins with an overview essay which is followed by alphabetically arranged reference entries on significant topics The book includes a selection of primary source documents each of which is introduced by a contextualizing headnote and closes with a selected general bibliography Power and Its Problems in Carolingian Europe Stuart Airlie, 2018-02-06 A key theme in this collection of thirteen essays is the creative tension between the Carolingian dynasty and its aristocratic followers across 250 years The first section explores the rising dynasty's attempts to consolidate its power through war and rewards The second section focuses on the exercise of authority through a complex system of governance and representation and the pivotal role played by the courts of Charlemagne and his successors In the third section we see the Carolingian system undergoing a crisis of legitimacy challenged by civil war royal divorce and aristocratic encroachment on dynastic exclusivity These essays anatomise the dynamics of power relations in the greatest empire of the early medieval west *Memory and Gender in Medieval Europe, 900-1200* Elisabeth Van Houts, 2016-07-27 Remembering the past in the Middle Ages is a subject that is usually perceived as a study of chronicles and annals written by monks in monasteries Following in the footsteps of early

Christian historians such as Eusebius and St Augustine the medieval chroniclers are thought of as men isolated in their monastic institutions writing about the world around them As the sole members of their society versed in literacy they had a monopoly on the knowledge of the past as preserved in learned histories which they themselves updated and continued A self-perpetuating cycle of monks writing chronicles which were read updated and continued by the next generation so the argument goes remained the vehicle for a narrative tradition of historical writing for the rest of the Middle Ages Elisabeth van Houts forcefully challenges this view and emphasises the collaboration between men and women in the memorial tradition of the Middle Ages through both narrative sources chronicles saints lives and miracles and material culture objects such as jewellery memorial stones and sacred vessels Men may have dominated the pages of literature from the period but they would not have had half the stories to write about if women had not told them thus the remembrance of the past was a human experience shared equally between men and women

**Authority in Byzantine Provincial Society, 950-1100** Leonora Neville, 2004-08-19 The imperial government over the central provinces of the Byzantine Empire was sovereign and at the same time apathetic dealing effectively with a narrow set of objectives chiefly collecting revenue and maintaining imperial sovereignty Outside of these spheres action needed to be solicited from imperial officials leaving vast opportunities for local people to act independently without legal stricture or fear of imperial involvement In the absence of imperial intervention provincial households competed with each other for control over community decisions The emperors exercised just enough strength at the right times to prevent the leaders of important households in the core provinces from becoming rulers themselves Membership in a successful household wealth capacity for effective violence and access to the imperial court were key factors that allowed one to act with authority This book examines in detail the mechanisms provincial households used to acquire and dispute authority
