The Exceptional Woman Mary D. Sheriff, 1997-10-24 Elisabeth Vigee Lebrun 1755 1842 was an enormously successful painter a favorite portraitist of Marie Antoinette and one of the few women accepted into the Royal Academy of Painting and Sculpture In her role as an artist she was simultaneously flattered as a charming woman and vilified as monstrously unfeminine In *The Exceptional Woman* Mary D Sheriff uses Vigee Lebrun s career to explore the contradictory position of woman artist in the moral philosophical professional and medical debates about women in eighteenth century France Central to Sheriff s analysis is one key question given the cultural norms and social attitudes that regulated a woman s activities how could Vigee Lebrun conceive of herself as an artist and indeed become a successful one in old regime France Paying particular attention to painted and textual self portraits Sheriff shows how Vigee Lebrun s images and memoirs undermined the assumptions about woman and the strictures imposed on women Engaging ancien regime philosophy as well as modern feminism psychoanalysis literary theory and art criticism Sheriff s interpretations of Vigee Lebrun s paintings

availability heuristic Understanding social pathologies as a cognitive failure allows us to identify the introduction of normative friction as the main way to counteract their effects One of the potential effects of normative friction as a specific form of cognitive dissonance is the intense exercise of the imagination thus operating as a condition of possibility for the exercise of autonomy and reflection Democratic ethical life understood as a shared democratic culture as well as social institutions and narratives are the privileged social spaces and means to trigger reflective processes that can counteract social pathologies through a reflective reappropriation of the meaning of the shared practical context An extraordinary contribution by a Critical Theorist to the return of the concept of imagination today It takes up the challenge once taken by Kant to think about imagination as the pivotal activity not only of knowledge and experience but above all for action The author claims that imagination makes criticism possible pathologies and it allows us to envision alternative views into the path for social transformation Without imagination nothing is possible Mar a P a Lara Universidad Autonoma Metropolitana Iztapalapa Mexico
