The Arctic in the British imagination 1818-1914 Rob David,2017-03-01 The Arctic region has been the subject of much popular writing This book considers nineteenth century representations of the Arctic and draws upon an extensive range of evidence that will allow the widest connections to emerge from a cross disciplinary analysis using different methodologies and subject matter It positions the Arctic alongside more thoroughly investigated theatres of Victorian enterprise In the nineteenth century most images were in the form of paintings travel narratives lectures given by the explorers themselves and photographs The book explores key themes in Arctic images which impacted on subsequent representations through text painting and photography For much of the nineteenth century national and regional geographical societies promoted exploration and rewarded heroic endeavor The book discusses images of the Arctic which originated in the activities of the geographical societies The Times provided very low key reporting of Arctic expeditions as evidenced by its coverage of the missions of Sir John Franklin and James Clark Ross However the illustrated weekly became one of the main sources of popular representations of the Arctic The book looks at the exhibitions of Arctic peoples Arctic exploration and Arctic fauna in Britain Late nineteenth century exhibitions which featured the Arctic were essentially nostalgic in tone The Golliwogg s Polar Adventures published in 1900 drew on adult representations of the Arctic and will have confirmed and reinforced children s perceptions of the region Text books board games and novels helped to keep the subject alive among the young *Depictions and Images of War in Edwardian Newspapers, 1899-1914* G.

Wilkinson,2002-12-13 Through a detailed examination of newspaper coverage from 1899 1914 this book seeks to understand the vicarious experience of warfare held by Edwardians at the outset of the First World War The attitudes towards and perceptions of war held by those who participated in it or encouraged others to do so are crucial to our understanding of the origins of the First World War Taking into account media history cultural studies and military history Wilkinson argues that the press depicted war as distant and safe beneficial and desirable and even as some kind of sport or game We are cautioned to avoid the same misconceptions of war in our own contemporary discussions of armed conflict

Rule Britannia Robert Opie,1985 *The Business of Beauty* Jessica P. Clark,2020-04-30 The Business of Beauty is a unique exploration of the history of beauty consumption and business in Victorian and Edwardian London Illuminating national and cultural contingencies specific to London as a global metropolis it makes an important intervention by challenging the view of those who like their historical contemporaries perceive the 19th and early 20th centuries as devoid of beauty praxis let alone a

commercial beauty culture Contrary to this perception The Business of Beauty reveals that Victorian and Edwardian women and men developed a number of tacit strategies to transform their looks including the purchase of new goods and services from a heterogeneous group of urban entrepreneurs hairdressers barbers perfumers wigmakers complexion specialists hair restorers manicurists and beauty culturists Mining trade journals census data periodical print and advice literature Jessica P Clark takes us on a journey through Victorian and Edwardian London s beauty businesses from the shady back parlors of Sarah Madame Rachel Levenson to the elegant showrooms of Eugene Rimmel into the first Mayfair salon of Mrs Helena Titus aka Helena Rubinstein By revealing these stories Jessica P Clark revises traditional chronologies of British beauty consumption and provides the historical background to 20th century developments led by Rubinstein and others Weaving together histories of gender fashion and business to investigate the ways that Victorian critiques of self fashioning and beautification defined both the buying and selling of beauty goods this is a revealing resource for scholars students fashion followers and beauty enthusiasts alike

Images of Nations and International Public Relations Michael Kunczik, 2016-05-06 This volume addresses the importance of images of nations in international relations One fundamental assumption is that the behavior of states is not the same as that of individuals States are social systems whose behavior as a rule directly corresponds neither to the motives of their respective leaders nor to those of their populations However it is also self evident that international activities always depend on personal relationships The studies presented relate to more or less deliberate attempts to induce change in images Given the interdisciplinary nature of the subject matter findings made in public relations advertising research prejudice research and other fields are also taken into account Very often it is impossible to distinguish between the image of the nation state and the images of big enterprises such as Krupp Ford or Coca Cola For this reason the country of origin effect is also discussed

Wally Olins on Brand Wally Olins, 2004-04-17 Wise witty readable and very very useful A tour de force from the world s leading

authority on branding Anthony Hopwood Said Business School Oxford Brands are a cultural phenomenon of our time Yet whether praised or derided they have suffered from a critical debate characterized by routine thinking glib assumptions or mere prejudice Wally Olins draws on a lifetime of marketing experience to explain why it is time to throw the old mission statements away what happens when a brand goes global when we shouldn't automatically assume that the customer comes first and how it might be good news that branding is set to spread even further Above all Olins provides a positive rejoinder to the new orthodoxies of the No Logo critics of branding by showing how they confuse their views about brands with their views about capitalism As he argues brands are no longer just about corporations products and services In fact all the significant institutions in our lives the towns cities regions or countries in which we live our sports teams and museums our consumer groups and charities are given strength identity a defining role and a satisfying cohesion via branding one of the most significant social as well as business developments of modern times Always wise questioning and iconoclastic Wally Olins takes us to the literal heart of the matter our crucial neglect of the way in which consumer decisions about brands are as emotional as all the other important decisions in our lives For everyone in marketing advertising design and business and for anyone who wants to understand how the world works in the early twenty first century this is one of those rare books that breaks the mold

History and Economic Life Georg Christ, Philipp R. Rössner, 2020-02-27 History and Economic Life offers students a wide ranging introduction to both quantitative and qualitative approaches to interpreting economic history sources from the Middle Ages to the Twentieth Century Having identified an ever widening gap between the use of qualitative sources by cultural historians and quantitative sources by economic historians the book aims to bridge the divide by making economic history sources more accessible to students and the wider public and highlighting the need for a complementary rather than exclusive approach Divided into two parts the book begins by equipping students with a toolbox to approach economic history sources considering the range of sources that might be of use and introducing different ways of approaching them The second part consists of case studies that examine how economic historians use such sources helping readers to gain a sense of context and understanding of how these sources can be used The book thereby sheds light on important debates both within and beyond the field and highlights the benefits gained when combining qualitative and quantitative approaches to source analysis Introducing sources often avoided in culturally minded history or statistically minded economic history courses respectively and advocating a combined quantitative and qualitative approach it is an essential resource for students undertaking source analysis within the field

Demons of Domesticity Anne Clendinning,2017-05-15 Demons of Domesticity offers a social history of the English gas industry from the 1880s to the late 1930s with an emphasis on the corporations that served London and the Home Counties It documents the hitherto unexamined role that women played in the development of the industry by considering two major interlocking themes the expansion of sales occupations for women in the English gas industry and the parallel growth and diversification of the industry s marketing strategies During the late nineteenth century the home became the focal point for a number of debates concerning female employment and gender roles As an increasing number of labour saving domestic devices came onto the market women found themselves targeted by manufacturing companies and utility suppliers both as consumers and advocates Foremost among these companies were representatives of the gas industry who actively addressed domestic issues As the promoters purveyors and consumers of domestic technology Demons of Domesticity suggests that English female employees and consumers were not the hapless dupes of corporate marketing but instead had clear ideas about how domestic technology could and should be used to reconfigure the public and private spaces of work and home

The Commodity Culture of Victorian England Thomas Richards,1990 This provocative and theoretically sophisticated book reveals how capitalism produced and sustained a culture of its own in the nineteenth and early twentieth centuries Richards provides a valuable account of the interaction between cultural and business development in Victorian England by focusing on the evolution of advertising Through an examination of five case studies ranging from how advertisers employed

images of the Crystal Palace Exhibition of 1851 to their use of images of women just before WWI he argues that the British developed a new type of culture in the mid and late 19th century a new way of thinking and living increasingly based upon the possession of material goods commodities Revising the findings of some earlier scholars Richards shows that cultural forms of consumerism came into being well before the consumer economy did The 50 well reproduced advertising images greatly enhance the value of this study M Blackford Choice
