Nuria Gil Mariño,Laura Miranda,2019-09-12 The appearance of sound film boosted entertainment circuits around the world drawing cultural cartographies that forged images of spaces nations and regions By the late 1920s and early 30s film played a key role in the configuration of national and regional cultural identities in incipient mass markets Over the course of the twentieth and early twenty first centuries this transmedia logic not only went unthreatened but also intensified with the arrival of new media and the development of new technologies In this respect this book strikes a dialogue between analyses

that reflect the flows and transits of music films and artists mainly in the Ibero American space although it also features essays on Soviet and Asian cinema with a view to exploring the processes of configuration of cultural identities As such this work views national borders as flexible spaces that permit an exploration of the appearance of transversal relations that are part of broader networks of circulation as well as economic social and political models beyond the domestic sphere
