Butler, 2014-06-02 Winner of the 2015 PMIG Outstanding Publication Award from the Society of Music Theory The DJs and laptop performers of electronic dance music use preexistent elements such as vinyl records and digital samples to create fluid dynamic performances These performances are also largely improvised evolving in response to the demands of a particular situation through interaction with a dancing audience Within performance musicians make numerous spontaneous decisions about variables such as which sounds they will play when they will play them and how they will be combined with other sounds Yet the elements that constitute these improvisations are also fixed in certain fundamental ways performances are fashioned from patterns or tracks recorded beforehand and in the case of DJ sets these elements are also physical objects vinyl records In *Playing with Something That Runs* author Mark J Butler explores these improvised performances revealing the ways in which musicians utilize seemingly invariable prerecorded elements to create novel improvisations Based on extensive interviews with musicians in their studios as well as in depth studies of particular mediums of performance including both DJ and laptop sets Butler illustrates the ways in which technologies both material and musical are used in performance and improvisation in order to make these transformations possible An illuminating look at the world of popular electronic music performance *Playing with Something that Runs* is an indispensable resource for electronic dance musicians and fans as well as scholars and students of popular music      *Race and the Animated Bodyscape* Francis M.

Agnoli, 2023-04-21 *Race* does not exist in animation it must instead be constructed and ascribed Yet over the past few years there has been growing discourse on the intersection of these two subjects within both academic and popular circles In *Race and the Animated Bodyscape* Constructing and Ascribing a Racialized Asian Identity in *Avatar* and *Korra* author Francis M Agnoli introduces and illustrates the concept of the animated bodyscape looking specifically at the US television series *Avatar: The Last Airbender* and its sequel *The Legend of Korra* Rather than consider animated figures as unified wholes Agnoli views them as complexes of signs made up of visual aural and narrative components that complement contradict and otherwise interact with each other in the creation of meaning Every one of these components matters as they are each the result of a series of creative decisions made by various personnel across different production processes This volume re constructs production narratives for *Avatar* and *Korra* using original and preexisting interviews with cast and crew members as well as behind the scenes material Each chapter addresses how different types of components were generated tracing their development from preliminary research to final animation In doing so this project identifies the interlocking sets of production communities behind the making of animation and thus behind the making of racialized identities Due to its illusory and constructed nature animation affords untapped opportunities to approach the topic of race in media looking beyond the role of the actor and taking into account the various factors and processes behind the production of racialized performances The analysis of race and animation calls for a holistic approach one that treats both the visual and the aural as intimately connected This volume offers a blueprint for how to approach the analysis of race and animation      *Fingerpicking*

*Guitar for the Young Beginner* William Bay, 2010-12-29 This beginner's approach to playing fingerstyle guitar uses well known folk songs to develop left and right hand techniques the tunes are first introduced with simplified chords and accompaniment provided by an easy downward strum of the thumb Next the thumb and three fingers pluck simultaneously to produce block chords and finally render more complex arpeggiated patterns While barre chords are judiciously avoided throughout the alternating bass concept is presented with full strength chords using all six strings where applicable While the melodies are shown in standard notation the lyrics and companion CD serve as rhythmic guides to the student neither note nor tablature reading ability is required to complete this enjoyable course
